

ERROR	Remarks/Rebuttal	Invalid/Valid?	QAE FEEDBACK
73 - Build: Opacity was at 30% on hero images. Images should be at 40% minimum.	Can you please point me to what document and where in that document it gives this rule? People are confused on if it's 30%, 35% or 40%. Thank you.	Updated	This is a long-standing best practice. Not sure if it's written anywhere nowadays, but we can ask about it.
66. Build did create a home page gallery and gallery page. However the PBN 6 also has galleries on the CAT pages. https://hibu-one-showcase.hibuwebsites.com/home-services For the CAT pages where there are images, please add a gallery. Add Gallery Anchors: Also, best practice is to use the gallery anchors for the gallery page and showcase the images by category ie. Tree Services, Hardscaping Services, Landscaping Services, Snow Removal. Leaving up to artist to determine the categories. Gallery page: The third image is missing at the time of QA, perhaps it is just loading very slowly? Please check. https://snipboard.io/74hZbR.jpg	66. Build received this website with no gallery widgets in place on CAT pages. https://my.websites.hibu.com/preview/ba5b19b3b2f1804047b6f1cfbbbc536c?device=desktop	Updated	Q: Wouldn't Build add them based on image quantity?
Pool Services and Pool Store should populate Hero REQ form vs sub-navs for Pool Services only. Pool Store was not in services. fields for Request Service tab were not matched to external site form for which we have a CRF to use.	Non-Build process. Request Service page form and Hero form are CW/QA process.	Updated	Agreed. Contact & Custom are the only Build options.
Pool Services and Pool Store should populate Hero REQ form vs sub-navs for Pool Services only. Pool Store was not in services. fields for Request Service tab were not matched to external site form for which we have a CRF to use.	Invalid - Pool Services and Pool Store have hero request forms and CWs do not edit the fields on request service page.	Updated	Agreed, it is realllly hard for a CW to get a QAE error.
23: Email not on Contact page. https://snipboard.io/uy7mGq.jpg https://snipboard.io/qWRBxr.jpg Emails weren't added to site: https://snipboard.io/5umnXs.jpg	Invalid: Client chose not to display email: https://snipboard.io/97FjAp.jpg https://hibu--c.vf.force.com/apex/HibuVFPageContentOutput?id=500VN00000IOYgiYAG&ObjectType=case	Updated	Fair
Hid view more projects buttons under galleries on CAT pages as there's no gallery page.	Invalid — These buttons are now Build's responsibility. CW doesn't know if there's going to be a gallery page or not.	Updated	Agreed - Build Error
Assistant number was listed as main number.	Invalid — This is the correct procedure when there is no Listings number.	Updated	Agree, weird hit, will work on.
2. CAT pages: single copyblock shouldn't span page, should be three blocks wide or balance with image https://snipboard.io/d5pKZz.jpg https://snipboard.io/12c57i.jpg	Invalid: This is Build's responsibility. Post-CW backup looks as it should.	Updated	Fair
https://snipboard.io/qtyEoP.jpg Link is not set on the Request button.	Invalid: On post-CW backup, Request Service buttons are properly linked on all location pages: https://my.websites.hibu.com/preview/7c14970c3bd7c89977aeef74a2336678?device=desktop	Updated	Agreed

Build: Swimming Pool SAP image, main focus obscured by form https://snipboard.io/Z7PrwE.jpg	Yes the hero form covers part of the pool, but you can clearly tell that it's a pool. Sure there could have been another photo chosen, but this doesn't seem like a "wrong" photo to me.	Updated	A flip is a really good idea and would play well on Friday, but form or no form, the concept that a pool is there doesn't blow my mind. Great feedback though, and good for consideration.
Home gallery button to gallery page missing .https://snipboard.io/D0FIOR.jpg	Invalid — CW cannot know if Build is going to use the Gallery or not.		There is another error for this section, so it won't affect the score.
All Gallery headlines read "Recent Projects". They are presenting their fleet of limo options vs asking you to view jobs like landscaping, etc.	Invalid — Gallery is not present in CW backup. Build added Gallery.	Updated	
Wellness CAT services pages, Related Services links missing .https://snipboard.io/d5y0Qs.jpg	Invalid — Related Services are present in CW backup. https://snipboard.io/3eK7BW.jpg	Updated	Agreed - this happened during build
HCG page inconsistent capitalization .https://snipboard.io/JnSbGq.jpg	Invalid — H1 is correct in CW backup. Error is introduced in Local Ranking backups. https://snipboard.io/xDJLRP.jpg	Updated	Updated and moved error to LR section
patients forms incorrectly ordered .https://snipboard.io/kInELI.jpg	Invalid — Patient forms are correctly ordered in the CW backup. https://snipboard.io/U57mu6.jpg	Updated	Agreed - this happened during build
Blog pages should be hidden .https://snipboard.io/GPRiTW.jpg	Invalid — Blog pages are hidden in CW backup. https://snipboard.io/u6Hngo.jpg	Updated	
Single-zone mini-split page had the wrong H1.	Invalid — This is correct in the CW backup. Probably a Local Ranking error. https://snipboard.io/MNZCBa.jpg	Updated	Not an error. It was part of the LR information.
.https://snipboard.io/WfbAil.jpg .https://snipboard.io/s0kRjJ.jpg .https://snipboard.io/6yU8AR.jpg space missing between punctuation and linked text on multiple pages	Invalid — This is a platform error that occurs when someone touches the text box.	Updated	
https://snipboard.io/60kH1Y.jpg https://snipboard.io/qFBdIL.jpg The LR links have to be in a straight line in the footer.	Can we get an FYI on this? Paul originally said ok to move those links and then changed his mind. My team didn't find out until 2/6.	Updated	
1. https://snipboard.io/PxQgTW.jpg I did see your assumption, however I confirmed with AM Anderson that we can only use part of the logo as the icons on callouts and coupons 2. https://snipboard.io/rtbV6s.jpg The LR links have to be in a straight line under the footer. 3. https://snipboard.io/PFAMqh.jpg https://snipboard.io/hSpDFV.jpg Linked text can not be red.	1. I get that this is not preferable, but is this and actual rule written down in the rules somewhere and was this communicated to build? I do not recall hearing anything about this rule in any of our website meetings. 2. Can we get an FYI on this? Paul originally said ok to move those links and then changed his mind. My team didn't find out until 2/6. 3. Paul said we could use red hyperlinks if it's part of the brand colors as a last resort	Updated	Per Paul, the icons are fine...until he changes his mind. :) However, since there are other image errors, the score won't change. Updated other errors
1. https://snipboard.io/r6JEXF.jpg The last letter of the headline should be on the same line as the rest of the headline.	1. When I preview this in 1366 px, I do not see the same issue, "AC Services" is all on the same line, see my screenshot- https://snipboard.io/atQrsf.jpg	n/a	Since there are other errors in the font design section, updating this won't change the score.
MOBILE/TABLET: section not removed: .https://snipboard.io/H3UW0I.jpg	Invalid — CW doesn't check tablet or mobile. Even if valid, this seems like an excessively punitive category for template text.	Updated	It was made visible during build

1. https://snipboard.io/q59bHY.jpg Some of the icons are filled in and some are not. They have to be the same style for the whole site. 2. https://snipboard.io/ErPpBV.jpg The leak detection page is under the Gas CAT. This image is of pipes that would apply for water leak detection.	1. There are only two different Hydro Jetting icons and the one chosen looks the best of the two and doesn't look out of place here. 2. Agreed, but most people don't know this because this is a more recent type of water line that most houses don't have, can we get an FYI for this, the designer added this image after a search for gas lines. Now they know these are water lines, not gas lines.	Updated	Agreed
https://snipboard.io/CO9cFA.jpg I saw your assumption however since they have different types of catering we should have the services list.	Invalid — Assumption was made. QA can disagree with assumption and request changes, but it's not an error.	Valid	An assumption isn't always exception from error. There are a variety of catering options in the pages. CW could have included Weddings, Reunions, Corporate Functions, etc in the drop down. This would give the business a heads up of what kind of event the request is for. https://snipboard.io/eOAZ4k.jpg
https://snipboard.io/j7yeRE.jpg Since this is an add on we should not make changes to any element on the site other than the add on pages.	Invalid — This should never have gotten this far with a location-based footer. CW changed it on my instruction.	Updated	I talked to Cordell about this one. In the future, an assumption as to why the footer was changed and that the AM asked them to do it would help avoid us thinking the change was made without reason.
Intro paragraph missing on the About page. https://snipboard.io/f8itMz.jpg	Invalid: Site written on 2/2/26 before instruction was given to put the About intro on the main About page. Previous to this update on 2/10, it was only required to be on the Additional Location pages.		Unable to locate this error on the form for this account.
First paragraphs on CAT pages weren't linked.	Invalid: I checked the first two CAT pages' first paragraphs and they were linked correctly on CW backup.	Valid	There is no link in the intro paragraph on the CW backup. https://snipboard.io/FmJjDR.jpg
The address in the footer, location landing page and location page are for the Springville location. https://snipboard.io/E2TCFA.jpg	Invalid: This was linked correctly on CW backup - one address is for Springville, UT and the other is for South Salt Lake, UT.	Updated	
The header reviews aren't showing the reviews widget, but a button to the reviews page. There isn't anything on the Q about having something like this, nor are there assumptions as to why this was done by CW. https://snipboard.io/idbHJk.jpg	Invalid: The Reviews widget was used in the hero, but because the client doesn't have 3+ Hibu Reviews, the star average rating doesn't show in the header. This is by intention and not something the CW adjusts. Confirmed with Kim and Greg during Hibu One call.	Valid	CW replaced the Reviews widget with a button. https://snipboard.io/a0BW7H.jpg
The location page does not show the phone number. https://snipboard.io/OlMan7.jpg https://snipboard.io/67pBtc.jpg	Invalid: At the template level, the location landing page only comes in with the address and the call/text button with the location details button under the address. CWs weren't instructed to add the phone number manually here.	Updated	Can you send that Yext info from Maggie to us? I don't think we got that update. We've always thought that CW hides/doesn't connect the content if it isn't available.
I saw your assumption about using the same yext info on both location pages, however I did confirm with AM Anderson that if the additional locations Yext info is not filled out that we have to hide that section on that locations page. https://snipboard.io/W4VJft.jpg	Invalid: This is opposite direction from what Maggie McCarty has told CW to leave it be. QAE can hide when it gets to them, but this isn't a CW error.		

Since this is a multilocation, we want the geo in the H1 to be the two cities they have locations in. https://snipboard.io/NPehgb.jpg https://snipboard.io/GVm2tz.jpg	Invalid: Even though they have two locations, this business is primarily service-area driven. They're more likely to come to their customers, since they tint windows for buildings, not cars. CW used the service area on the questionnaire which was, "Serving Milwaukee, Madison, and southern Wisconsin."	Updated	
They do not have the RCF set up for texting https://snipboard.io/ChK9oG.jpg https://snipboard.io/4uJisn.jpg	Invalid: On CW, I don't see the call/text popup anywhere. Was this added later, by build? CW backup has links to the request quote page only.	Updated	
They do not want to display a mobile number. https://snipboard.io/3ReAKZ.jpg https://snipboard.io/20KZn8.jpg	Invalid: On CW backup, the mobile number does not appear - only the main and alternate	Updated	Agreed - Happened during build
About page does not have the intro paragraph. https://snipboard.io/yf6mt4.jpg	Invalid: This site was written before the dispatch rolled out that all about pages need the intro paragraph.	Updated	
Are all links for buttons, images and text linked correctly?	Invalid: No feedback/comments for this deduction	Valid	The first line I see is "Home page - Learn More button under Plumbing Services was not linked to appropriate page", let us know if you see different, please.
Stanford, CT changed to Stamford, CT throughout site as that is the correct spelling per Google search https://snipboard.io/atTySl.jpg	Invalid: CWs follow the spelling on the questionnaire. Unless you're from the area, there's no reason to suspect that Stanford, CT is misspelled	Updated	Fair, did that myself until I visited. DSC ERROR. Note: Was 1-4 before.
Serving area info missing from the footer. https://snipboard.io/ivN1nA.jpg	Invalid - CW backup has the service area displayed properly: https://snipboard.io/PuDm2M.jpg	Updated	Agreed - Happened during build
CW: The Marine Care Management folder should be a CAT as there are multiple tier 1 pages on the site.	Invalid - instructions were unclear at time of site build since the rules did not explicitly say that having additional T1 pages means the CAT should not be a folder.	Updated	Agreed - Per the 12/11 dispatch. Instead of having a single Cat on the Home page, the Cat page can be turned into a folder instead.
Blog should be hidden at this point https://snipboard.io/vH1Z7g.jpg	Invalid - blog was not visible on CW backup.	Updated	Agreed - Happened during build
1. Pool Upgrades CAT page, Pool Repairs copyblock missing https://snipboard.io/nrkbFZ.jpg			
2. Start of Year Checklist page template text where FAQs should be so I guess the FAQs are missing https://snipboard.io/TXynhD.jpg	Invalid - these pages were added by Vendor Opt.	Updated	Agreed
Video widget: image URL is mistakenly in the video description place https://snipboard.io/Nd32f6.jpg	Invalid - not a error made by CW; CWs do not add image URLs.	Updated	Updated to Build error
FWR to CW: I believe there should be a content section for the pricing page on the homepage.	Invalid - pricing page is a T2 so it doesn't belong on the home page.	Updated	Agreed

home and some CAT pages: single copyblock should not span the whole page. it should either be half the page and balanced by an image or incorporated to make a row of three blocks https://snipboard.io/as4zeD.jpg https://snipboard.io/qMZurt.jpg https://snipboard.io/bHfhuT.jpg	Invalid - this is a build error; the copy blocks do not span the whole page on CW backup: https://snipboard.io/AF4nl9.jpg https://snipboard.io/OKepMT.jpg https://snipboard.io/tYZODL.jpg	Updated	Agreed. This is a build error
The geo in the header and the hero have to be in Yext to keep Google from flagging the site.	Invalid - The geo in the header and hero match on CW backup. https://snipboard.io/0ARQbc.jpg	Valid	The error is that it doesn't match what's in Yext. https://snipboard.io/5wHaVU.jpg https://snipboard.io/txU9CD.jpg
Page not in a CAT should not have the related services block. https://snipboard.io/wNICKX.jpg	Invalid - CW backup does not have a related services widget https://snipboard.io/dVgM7C.jpg	Updated	
Coupons: Are the coupons aligned and set-up correctly in the desktop and mobile view?	Invalid - no error found for this category.		This is marked as a build error. https://snipboard.io/gWfBmY.jpg
About page - missing introductory paragraph section https://snipboard.io/5kQDTo.jpg	Invalid - site was created on 2/2; before the 2/10 rule change.	Updated	
Fence Installation CAT page - Design of intro section and Why Choose doesn't match the Home page PBN#4 design https://snipboard.io/BiELlF.jpg			
Gate Automation CAT page - design of introductory section and Why Choose doesn't match the chosen PBN#4 design https://snipboard.io/rGU3dn.jpg	Can this be marked as feedback only? This was a weird content generator issue; Andrew Webber said the only reason it could have happened is if an error occurred and a failsafe kicked in.	Updated	We'll update it. Please remind the Lauren than an assumption for this issue would avoid the error being marked.
Gates CAT page - design of introductory section and Why Choose doesn't match the chosen PBN#4 design https://snipboard.io/1OnR9W.jpg			
The About intro can only be one paragraph long. https://snipboard.io/I05cmQ.jpg	Invalid - I can't find a rule in HOFO that says it can only be one paragraph, just that an intro paragraph is required. The example photos on page 135 of HOFO also show more than one paragraph.	Updated	We can mark this as feedback, but the screenshot in the HOFO is much shorter than this site. https://snipboard.io/lPKG61.jpg
About intro section can only be one paragraph long. https://snipboard.io/DiqZjt.jpg	Invalid - I can't find a rule in HOFO that says it can only be one paragraph, just that an intro paragraph is required. The example photos on page 135 of HOFO also show more than one paragraph.	Updated	We can mark this as feedback, but the screenshot in the HOFO is much shorter than this site. https://snipboard.io/lPKG61.jpg
27: There should not be social links shown on the site as the client did not provide any	Invalid: I'm not seeing any socials on the post-CW backup. https://my.websites.hibu.com/preview/6fa445e23ba4e7b285ecc61ea1efe047?device=desktop Also not seeing any history of CW adding social links in Yext entity history	Updated	

1. Holiday Lighting page shouldn't have Related Services menu https://snipboard.io/sCncFH.jpg	1: Invalid - the related services widget does not appear on CW backup.		1. Agreed
2. Contact: page imbalance due to contact form removal https://snipboard.io/KSTEG7.jpg	2: Invalid - The form was not removed on CW backup.	1. Updated	2. This is marked as a build error https://snipboard.io/dutTqk.jpg
KG: missing alt number	Invalid - this account does not have an RCF and no alternate phone number was provided on the Q.	Updated	
VIDEO: has voiceover. Summary s/b removed.	Invalid - CW copied over the existing video script and did not create a new script.	Valid	Correct. If there is a V/O, we don't use the summary anymore.
The intro About paragraph should only be one paragraph long. https://snipboard.io/rF5Bl9.jpg	Invalid - there is not a rule that says the about page intro can only be one paragraph.	Updated	We can mark this as feedback, but the screenshot in the HOFO is much shorter than this site. https://snipboard.io/IPkG61.jpg
Skin conditions page links led to 404 page.	Invalid - Skin Condition page link works on CW backup.	Updated	
Please cease using power words in the H1 work. "Professonal Pool Services" does not properly identify what this client does. They have advised on Q214437 that they are "Swimming Pool Contractors"	Q214437 refers to the local business category, and while that works as a homepage H1 in this case, there's no rule saying that's what the H1 always has to be, nor is there always a local business category available that accurately describes each business. There is in this case, however, the business offers a full range of "[professional] pool services" - so the CW's H1 is also valid and accurate.	Valid	We haven't used power words in H1s for months. It's part of the reason the number of words required was reduced. For the Home page you can use any combination of services. Pool Maintenance and Installation covers it. The error doesn't say that you have to use that Q214437 as the H1. It merely gives an example of what can be used.
Contact page - "and surrounding areas" was not linked to Serving Area page per process https://snipboard.io/RoNbgm.jpg	Per the HOFO, only the footer "and surrounding areas" text is supposed to link to the PSAP page.	Updated	Fair
Contractor page should not have most of menu in Related Services https://snipboard.io/JiWz2p.jpg	Invalid: On post-CW backup, neither page has the related services menu (correct as these are both standalone T1 pages)	Updated	Agreed - Happened during build
3. Emergency Electric page should not have most of menu in Related Services https://snipboard.io/aEtyMF.jpg	https://my.websites.hibu.com/preview/f63e32d61ee44159542d5eb4952e0836?device=desktop		
54: One of the motivating factors was not connected to content so did not appear in the motivating factors section https://snipboard.io/irGvCL.jpg	This appears to be a Build error. All the motivating factors are filled out on the post-CW backup: https://my.websites.hibu.com/preview/8ddc5047139fb9d943e660391c799841?device=desktop	Updated	Agreed - Happened during build
https://snipboard.io/q9FNae.jpg Use universal line break or text editing to remove widow in callout CTA	Invalid: Upon reviewing the post-build backup, we confirmed that there was no widow text present in the CTA https://snipboard.io/rjRHKL.jpg		This is a Peer Review entry. https://snipboard.io/MOmtRb.jpg
https://snipboard.io/BqA8uG.jpg	Invalid : In the questioner There is a Call or Text request for RCF, and texting is also enabled in the RCF view.		
https://snipboard.io/bHzK8l.jpg The EM texting should be their mobile number instead of the RCF.	Based on this, the designer retained the same RCF number for both Call Us and Text Us. https://snipboard.io/y4ovf8.jpg , https://snipboard.io/qyelu6.jpg	NA	This was completed on 1/30. https://snipboard.io/hGfPHb.jpg

1. All headers: inconsistent button color https://snipboard.io/3vYbsS.jpg 2. Home: unbalanced copyblock row https://snipboard.io/GToPZX.jpg 3. Linked text needs to be a contrasting color	1. Build Backup shows the review section originally had star ratings and a numeric score. The button displayed after QA added the customer ID. 2. Can this be treated as Feedback? The designer added the image to maintain design consistency with the other CBs. now informed to add images to the entire column to balance. 3. Valid	Updated
--	--	---------

na	There is no error description for the below question they have marked as build error: Are the hero images clear and appropriate for the business	Please provide the question for this error
----	---	--

-Additional hours text isn't linked on locations pages. - Placeholder social media icons were left on site. -Header needs to be adjusted to match best practices for multilocations. -Hero section and callouts need to be updated as locations have two different numbers but the current buttons only reflect one location. These need to be replaced with contact us buttons. -Hid request CTA page and added forms to locations pages. -Locations page still just has the template/placeholder page. -The regular/linked section of the about page needs to be removed to follow best practices for multilocations, as the locations pages already have these sections. -The open/closed widget should be added as both locations seem to have the same hours. -The reviews page should be hidden as the reviews are on the locations pages. -Locations buttons in footer led to contact page. -Both get directions buttons on location pages led to NJ address. -Send us a message button on Cedar Rapids page led to form on Marion page.	Header updates (per multilocation best practices) and CTA button changes are CW tasks; the request form is not a build responsibility. Error details are unclear, and the build score is at 93.55%.	Valid	Contact/Location page is marked as CW and Build Error: -Both get directions buttons on location pages led to NJ address.
--	--	-------	--

75: Directions should not have been displayed on the EM as the client's address is not visible on the site https://snipboard.io/FfGnav.jpg	Since the questionnaire specifies a requirement for a pinpoint map and directions, the designer has followed best practices and added the 'Get Directions' button within the Engagement menu. https://snipboard.io/Cg02Wl.jpg	Valid	There is a CW assumption indicating that they did not use the address on the site. https://snipboard.io/3onHCY.jpg
41: The Blog page should have been shown in the nav bar as it has been built https://snipboard.io/h0iAlb.jpg 47: Multiple of the CAT page buttons on the Home page were linked to unrelated service pages https://snipboard.io/YReKDx.jpg			
ICONS: missing: https://snipboard.io/i2Wybt.jpg ENG MENU: does not get shown on multi-location sites. INSTAGRAM GALLERIES: hibu sites do not support these. Section should not have been created.	1. Valid 2. Valid 3. Invalid: As per the recent update we have restarted the addition of Instagram gallery to the site upon request.		
74 - Build: The Reviews section was hidden from tablet and mobile views on all 3 location pages. – Braselton: https://snipboard.io/tGwO5T.jpg ; https://snipboard.io/2UgF0A.jpg Gainesville: https://snipboard.io/dCqa7B.jpg Dacula: https://snipboard.io/zlBYJt.jpg ; https://snipboard.io/y0Wolc.jpg	This appears to be a template-related issue rather than a build issue. Usually, if we want to hide something, we first check and hide on the desktop version - not on tablet or mobile. Can we take this as feedback?	Valid	Snip from questionnaire: https://snipboard.io/xoKDn0.jpg
42 - CW: About page format was not consistent with a multi location site. - https://snipboard.io/H9L02l.jpg			
1. Q212692 for logo "refer to URL" but logo used is not from URL. Please use logo from existing site https://ekdconstructionllc.com/ as that's not the same as the one that was used. Please adjust all logo locations include callouts and coupons. 2. navbar: Exterior Services is an extra link to Gallery page https://snipboard.io/6PHZyu.jpg 3. Home in wrong navbar position https://snipboard.io/5gq9lX.jpg	1. As per best practices, customer-supplied logos are given first preference. Accordingly, the designer used the logo from the provided assets that aligned with the questionnaire's NOB. 2. Valid 3. Valid	Updated	There is no assumption indicating that the existing logo wouldn't work. We can FYI it this time, but please include those notes in the future.

https://snipboard.io/gEojGr.jpg https://qaf-624.hibuwebsites.com/renaming-images Hero image does not follow our naming conventions. https://snipboard.io/Xf5QJ3.jpg Seasonal Maintenance has a bag over the HVAC this is not done in that service. https://snipboard.io/oAzHUD.jpg Button on the request form can not be the same color as the background color of the super hero block.	Renaming : Assuming, the new naming structure is to help with easier identification of images and it does not impact site SEO or functionality. Given this, could we consider such points as feedback rather than errors?	Valid	The naming conventions are hibu spec, so it's considered an error.
#78 Missing Assistant Banner https://snipboard.io/PegnX0.jpg	Adding the assistant banner to the site was a CW task. If they add it, in the build we design it and copy it across the other CAT pages.	Valid	There is a separate error for the CW's part in the missing banner.
AK: -2nd location map and address button led to NJ address.	Is this where we lost 4 points? Is this CW responsibility?	Valid	Build is responsible for the map widget and get directions button.
Geo in header and hero - changed "Castle Rock, CO" to "Castle Rock, CO Area" on all but local ranking optimized pages since it's a business that travels to its customers and questionnaire has "and surrounding areas"	Invalid: We just confirmed on 2/24 that writers are allowed to deviate from Yext enough to include "Area" - writer was following Dispatch instructions (most of CWs' previous interpretation) to add one city from Yext only.	Valid	QAE changed the geo in the header and hero to ADD "Area". Because this is a service based-business it should have been included by CW, but it wasn't. https://snipboard.io/uemXc.jpg
https://snipboard.io/WlgfmU.jpg The open/closed widget should be hidden since they have 24/7 emergency services.	Invalid: The company also has regular, M-F hours, which it's safe to assume is when they want people to visit them. The rule is that we hide the open/closed widget if the main/entire business hours are 24/7, NOT if they just offer emergency services in addition to having finite business hours.		There are other errors for this question, so the score won't change.
https://snipboard.io/rt9RHc.jpg There is an open/closed widget on the SAP. This should be hidden since they offer 24/7 services.	This was an invalid FWR reason, as the business has regular hours when you can visit them, in addition to offering emergency services.		I don't see this error anywhere. See above.
Lymphedema Pumps for Boston, MA is incorrectly linked to Health Care Solutions Home page.	Checked post-CW and even post-Build backups, and I cannot figure out what this is referring to. Link on contact page to the geo is correct, the links ON the page are correct, and the connected data elements on the page are also correct.	Updated	Must have been some tech glitch.
https://snipboard.io/D7idQT.jpg The first H3 on a SAP has to have the KW in it.	Invalid: I read through the SAPs section of the HOFO, and can't find any rules about this. I only know of the H1 needing to be the exact keyword, not the H3. In this case, adding "Companies" would have made the H3 pretty nonsensical. If there is a rule about this, can you please point me to it?	Updated	
Geo in header and hero - "Hanover, MA" changed to "Hanover, MA Area" as the business travels to its customers and the serving area listed on questionnaire includes "and the South Shore" https://snipboard.io/2EZyBq.jpg	Invalid: We just confirmed on 2/24 that writers are allowed to deviate from Yext enough to include "Area" - writer was following Dispatch instructions (most of CWs' previous interpretation) to add one city from Yext only.	Valid	QAE changed the geo in the header and hero to ADD "Area". Because this is a service based-business it should have been included by CW, but it wasn't. https://snipboard.io/kqUt3C.jpg

Superhero form name "Request Quote" should be changed to "Request a Quote" per guidelines https://snipboard.io/iRH8Dv.jpg	Invalid: It is not required to add a/an to the hero form title; "Request Quote" is acceptable.	Updated	
Contact page - "and surrounding areas" not linked to Serving Area page per process https://snipboard.io/o8vUNV.jpg	Invalid: This is not the correct process. This text is only required to be linked in the footer, not on the contact page.		There is no error marked for the Contact page
Gallery page was built and added to navigation, but was not changed from draft to stage to publish https://snipboard.io/n2NrKM.jpg Blog page - blog posts were added from current site, but the page is still hidden navigation and at draft https://snipboard.io/k2qKV4.jpg	Invalid: These were Build errors. CW did not touch gallery or blog as we are no longer supposed to		These are marked as build errors https://snipboard.io/XiDbT2.jpg
Form title on the SAP pages was not updated as requested https://snipboard.io/NzuxGf.jpg Form title should match what is injected in website - Request a Quote	Invalid: It was not necessary to FWR for this change in the first place. "Request Quote" has always been acceptable.	Updated	
Motivating factors: Are motivating factors consistent with the questionnaire?	Invalid — No errors reported for this category.	Updated	
Header lead-in text should not exceed geo content https://snipboard.io/xsUm5Y.jpg	Invalid — This is fine in the CW backup. https://snipboard.io/ygKzCw.jpg	Updated	
PORTFOLIO: hidden on mobile/tablet.	Invalid — These are all Build errors.	Updated	
Video Summary - since the client has an existing video, replaced video summary to match the current site per best practice as the current video is not a voice-over https://snipboard.io/kFv7uG.jpg	Invalid — This process is still unclear.	Valid	If there is an existing summary, it can be included as long as the existing video does not have a voiceover. If there is a voiceover, the summary should be left blank.
VIDEO: existing video has voiceover. Summary s/b removed.	Invalid — This process is still unclear.	Valid	If there is an existing summary, it can be included as long as the existing video does not have a voiceover. If there is a voiceover, the summary should be left blank.
https://snipboard.io/5eBUDt.jpg https://snipboard.io/3tYibA.jpg The no CTA header should not have phone lead in text.	Invalid: If this was anything but "call or text" I would agree. However, the header is one of the few places where "call or text" is allowed and also required as a CTA. The Dispatch telling us where to use "call or text" doesn't give exceptions for "unless you have to use the no CTA header" so it makes sense to still use it; plus, this is the only way Desktop users will know they can text the client.	Updated	
Was the content used in the site per questionnaire instructions?	Nothing from questionnaire was missing on the site	Updated	
Motivating Factors - per SQOT guidelines, "Estimates Within Two Business Days" changed to "Satisfaction Guaranteed"	Invalid: I've seen the exact opposite deduction. Anyone can say "satisfaction guaranteed," but there are no specifics. Estimates within two business days is also SQOT, is clearer and specific, and it is a valid choice here.	Updated	Agreed - should have been left as is
Contact page - thin hero "Additional Areas Served" changed to "Areas Served" per best practice https://snipboard.io/0PESjY.jpg	Invalid: "Additional Areas Served" is what comes into the templates. Areas Served is to be used for the nav, which it was.		No error marked for this.

22 - CW: Wrong RCF number on the hero, header, and footer. Listings provision number needs to be used. https://snipboard.io/Uwi7j.jpg https://snipboard.io/o9MeT8.jpg https://snipboard.io/l7zUlv.jpg https://snipboard.io/uJDMlc.jpg	Invalid: CW used the provisioned RCF number for listings: https://my.websites.hibu.com/preview/c71d82d571c708a68ffab0da36a2fd8b?device=desktop https://snipboard.io/QuYvqK.jpg	Updated	
42 - CW: Open/Close widget wasn't there. This location does products and services. https://snipboard.io/FibLm1.jpg	The rule for whether to use the widget isn't about whether the business offers products or not. It's about whether they are primarily service-based or location-based. While they do display their address on the contact page, most of their pages describe services where they would have to come to the customer. Therefore the CW's choice to present them primarily as a service business makes sense.	Valid	If they have a brick and mortar location that offers products (like a greenhouse/garden center/mulch pickup) with business hours, the widget should be shown.
31: Video splash missing Name. https://snipboard.io/HUc5m1.jpg	Invalid: CWs are not told to add the name for upsell sites with an existing video.	Updated	If there is an existing summary, it can be included as long as the existing video does not have a voiceover. If there is a voiceover, the summary should be left blank.
47: Home Specials link redirects back to Home. https://snipboard.io/sWewby.jpg	Invalid: on post-CW backup, it links to the coupons page. https://my.websites.hibu.com/preview/a0f6c7429dace004fd323221550df3d9?device=desktop	Updated	
Callouts/Coupons - Call or Text button doesn't work properly, changed the button to click-to-call phone number per best practice .https://snipboard.io/Ho6PWT.jpg	Invalid — Per the 2/11 HOFO, Call or Text was appropriate for callouts. https://snipboard.io/IOfQ6q.jpg Kim has corrected this in the latest HOFO to bring it in line with the dispatch. Not working is a technical glitch. This did work when the CW tested it in one Preview mode, but it didn't work in the Preview mode the QA used.	Updated	
CALLOUTS/OFFERS: do not take you to the call/text pop. When clicked, it takes you to the footer.	Invalid — Technical glitch. This did work when the CW tested it in one Preview mode, but it didn't work in the Preview mode the QA used.	Updated	
70 - Build: The H3 font color was white, meaning it didn't show up on white backgrounds. - https://snipboard.io/qgCrPn.jpg; https://snipboard.io/ZPg4uY.jpg	Can this be treated as technical issue? Upon checking, the H3 fonts are set to black. Unsure as to why in the Geo pages, it was white since the only update Build did for the page is the hero image. https://my.websites.hibu.com/preview/c866bc429ed5b6ebb00038f1de3544d8?device=desktop	Updated	

1. Home page - changed Learn More buttons to be left-aligned on mobile per guidelines and consistency https://snipboard.io/Yr5t8J.jpg 2. Changed linked text color to Google blue as the theme blue is too similar to the font color https://snipboard.io/rzyGY4.jpg 3. Call or Text Pop Up - adjusted pop-up size so the close icon shows in mobile https://snipboard.io/XBqphP.jpg	1. This is how we received the template button alignment is and we were advised to keep it as is. https://snipboard.io/dlwVTt.jpg 2. Can we treat this as feedback? The blue color is used for website color consistency. It is still visible as a link, although we agree that Google blue works better in this scenario. The color appeared too distinct when viewed side by side—see the nav and thin hero color. https://snipboard.io/VsT8rW.jpg 3. The issue here is the scroller in the preview mode. This scroller is not present in the actual mobile device. https://snipboard.io/Eoz3j9.jpg	Updated	
2. Acute Illness page - The hero image does not properly represent this subject matter (https://snipboard.io/Tyi2Uk.jpg). The image indicates pain, not an illness. FWR to Build - Please swap with stock image that represents flu-like symptoms.	2. May this be treated as feedback? This is an AI image collector selected image that Build assumed was related for the skin rashes services. https://snipboard.io/SFPe4X.jpg	Valid	That one is definitely troubling pain, and though the rash is mentioned in a bullet, the page is accurate illness. I think it is a miss. Any sick human, person getting treatment for something other than obvious pain, win
66: https://snipboard.io/y81gSa.jpg https://snipboard.io/kOnzl1.jpg https://snipboard.io/Upd280.jpg https://snipboard.io/1eicOQ.jpg See Hibu One image naming practices: https://qaf-624.hibuwebsites.com/renaming-images	These are AI image collector generated images. Process does not require Build to update file names for these images.	Updated	Fair, word has been spread thanks to your email!
63: https://snipboard.io/TGb582.jpg Jewelry Appraisals hero image doesn't fit Hibu One image minimums of 1920 px. 66: Images need to follow standard naming conventions. https://snipboard.io/qHBJVP.jpg	63. Build used the in-editor cropping tool to achieve the required image focus for the section. During this process, it was not apparent that the image had been reduced to its current size, as it did not appear low-resolution after cropping. Since the image was sourced from the image library and displays clearly in the hero section, could this be considered feedback? https://snipboard.io/TGb582.jpg 66. These are AI image collector generated images. Process does not require Build to update file names for these images. https://snipboard.io/qHBJVP.jpg	Updated	Fair, let's lock that down going forward, though.

63: Pool Spa Resurfacing hero image doesn't meet Hibu One hero image minimums. https://snipboard.io/VvSAfs.jpg Same with Pool Resurfacing SAP. https://snipboard.io/2b6Hfa.jpg 66: See 624 Image Renaming page. https://snipboard.io/IZQMEN.jpg	63. Build used the in-editor cropping tool to achieve the required image focus for the section. During this process, it was not apparent that the image had been reduced to its current size, as it did not appear low-resolution after cropping. Since the image was sourced from the image library and displays clearly in the hero section, could this be considered feedback? https://snipboard.io/hY9kVv.jpg 66. The hero image used is AI-injected photo, therefore the file naming for the hero image is not changed.	Updated	Fair. Probably worth a message to the floor.
63: Window Installation hero image not at Hibu One image minimums. https://snipboard.io/vGQEdA.jpg 66: Gutter Installation, Bathroom Remodeling, and Roof Repair hero images need to follow Image Naming Conventions, see 624: https://qaf-624.hibuwebsites.com/renaming-images https://snipboard.io/N6YFsJ.jpg https://snipboard.io/ksHOGJ.jpg https://snipboard.io/xLfEYW.jpg	63. Build used the in-editor cropping tool to achieve the required image focus for the section. During this process, it was not apparent that the image had been reduced to its current size, as it did not appear low-resolution after cropping. Since the image was sourced from the image library and displays clearly in the hero section, could this be considered feedback? https://snipboard.io/MuG6B0.jpg https://my.websites.hibu.com/site/a1d3796312f15db15b60753496d7cc80/window-installation?preview=true&insitepreview=true&dm_device=desktop 66. These are AI image collection generated images. Process does not require Build to update file names for these images. https://snipboard.io/ksHOGJ.jpg https://snipboard.io/xLfEYW.jpg https://snipboard.io/N6YFsJ.jpg	Updated	Fair
ENG MENU: texting is not an option.	A mobile number is present and is allowed by the client to be used for the texting feature per the questionnaire. https://snipboard.io/x9XMr6.jpg https://hibu--c.vf.force.com/apex/HibuVFPageContentOutput?id=50OVN00000IYEtWYAW&ObjectType=case	Updated	Fair
https://snipboard.io/TyWUEn.jpg While the icon does represent violence we want the icon to represent the service being provided. Which in this case is the legal support after the violence.	Requesting to be treated as feedback. The icon used directly matched the heading. The heading "Domestic Violence" is also difficult to select a positive icon for; even using Google to search for a positive icon resulted in mostly negative-looking icons. https://snipboard.io/Yln3Mh.jpg	Updated	fair
55: Review button in header not linked to collection. https://snipboard.io/YIUhvo.jpg	Invalid - not a error by CW; CWs do not handle reviews and the button works on CW backup.	Follow Up	Record issue, but I agree. Will work on.
Pool Opening/Pool Closing fields on the All-inclusive Maintenance tab both presented H3 work stating "Pool Closing"	Invalid - the H3s on CW backup are Pool Opening and Pool Closing.	Updated	Agreed

54: Replaced warranty w/ discounts MoFac for SQOT (offers).	Invalid - warranty speaks to quality which is higher than offers in SQOT.	Updated	I'll call it a draw. warranties are even when they have detail, inferior when just "warranties" Also, you can add 4! WE just don't usually get that many good ones.
57. Snow "Cleaning" page s/b Snow Clearing page, this was listed on questionnaire and page review as snow cleaning but assuming it was a typo. FWR to change the page name, page url, H1 and headings, page content as necessary, related links, FAQs, as well as the paragraph and heading on Snow Removal CAT page.	Invalid - per Google, snow cleaning and lot cleaning are both acceptable terms.	Updated	Snow cleaning did sound insane to me, like who is out in these streets cleaning snow, but I googled and it is a name for snow removal! I guess "clean up" is the idea. You win.
Similarly with the Lot Cleaning page s/b Lot Clearing, was incorrect on questionnaire, please make all necessary changes to headings, url, page name, H1, page content as needed, related links, FAQs, paragraph and heading on the Landscaping CAT page			
Is the AI generated copy organized logically and easy to read?	Invalid - no error noted for this category.	Updated	fair
Since they have a physical location and the actual geo was used on the header, hero, and footer, open/close widget should be on the hero. https://snipboard.io/93Ve2d.jpg	Invalid - although they indicated clients can visit their location, this business primarily visits its customers for services. Since it's service-based, no open hours widget should be used.	Updated	Smart, fair
40: SAP product has 33, only 31 on page – missing Hanover and Pembroke. https://snipboard.io/ixqHG6.jpg https://snipboard.io/mbWoN2.jpg	Invalid: SAP Cities come into HWP dynamically, we have never been told we have to check them or not trust what is automatically coming into HWP. It is more likely that the client needed to change the list after the order was placed.	Updated	This might be a thing some day, for now,m we wait. No problems.
https://snipboard.io/YgVoPt.jpg https://snipboard.io/HzkWyT.jpg I saw your assumption however I did confirm with AM Anderson that is a request we have done in the past and if the client wants certain pages on the list we should follow that request.	Invalid: writers have often been told to build to spec and then let changes be made later via amends. Having done something in the past does not mean there is now a rule that we have to do it on new buids; CW made a valid choice with an assumption, especially when an AM told CW to do it this way. CWs need to be able to trust AMs' instructions. If QAE AMs have feedback that we need to be instructing CWs differently, please bring that info directly to us.	Valid	I don't think there is a "spec" for what needs to be included in the drop down for the form. The default is the services list, but it's not a requirement. Adding the requested services during initial build prevents the customer from having to make those amends. Directly violating a rule that has been decided and discussed like using a message field in the form would be against spec. If you have a list for "only these things in the drop down", please let me know where it is found so I can inform our team.
60 - CW: The About intro section was hidden on tablet and mobile views. - https://snipboard.io/DlUcsH.jpg	This is the first time I'm realizing that this section comes into the template hidden on mobile and tablet. (Pre-CW: https://my.websites.hibu.com/preview/3997914fa2c077d60e7612e6f0314d70?device=desktop) Checked a few other sites' backups and I'm not seeing this on all templates. I'm going to push to get this fixed at the template level, but can we FYI this for now? CWs don't know this is an issue they need to be checking for.	TBD	Agreed, but the record isn't showing. I will work on these

1. geo content, all pages, spelling "Gregg and Montgomery County" s/b "Counties" as it's more than one https://snipboard.io/KF10cG.jpg	The meaning is clear; marking "5 or more errors" for this seems unnecessary, especially after already deducting in the address category.	Valid	The header was because it didn't match the Hero Geo.
Call only option chosen on Q, mobile view still has Call/Text popup button. https://snipboard.io/zMYQ8m.jpg	I've seen this feedback under the "textable RCF" question more often; can we get it moved there, please?	Updated	Yep
Contact page - moved the name of the business h3 above the address https://snipboard.io/WJuNGB.jpg	Invalid: Build error. Post-CW backup has the NOB in the correct place. https://snipboard.io/Luxv8p.jpg	Updated	Fair
https://snipboard.io/JjNnxr.jpg 24/7 towing is one of the strongest SQAT Mofacs you can have, it needs to be represented in the hero. We could either add a 4th as per spec or replace Insurance, which is solid but weaker.	Invalid: CW chose good SQOT factors, and should have the discretion to do so. QAE's claim about towing needing to be in the hero is opinion, not a published rule.	Valid	24/7 towing for this kind of biz in invincible. None are terrible that have been added, but it does beat "works with insurance" as that is part of the gig. Adding 4 here is the easy win as all 4 are worthy.
https://snipboard.io/75ftOA.jpg The First H3 on a SAP has to have the KW in it.	Invalid: I read through the SAPs section of the HOFO, and can't find any rules about this. I only know of the H1 needing to be the exact keyword, not the H3. If this is now a rule, please point me to it	Updated	FYI, will confirm either way, I don't see it. either
FAQs on the site don't match what is on the questionnaire, starting with Q215852. https://snipboard.io/tmC6IN.jpg ; Updated FAQs on the site and in listings to match what was provided by the client, with revised answers on the website so the FAQs are not identical.	Invalid: CW used FAQs from questionnaire: https://my.websites.hibu.com/preview/0cb45369783ed0e4c4813bd99b49fc2?device=desktop	Updated	Something odd went down after CW, adjusted
https://snipboard.io/2cmj3M.jpg There should be an image block beside the intro paragraph on each individual location page. https://pixel-perfect.hibuwebsites.com/additional-locations	Can we FYI this? The image placeholder needs to be in the templates. It is not mentioned in the HOFO which is the main source CWs are instructed to follow.	Updated	FYI, and fair, but this one has been around for a bit.
Slogan wasn't included on site. .https://snipboard.io/P6Eilx.jpg .https://snipboard.io/EX6Wub.jpg	Invalid — Slogans have always been Build's responsibility. They may have been pulled out of the headers, but they were not assigned to Copywriters.	Follow up	Agreed, I don't see this record. Please 2x check the acct and email me? - JC
About paragraph was hidden on mobile and tablet.	Invalid — Copywriters don't check mobile and tablet settings.	Updated	This was admittedly a shock to us all earlier in the month, fair.
Review widget in header not connected to collection. .https://snipboard.io/lHOMwC.jpg	Invalid — Unclear how this is a headline or body copy error, and this button isn't a CW responsibility.	Updated	Will investigate with Product, section is questionable, FYI
.https://snipboard.io/HehWYM.jpg I did see you assumption, However I did confirm with AM Anderson that About intro paragraph needs to be an overview of the business.	Invalid — The business is the attorney, so the attorney bio is fine. There's no rule against this. Also, assumptions need to be taken in good faith and respected, not charged as errors if QA decides to change it.	Updated	Both sides are right. Assumptions do let us into your mind and need to buy a lot of grace, but they also have to make sense and aren't an excuse to break spec or be incorrect about policy. After all that, this one is solid, about this fella is about the biz if he is the main lawyer (unclear in my quick review).
Changed CTA button from click to call to call or text as number is a mobile.	Invalid — Call or Text is only for Listings, and does not work with Assistant. This was correct in the CW version.	Updated	Accurate!
.https://snipboard.io/rcSPDs.jpg Address is missing from the footer.	Invalid — Address is present in CW backup. https://snipboard.io/ExL8Vu.jpg	Updated	Agree

Request form page created when Q states they declined the option as client wants calls not forms.	Request form was declined in the request form section, but it was also added as a utility page under services/products - Q206106. CW should have left an assumption, since there was conflicting info, but it was requested on the site.	Would update, I can't pull this by either #. Please 2x check and email me for correction - JC	Conflicting info ith an assumption works for me.
https://snipboard.io/CVlc8t.jpg Vet services hero has an outdoor thermometer in it, instead of one that would be used for someone if sick.	This is meant to be a cute photo depicting a cartoonish idea of a dog getting treatment, not meant to be an accurate representation as this is not how you get a dog's temperature, we won't mention where the thermometer actually goes. :) I think this is cute marketing and shouldn't be an error.	Updated	I do see cold outside, but I also get it for "sick pup". Fair
EE: CTA buttons in hero were the same color as background. BJ: Hidden Pages	EE: I understand the error with the button background matching the header background, but should this be minus 2 points for image clarity?	Valid	That question seems like the best home for that, but i am open to convo if you see an option.
https://snipboard.io/Ubzh0P.jpg Since they are a place you visit directions should be on the EM.	I am confused about this one, Get Directions are on the EM and show up in the provided screenshot	Updated	Fair
-Call or text CTA button overlapped with H1 on homepage on mobile.	When I check the post build save, I don't see any overlap	Updated	Fair
FWR to CW: Discount mention is generic but can be added as coupon, please put in place of Free Estimates. .https://snipboard.io/l1EVaB.jpg .https://snipboard.io/a7hCcH.jpg	Invalid — This field can be a coupon or a callout.	Updated	I think the argument here is more quality of the callout opposed to "coupon v callout".
.https://snipboard.io/V5SjvK.jpg Since this is a voice over video there should not be a script.	Invalid — Where is this rule published?	Updated	To quote Cordell, we want to avoid writing anything that would contradict the current video. https://imgur.com/a/2tEDb2C
General Dentistry copyblocks still not in alphabetical order https://snipboard.io/WUAsNz.jpg	Invalid: Another user completed the FWR so this shouldn't count against Alan.	Updated	His name is on the build case, so if it needs to go to another user, we need to know who.
Footer linked to home. https://imgur.com/a/zCKom4D	Invalid: Checked CW backup - links to Contact page. QAE screenshot throws an error.	Valid	The footer isn't linked at all in the Post CW backup. https://snipboard.io/loFynk.jpg
Vehicle Wraps SAP – context error. H3 and body text should not refer to business as residing IN any of the service areas. Professional Vehicle Wraps in When choosing a vehicle wrap provider in SAME error with Wall Graphics SAP Enhance Your Space With Wall Graphics in	Invalid — This is not a published rule. If the intent is for the SAPs to say something differnet, then there needs to be a rule requireing rewriting them and the AI output needs to be changed.	Valid	SAPs are for serving areas, which means there are likely no physical locations in the city. Per the Spec Site, content is to avoid using verbiage as if the business is in the city. https://snipboard.io/Aa4l3M.jpg
54: Replaced Warranties MoFac with Free Same-Day Estimates for SQOT (Time, Offers).	Warranties are also SQOT (offers, quality). CW hit the time factor with 24/7 emergency services, so was including more variety as we've been advised by QAE AMs, and should be allowed to make that decision without penalty. QA can swap mofacs at their discretion, but doing so does not mean the writer committed an error.	Valid	A warranty isn't really an offer because they apply to every customer. They also only apply to customers who have work completed. Not much up-front value. But if you're searching for a plumber and the first thing you see is that they can be at your home today for a free estimate, that's a pretty big motivator. It's helpful to put on a consumer hat when deciding on these. What would motivate you to pick this company?

.https://snipboard.io/HjmTy2.jpg FWR to CW: Correct SAPs, they s/b contact/keyword-service-area. .https://snipboard.io/ChzrqN.jpg	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expection to confirm your review the site and confirm that URL's are correct though, right?
.https://snipboard.io/Orzn68.jpg URL incorrect for SAP page. Please see Serving Area URL guidelines.	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expection to confirm your review the site and confirm that URL's are correct though, right?
Phone number not found in footer for second location https://snipboard.io/Qwy20x.jpg	Invalid: Post-clone CW backup shows phone number in footer for second location: https://snipboard.io/HlkwE2.jpg	Valid	I don't see it in the Post CW Footer for the Clone to Add site. https://snipboard.io/dHtOuF.jpg
Header and hero geo content needs a state with city https://snipboard.io/tdmz8R.jpg	Invalid: On pg 108 of the HOFO, it says, "If multiple areas are selected on the Q for the service area, select the one that encompasses most of the area" for the hero and meta service area. As long as this matches Yext, it's OK. This instance, the questionnaire listed 5 counties which are encompassed by the Philadelphia Area.	Valid	I think the error is that it should be Philadelphia, PA Area
Exhaust Manifold Repair page - changes to correct spacing issue https://snipboard.io/rTDJg2.jpg Diesel Exhaust System page - changes to correct spacing issue https://snipboard.io/vC2bNL.jpg Dual Exhaust Installation page - changes to correct spacing issue https://snipboard.io/IYRPZF.jpg; Pipe-Bending page - changes to text to correct spacing issue https://snipboard.io/m3zTyv.jpg	Invalid: Per the 10/27 Dispatch, the spacing shown is correct. https://snipboard.io/OPJqks.jpg	Valid	There is a carriage return that she adds that doesn't fit the mold, please check out that yellow line vs what she received.
SAP page errors. H3 work and body text should never refer to businesses as being located IN each area. They service them. "Professional Awning Services in"	Invalid - the H3 is not implying the business is located in the area; it's implying you can get professional awning services in that area. No body copy indicates that business is physically located in the service area.	Updated	The Spec Site indicates that the language not include implications of a physical presence and gives suggestions for not using location-based language. Even with good intentions, using "in Geo" can be confusing. https://snipboard.io/le7GgV.jpg
40: FWR: GEOs aren't showing up on the left-side navigation, please add as links. https://snipboard.io/jQpBhx.jpg	Something extra strange happened at the Build step - the Geos somehow disappeared from the left side (in-editor navigation). Pages were still accessible via contact page. CW could not resolve this on her own and filed an IT ticket to have the pages returned to left side of HWP editor. Post-CW: https://snipboard.io/WDqyo5.jpg Post Build: https://snipboard.io/VJ4xny.jpg	Updated	Agree. This is a weird Build thing.
Header: lead-in text should not exceed phone number https://snipboard.io/4prFT8.jpg	Invalid: On post-CW backup, it doesn't. https://snipboard.io/dLVmqR.jpg	Updated	Agreed
47: Pipe Replacement link on Drains and Pipes CAT repeats twice in same row. https://snipboard.io/ezdGyR.jpg	Invalid: Not so on post-CW backup: https://my.websites.hibu.com/preview/8efd942f3b7855f8d8c8705b669032f9?device=desktop	Updated	Agreed - Build error

54: Replaced Workmanship MoFac with Discounts for SQOT (offers).	Invalid - workmanship speaks to quality which is higher than offers in SQOT.	Valid	Discounts are one of the most valuable mo-facs as it gives a solid incentive for using the business. Workmanship is relative. The business may think it's detailed, but others may not. It's helpful to put on a consumer hat when deciding on these. What would motivate you to pick this company?
55: Review header not connected to collection. https://snipboard.io/gZsife.jpg	Invalid - CWs do not set up reviews widgets; the button brings up the popup on CW backup.	Updated	Agreed
40: Duplicate Gallery anchors. https://snipboard.io/UKD3d9.jpg	Invalid - CWs do not edit galleries; anchors should be used or removed by build.	Updated	Agreed
60: Holiday hours weren't placed correctly onto Contact page. https://snipboard.io/C0AoKc.jpg	Invalid - CW backup has the holiday hours https://snipboard.io/V0fmZW.jpg	Updated	Agreed - Happened during Build
Banquet events CAT: -Lunch banquet menu button led to 404 page.	Invalid - Lunch Banquet Menu button led to the correct page on CW backup.	Updated	Could not duplicate
20: FWR to CW: NOB proliferated throughout with an extra hyphen in the name. Corrected on SEO and in Business Info but please correct throughout body of site. https://snipboard.io/st7V4f.jpg https://snipboard.io/sdhWko.jpg	Invalid - this is a DSC error; CW used what was provided on the questionnaire.	Updated	
56: Texting on the RCF wasn't requested on the Q but there is a Call or Text button on the mobile view. https://snipboard.io/H7jdlb.jpg https://snipboard.io/HZJcMi.jpg	Invalid - CWs follow RCF view; if texting is enabled, Call or Text is included. https://snipboard.io/dzQXsX.jpg	Updated	
40: No form fill request, page s/b hidden. https://snipboard.io/WiKScs.jpg	Invalid - request form page is hidden on CW backup.	Updated	
Locations page is missing CTA buttons leading to form anchors.	Invalid - CW followed the template and the anchor buttons appear on all location pages.	Updated	
CTA buttons weren't added to locations page and linked to form anchors or individual location pages as requested.	Invalid - the individual location pages have the request form anchor buttons; the locations landing page did not come delivered with secondary buttons and CW just followed the template. The pixel perfect shows "schedule service" buttons but it doesn't seem that the actual templates deliver this button.	Updated	
Mobile CTA: Changed click to call to call or text as phone number is mobile.	Invalid - client doesn't have RCF with texting enabled and it is not indicated anywhere that they want texting.	Updated	
footer address should not have "and surrounding areas" https://snipboard.io/hRgEdC.jpg	Invalid - the site has SAPs so the 'and surrounding areas' should be linked in the footer.	Updated	
Do the headlines and body copy follow the writing style guidelines and best practices?	Invalid - no error noted for this category.	Updated	
22: Call/Text number on header does not match listings RCF #. https://snipboard.io/cqMfpF.jpg https://snipboard.io/lmjMAp.jpg	Invalid - CW backup has the correct phone number in header: https://snipboard.io/3WYXCK.jpg	Updated	I think Yext needed synced before QAE got it.
Address not in footer, this is a business that provides services at their location.	Valid, but shouldn't this be in "Footer: Is the footer set up correctly on all views: desktop, tablet and mobile"?	Updated	

50 - CW: SAP URLs were incorrect. - https://snipboard.io/WLnQ1u.jpg	Invalid - this is a known error; URLs are not coming in properly.	Valid	Right, but CW should have checked them before moving them forward.
URLs were missing "contact/"	Invalid - this is a known error; URLs are not coming in properly.	Valid	Right, but CW should have checked them before moving them forward.
41: https://snipboard.io/VYP1j8.jpg CCA signed but blog posts were not imported. https://snipboard.io/UXGAoE.jpg	Invalid - CWs do not do anything with the blog.	Updated	
The questionnaire has a different zip code then what shows in Yext. https://snipboard.io/eqDop4.jpg https://snipboard.io/yfP0uM.jpg	Invalid - the questionnaire zip code seems like a typo and CW followed Yext zip code which appears to be correct for the address. The 60110 zip code is for Carpentersville, IL and the business is physically located in Addison.	Updated	Agreed. An assumption for the updated zip code would avoid the error and need for a rebuttal.
50 - CW: All SAP URLs were incorrect. - https://snipboard.io/Xm01uh.jpg	Invalid - this is a known error; URLs are not coming in properly.	Valid	Right, but CW should have checked them before moving them forward.
31: No name on Video Splash. https://snipboard.io/l2dyDp.jpg	There appears to be a duplicate QAE entry for this site on the same date: https://snipboard.io/5u4CGW.jpg	Updated	
55: https://snipboard.io/rvdHGS.jpg Review button not connected to collection.	Invalid: the review button should go to the Hibu Reviews widget; it doesn't go to a collection, and CWs do not change where it goes. This looks and functions as normal in post-CW backup. https://my.websites.hibu.com/preview/fc3222fc540e9e736ca32eb84f5c7fd6?device=desktop	Updated	
22: Call & Text option preferred and is enabled on RCF. https://snipboard.io/7Kecd8.jpg https://snipboard.io/oGIXQO.jpg https://snipboard.io/rktZW8.jpg	I normally see this in the "textable RCF" category; since actual phone numbers are accurate, can we move this there, please?	Updated	
27: Social icons only have placeholders. Links weren't entered. https://snipboard.io/oW5Tpl.jpg	Invalid: Only a FB link was provided, and it is present on post-CW backup: https://my.websites.hibu.com/preview/90742a92721f2db8bcf879f318f90ffa?device=desktop	Updated	
SAP page refer to the business as being IN the SAP area. The verbiage should reflect "Serving" "Available to" or "for" vs advising business is in the service area SAP.	Invalid: The only city mentions on the SAP say that "NOB provides outstanding paving services in City, ST and nearby areas" and "has built a strong reputation for quality paving in City and Central New York." The language on the SAP does not claim that any of these places is the location of the business. It is only saying that the business *provides services in* those cities, which is true.	Updated	
https://snipboard.io/7xwiAV.jpg This is a callout not a coupon.	Invalid: per Paul, we can use both callouts and coupons in that area.	Updated	
https://snipboard.io/A1Kh9z.jpg This is a callout not a coupon.	Invalid: per Paul, we can use both callouts and coupons in that area.	Updated	
60: Removed now expired New Year's Coupon mentions from About blurb. https://snipboard.io/ykTFQA.jpg This coupon is mentioned on other pages. https://snipboard.io/xvOGnJ.jpg	Invalid: The promo was requested on the Q with no mention of an expiration.	Updated	

Header geo: incomplete, needs to remove "the" https://snipboard.io/VrjtWA.jpg	This seems like more of a single grammar error. Actual Geo was accurate. Can we change the category please?	Valid	This question encompasses the header and service area being accurate, so it's the right question.
REQUESTS: email submissions should go to mindyabou33@gmail.com: Q214787	Invalid: no screenshot showing an incorrect email address. Do we have access to any history/changelog in client dashboard (where form email destination is set)?	Updated	
Their address isn't displayed. -As it's service based, geos should be "in," not "near," on SAPs.	Invalid: It's not wrong to say they serve areas "near" the City, ST. Some of the language on SAPs indicates that it's talking about where the business is located ("is your go-to paving company [near] Dudley, MA"), so we have advised writers that swapping "near" for "in" is a safe option in those cases, as leaving it as-is is what we are told would cause problems with Google and users.	Updated	
22: No alt number listed on Contact page. https://snipboard.io/6HMiuK.jpg	Invalid: Duplicate QAE submission. https://snipboard.io/ZreWaG.jpg , https://snipboard.io/YDV1g9.jpg		Removed the dupe submission
videoscript from existing site should have been copied to new site https://snipboard.io/t5juYw.jpg	Invalid: This is not a CW responsibility. CW removed the placeholder text as we are supposed to do.	Updated	
2. as per CW assumption: Q215047 best practice for "A+ rating from BBB for over 15 years" is to only mention "Better Business Bureau" without mentioning rating. easiest option is add it to Listings Associations	Invalid: We have always told writers it's just as valid and safe to avoid mentioning BBB altogether. Associations implies they have some sort of affiliation beyond a rating, which we don't know. Any business can have a BBB rating without any involvement on the part of the business - further affiliation with them is not required for a rating.	Updated	
Breadcrumbs on Mobile need to be reviewed/corrected. Auto Detailing Service page, etc. do not reflect pages in breadcrumbs. They state "Home"	This is a Build error where the "> Page Name" part of breadcrumbs is present but not visible. See https://snipboard.io/tNbxWv.jpg - when mobile breadcrumbs are highlighted, the page name is visible. Breadcrumbs are normal on mobile view of post-CW backup.	Updated	
Is the AI generated copy organized logically and easy to read?	Invalid: No errors reported for this category.	Updated	
Does the navigation follow best practices for the page order?	Invalid — No copywriter errors reported for this category.	Updated	
Ottawa KS request form directed to Lawrence KS	Invalid — CW doesn't set form destinations.	Valid	The request button on the Ottawa, KS location page links to the form on the Lawrence, KS location page. CW sets up the additional location pages. https://snipboard.io/2rEWws.jpg
Social links weren't added, LinkedIn s/b removed. https://snipboard.io/Yf12We.jpg	Invalid — Socials are present and linked in the CW backup. LinkedIn is not present. https://snipboard.io/6AqEB0.jpg https://snipboard.io/9tjnSX.jpg	Updated	

The serving area in the header was spelled incorrectly- should be Bonneville, not Boonville .https://snipboard.io/9pFTX3.jpg	Invalid — Questionnaire consistently calls this Bonneville. https://snipboard.io/xWb57L.jpg	Valid	I think you're agreeing with me. The header geo is spelled wrong.
Placeholder text on Gallery link. .https://snipboard.io/AWDpef.jpg	Invalid — CW does not know if there will be a gallery or not. Gallery elements are Build's responsibility.	Updated	
site has 4 CATS. Recent hibu one doc indicates 3 or more CATS should have mega menu.	Invalid — Copywriters have discretion on whether a mega menu is needed if everything fits neatly in the nav.	Valid	They do have discretion to avoid a mega menu if there is space for all of the CATs to be on the Navigation. But trying to fit this many pages into the main navigation makes it crowded at 1366 https://snipboard.io/Zn3TBW.jpg
FORMS; are supposed to be linked to Laura@mycosystemsinc.com.	Invalid — Form email addresses are set in the dashboard now, not by CW.	Updated	
HERO FORMS: POST FWR: have not been connected to correct email address.	Invalid — Form email addresses are set in the dashboard now, not by CW.	Updated	
.https://snipboard.io/ykOldr.jpg This is a callout it should not be in the coupon section.	Invalid — This is not an exclusive coupon section. It can have a callout in it.	Updated	
Blog posts weren't imported. https://snipboard.io/mQFuP0.jpg https://snipboard.io/yAwadU.jpg	Invalid: This is not a CW error - all blog posts are imported by Build.	Updated	
No QAE feedback provided for the "Motivating Factors" category	Invalid: The "Copy Section" notes has "NA" on the QAE feedback. No errors noted.	Updated	
FWR to CW: -The Dayton location is syncing to the Lima number even though I corrected the number. Can you fix this.	CWs don't have a way to verify what the phone number should be for additional locations. I'm looking at Yext entity history, and I can see that the CW didn't change the phone number for this location - this is a DSC responsibility. We are told to trust what comes into Yext for additional locations and to assume Yext is correct.	Updated	CW should be able to tell if the number is correct by testing the linking on the phone number itself. If it links to a different number, then it should be able to be seen. Since I can't recreate the error, I'll update it. https://snipboard.io/JvMdx.jpg
Are all the locations other than Sidney supposed to say 9-5? It looks like on their site, all locations are 8-5.	Invalid: CWs have no way to check the business hours anywhere except Yext, and we are not expected to look to outside sources such as external websites to fill in additional locations' hours, as those are often out-of-date. HOFO does not mention what to do if hours are not filled out, but does say to use the info from the primary location for other Yext elements: https://snipboard.io/MF5QVU.jpg	Updated	
1. Staff images not necessary on Contact page as they're already on About page 2. Home: Click Here button links to homepage https://snipboard.io/93SDq5.jpg but there aren't more videos so it should be removed	Both are build errors. Neither issue appears on post-CW backup: https://my.websites.hibu.com/preview/7105699bb0f48f22b7b9bfc61b0d9b2f?device=desktop	Updated	1. Updated 2. This is marked as a build error
About page spelling "Family-Owned-Business" s/b "Family-Owned Business"	Invalid: This phrase does not appear on about page of post-CW backup: https://my.websites.hibu.com/preview/7105699bb0f48f22b7b9bfc61b0d9b2f?device=desktop	Updated	

1. Unused gallery anchors should not appear on navbar https://snipboard.io/RuKlal.jpg 2. Imported blog should be visible on navbar https://snipboard.io/poRfFP.jpg	Invalid: CWs have recently, repeatedly been told not to touch any gallery elements. Build should be hiding these. CWs never touch blog elements.	Updated	
60: Generic buttons copy for Gallery link. https://snipboard.io/NnI54U.jpg	Invalid: Build is now responsible for all gallery sections - CWs are now told not to touch any gallery elements	Updated	
FWR to CW: https://snipboard.io/dQnNC5.jpg Hanging Basket text for first copy block doesn't have anything to do with said baskets.	Text in screenshot is about hanging baskets, as does the copy block leading to that page... unsure what text QA is saying is unrelated.	Updated	
65: Contact links on Nav Bar go to Home page. https://snipboard.io/T4HQXs.jpg	Invalid: Not the case on post-CW backup: https://snipboard.io/THKjAL.jpg	Updated	
FWR to CW: -FAQs missing from institutions and churches page.	Invalid - FAQs appear on CW's original backup; build or local ranking must have deleted.	Updated	Agreed - removed by build
Business Hours: Are business hours and federal holidays listed correctly?	Invalid - no notes for this category.	Updated	
47: Light Duty Towing not part of Local Rankings product. https://snipboard.io/5E1PMj.jpg	Invalid - this is not an error by CW; this was added by vendor opt.	Updated	
Generic Gallery copy that doesn't work for towing/roadside assistance company. https://snipboard.io/XfYDwQ.jpg https://snipboard.io/o4L3xC.jpg	Invalid - galleries are not handled by CW.	Updated	
54: Replaced Satisfaction Guarantee with Free Estimates for SQOT (Offers).	Invalid - satisfaction guarantee speaks to quality, which is a higher SQOT factor than offers.	Valid	The satisfaction guarantee only pertains to customers who have purchased their services. Free Estimates applies to everyone.
60: Generic placeholder text on Gallery page. https://snipboard.io/TBGhxU.jpg	Invalid - CWs do not handle CW; entirely a build task.	Updated	
FWR to CW: Form header isn't connected.	Invalid - system error - headline was connected in collections but it was not updating in HWP.	Valid	Since there was no assumption on this issue when CW completed their work, it would seem that the CW didn't catch it, so this is still an error.
Motivating factors in why choose us section: Should say "\$250 Off Chimney Repair": "\$250 Chimney Repair"	Invalid - the questionnaire Q219689 says \$250 chimney repair; it was not clear if it was a set price or should be a discount.	Updated	
55: Req H1 has placeholder text. https://snipboard.io/ILxuPY.jpg FWR to CW: Req form on heroes has placeholder text, please replace. https://snipboard.io/N6lY5s.jpg https://snipboard.io/3kUhN4.jpg	Invalid - headline was connected in collections on HWP backup but it was not updating in HWP.	Valid	Since there was no assumption on this issue when CW completed their work, it would seem that the CW didn't catch it, so this is still an error.
55: Request H1 has placeholder text. https://snipboard.io/7zhwFX.jpg	Invalid - headline was connected in collections on HWP backup but it was not updating in HWP.	Valid	Since there was no assumption on this issue when CW completed their work, it would seem that the CW didn't catch it, so this is still an error.
65: Gallery anchors on mega menu. https://snipboard.io/twQfHE.jpg	Invalid - CWs do not handle galleries; it is up to build to use or remove the anchors.	Updated	
33: https://snipboard.io/arzXZ2.jpg FWR to CW: Coupon is serving as Callout, please replace this with a sufficient Callout and have coupon below.	Invalid - it is fine to use an offer in the callout.	Updated	
47: "and surrounding areas" on Contact page just redirects to Home. https://snipboard.io/OqjIFX.jpg	Invalid - the text is not linked on CW backup and should not be since there are no SAPs.	Updated	

55: https://snipboard.io/coe10K.jpg Review button in header not connected to collection.	Invalid - CWs do not do anything with reviews.	Valid	The issue is that the button was disconnected from the header. The button comes into the template connected, but was not connected after CW. It comes in as the test reviews with stars, not the button. Pre CW: https://snipboard.io/3B1Eaj.jpg Post CW: https://snipboard.io/fW8jCn.jpg
1. Contact page: contact form should have been removed https://snipboard.io/03nfmU.jpg	Invalid - this is a build task.	Updated	
1. Contact page: duplicate and template content https://snipboard.io/03nfmU.jpg	Invalid - the thin hero is not duplicated on CW backup.	Updated	
56: Texting wasn't requested on the Q and CW indicated this in their assumptions, but the Call or Text button wasn't changed to just a call button on the mobile view. https://snipboard.io/nAMV7G.jpg https://snipboard.io/1SfUcH.jpg	Invalid - CWs follow RCF view regarding call or text, and texting was enabled to Call or Text was included on the site.	Updated	
60: Generic placeholder text on Gallery page. https://snipboard.io/83ulwp.jpg	Invalid - CWs do not handle Gallery pages; entirely a build task.	Updated	
Does the navigation follow best practices for the page order?	Invalid - no errors noted for CW.	Updated	
Assumption to use Towson, MD was incorrect. Baltimore Metro area was provided for the serving area and was a strong SEO option to use.	Invalid - the Q says "We'll use the location information from your Listings Dashboard in your header" and CW used what was provided for the service area in Q218325 per process.	Valid	While the Q says City, state, it lists multiple. And per the 12.22 Dispatch, the largest service area should be used, which is the Baltimore Metro Area. https://snipboard.io/uRZISn.jpg HOFO: https://snipboard.io/KOLq5X.jpg
Email: Is the email listed correctly?	Invalid - no notes for this category.	Updated	
40: Name of page s/b Show Cause for Contempt Proceedings. https://snipboard.io/TOEyNq.jpg	Invalid - the final approved (clean) page structure document has this page titled as Cause for Contempt Proceedings.	Updated	
SAP Geo is not connected. https://snipboard.io/4hlz7E.jpg	Invalid - all SAP geos were connected on CW backup.	Updated	Appears to have been disconnected during build
26: Social media links placeholders, FB should have been added. https://snipboard.io/RrYNTm.jpg https://snipboard.io/gn8hzH.jpg	Invalid - the facebook link is present (and leads to the client's page) on CW backup.	Updated	Appears to have been disconnected during build
54: Changed Free Estimates to Free Estimates Within 72 Hours for SQOT (Speed).	Invalid - this is not an error and it's not a rule that the timeframe must be included in the MF text.	Valid	The mo fac is the whole statement. If the customer supplied it, it should be included. https://snipboard.io/NFIX0n.jpg
1. Request Service is a custom form: as per request Q213648, please customize our request form to match this existing form https://peorialawn.com/request-service/	1. Request form fields correction is not part of Build's process.	Updated	
66: Brick Patio Installation hero image doesn't follow image naming conventions. https://snipboard.io/fqGHUd.jpg	File names of images from AI image collector does not need to be updated per our process. https://snipboard.io/fqGHUd.jpg	Updated	Agreed
27: Icons added without links. Facebook link should've been added. https://snipboard.io/VCFTGD.jpg https://snipboard.io/u4V8Xp.jpg	27. Adding the Facebook link is outside the scope of the build. This should be added through Listings Management.	Updated	Agreed - Social Icons are added by CW

https://snipboard.io/8WDwjc.jpg https://snipboard.io/wVJb7h.jpg All supplied images were not added to the gallery.	Images supplied are AI generated. We were advised to not use these images by Stephanie Kennedy per legal.	Updated	
https://snipboard.io/pk7J5r.jpg Roof deck installation has to do with part of the roof and not having a deck on the roof for entertaining. A good guideline is if the the site only does roofing they mean part of the roof. If they do roofing and decks it is possible they put decks on the roof for entertaining.	Requesting this to be treated as feedback. Build selected the image based on the hero H1 keyword, with the choice further supported by relevant Google search results. The team has been reminded of the difference. https://snipboard.io/kJMlAs.jpg https://snipboard.io/lX420D.jpg	Updated	
70: https://snipboard.io/n45OsY.jpg Font color on footer has low CCR. Same with text color on secondary buttons. https://snipboard.io/C7sNQM.jpg Same with Why Choose text color on this background. https://snipboard.io/kwvymI.jpg GEO is a different font color than hero text on every page. https://snipboard.io/u6tmjp.jpg https://snipboard.io/t7ZMKU.jpg https://snipboard.io/ErGXHJ.jpg	70. Color combination contrast ratio is 3.51. This is a passing contrast ratio per the update. https://snipboard.io/n45OsY.jpg Per Build's post backup, Geo text are colored white. This might be a bug in the system. https://snipboard.io/C4Ut9P.jpg https://my.websites.hibu.com/preview/8fb07b41696335988d0e8291fb783aff?device=desktop	Updated	Unable to recreate the Geo color differences. Must be a bug.
1. Contact pages: empty gallery sections https://snipboard.io/uNPYHh.jpg	Invalid: it is on build to fill these in or remove them. Writers no longer touch gallery elements.		This is marked as a build error
2. Navbar: unused gallery anchor should not be visible https://snipboard.io/OBr8gK.jpg https://snipboard.io/09vcLT.jpg	Invalid: Now Build's responsibility		
1. Locations: Request Appointment buttons 404 errors https://snipboard.io/m4YluB.jpg	Invalid: On post-CW backup, those buttons function as intended, scrolling to form on respective pages: https://my.websites.hibu.com/preview/d1e0c6c2f818b5baef2a93f603285c8c?device=desktop	Updated	Unable to recreate the issue
2. Navbar: unused request page should not be visible https://snipboard.io/02VsEw.jpg	Invalid: it's not there in the post-CW backup; must be a build error? https://my.websites.hibu.com/preview/d1e0c6c2f818b5baef2a93f603285c8c?device=desktop	Valid	It's there. https://snipboard.io/JquSiH.jpg
2. Navbar: unused gallery anchor should not be visible https://snipboard.io/OBr8gK.jpg https://snipboard.io/09vcLT.jpg	Invalid: Build error. CWs are told to stop doing anything with galleries	Updated	
40: Financing & Warranty Information is missing from the nav bar and isn't in the mega menu. https://snipboard.io/rbd7qw.jpg https://snipboard.io/Nk5Tbu.jpg https://snipboard.io/BAf67g.jpg	The page was created and was present in the (mobile/tablet) nav on post-CW backup; it was omitted only from the mega menu. Therefore, can we move this deduction to "navigation best practices"?	Updated	
59: FAQs for the Brick Driveway Installation page are missing. https://snipboard.io/MjsBuF.jpg	Invalid: Brick Driveway Installation is a Service Area Page. SAPs do not get FAQ. It appears Build may have moved the page under a CAT but on the questionnaire and post- CW backup this is a SAP. https://my.websites.hibu.com/preview/71e6603531ae12b24bac8a283d99ddb6?device=desktop		

Name of business doesn't match what was requested on the questionnaire where the name of business is connected data https://snipboard.io/KkDtT8.jpg ; because the client only wanted the name different on the website, not in text, the name of business should not be connected throughout the site	This was an odd request that goes against best practices, and there is no published rule about how to handle. CW's first assumption addresses the decision here, which was advised by AM Waldron.	Valid	The error is that the full NOB was used on the About page when it should not have been connected since the shortened name was requested on the site.
About page - changes to text as the questionnaire states the business has over 20 years of experience, but not that it's been in business for over 20 years https://snipboard.io/Yaw2ot.jpg	Invalid: the text on the about page states, "For over 20 years, our licensed plumbers have been serving North Texas homeowners" which indicates the plumbers' experience (aligned with the Q), but does not directly claim that the business has existed for that long.	Valid	Using the years that way implies that the business itself (our licensed plumbers) has been serving homeowners for over 20 years. If the business owner has over 20 years of experience, the About info should be reworded to indicate the experience belongs to the owner of the business.
38: Send Message button s/b removed from footer, client doesn't want email displayed. https://snipboard.io/nHoTur.jpg	Invalid: Build error/responsibility		This is marked as a build error. https://snipboard.io/rTJK6d.jpg
29. As the Visit us button is in the header, CTA training does not indicate a Visit Us button on the desktop hero. Since the client does not have a hero form and the mofacs are set up horizontally, left both buttons as-is	The CTA training is out of date. CW used current templates in which two buttons are permissible where it makes sense (phone number is also in header). If a deduction was merited, QAE should/would not have left both buttons in place		There was no error marked for this.
55. Additional Flooring Services Page: H1 "Additional Flooring Services" is too general for SEO, need something more specific, try something like: Carpet and Laminate Floor Repairs based on subpage topics.	Invalid: "Additional Flooring Services" is specific enough for the category, as Flooring was specified, and the subpages cover a range of topics, not all of which would have been covered by QAE's suggested H1.	Updated	
35: FWR to CW: Add coupon to Home and service/GEO pages for Veteran Discounts. https://snipboard.io/hpFNfa.jpg https://snipboard.io/cD1bLs.jpg	Invalid: There was no specific dollar amount or percentage mentioned in the discount, so it was not considered a coupon - as confirmed by Paul. 'Veteran discounts' was included on the site as a MF in why choose area and in body copy MFs.	Updated	
53: Northlenn repeated 9 times on Northglenn GEO, it's Northlenn. https://snipboard.io/mXChZr.jpg https://snipboard.io/TnxYoE.jpg	Invalid: This was a Sales error. All CWs do is connect geos and geo sections to data. We are told to assume SAPs and Geos are correct, and to not make changes. We have never been told to comb through all cities to make sure they were entered correctly, and doing so would significantly add to our turn times.	Valid	Jess has told us that we can update spelling errors and pluralizations on SAPs and Geos when the content comes in wrong. Noticing it in the Hero would indicate that it was incorrect. https://snipboard.io/syjU6k.jpg
50: https://snipboard.io/XW9zu1.jpg Northlenn s/b Northglenn in URL.	URL populated into HWP this way. See grammar/spelling comments above.	Valid	URL can be changed to be correct.
Business Entity page bullet capitalization "Limited Liability Company (LLC) establishment" s/b "liability company"	Invalid: Performed a Google search and I'm seeing it both ways. Since it's defining "LLC" it makes sense to capitalize the words that LLC stands for.	Updated	
1. Header: phone lead-in should not exceed phone number https://snipboard.io/mrkxbd.jpg	Invalid: feedback given to CW to keep these concise - but on post-CW backup the text is slightly shorter than phone #: https://snipboard.io/jxql8o.jpg	Updated	

Gallery: unused anchors should be deleted https://snipboard.io/NLIV2y.jpg	Invalid: CWs no longer touch gallery elements; build error.		This is marked as a build error
Is the AI generated copy organized logically and easy to read?	Invalid: Extra deduciton. Only one comment under Copy Section Notes.	Updated	
1. Megamenu should be alphabetical https://snipboard.io/gHyY0v.jpg 2. H0me copyblocks should be alphabetical https://snipboard.io/QsHGc9.jpg	Invalid: Paul confirmed (and has consistently said for some time) that fulfillment has the discretion to break alphabetical order when it makes sense to do so. This is a roofing site, so it makes sense for roofing to be prioritized over gutters. I coached CW to leave an assumption when deviating from alphabetical order in the future.	Updated	
FWR to CW was to restructure mega menu and CAT copyblocks in alphabetical order. CW refused, citing directions from their AM that were based on incorrect interpretation of current procedures.	Invalid: QAE was incorrect here. Paul confirmed (and has been saying for some time) that fulfillment has the discretion to break alphabetical order when it makes sense to do so.	Updated	
Video splash - Name of video field was not completed with name of business https://snipboard.io/OKCA0v.jpg	Invalid: CW did not upload a new video script b/c this was an upsell. Nowhere in the instructions, or anywhere else, have we been told that CWs have to fill out the NOB for upsell videos - only that we have to remove placeholder text. IF this is an expectation, 1) may we have an FYI so we can let the teams know? and 2) we really need to have all these video script/splash rules in writing somewhere.	Updated	This is for the video splash, which is a build error.
Performance Muffler Services page - Emissions changed to Emissions Services to avoid having a one-word heading per best practice https://snipboard.io/jNG0OU.jpg Emissions page - h1 in hero "Emissions" changed to "Emissions Services" to avoid one-word h1 per best practice https://snipboard.io/Mp57KR.jpg	Invalid: Per the 10/27/25 Dispatch there is no longer a minimum number of words for headings.		There are other copy errors. Won't change the score.
54: Replaced Certification MoFac with Discounts MoFac for SQOT (offers).	Under most circumstances I'd agree with this change, but "Discounts available" is too vague to be very meaningful. Discounts for seniors? Discounts for fleets? As a customer, if I'm shameless enough to call somewhere and ask what discounts I can get, I'm doing that without the website telling me to. This businss's certifications were specific.	Updated	Yours is way better.
Holiday Hours missing from the Contact page (https://snipboard.io/tl4CmD.jpg). Added holiday hours.	Invalid: they're present on post-CW backup - and you can see the bottom of them in QAE's screenshot as well. Seems that Build may have just moved the Holiday Hours heading to the right column, but didn't move the actual hours. https://my.websites.hibu.com/preview/5ee9941c4ed4f78e0127f6f3aaab87ba?device=desktop	Updated	Agreed

SAP directory page was hidden in navigation though there are SAP pages https://snipboard.io/Vmlsfe.jpg , it was not added to navigation menu for desktop https://snipboard.io/ZdHMQ1.jpg	Invalid: It's in the nav in the post-CW backup.	Updated	This one was a maze, Build hid them because she forgot to add the links.
Home page - h1 "Professional Landscape Services" changed to "Landscape and Lawn Maintenance Services"	Invalid: Original H1 was not an error. It is a landscaping company. Lawn care services can fall under the umbrella of landscaping service.	FYI	For a Home page neither "professional" or "services" is doing a lot of lifting for you (though fine to add with something that works). The upgraded H1 accurately reflects the company's full services while capturing lawn maintenance user/search intent. The original "Professional Landscape Services" was limited, this version provides greater clarity and SEO specificity without narrowing effectiveness.
Property Maintenance page - "Landscaping" changed to "Landscaping Services" per best practice to avoid having a one-word heading https://snipboard.io/N5hDVR.jpg Landscaping page - h1 in hero "Landscaping" changed to "Landscaping Services" to avoid having a one-word heading https://snipboard.io/dEh4ai.jpg	Invalid: Per 10/27 Dispatch, there is no longer a minimum number of words in headings. Landscaping is the service, so this is sufficiently descriptive of the page topic.	Updated	Fair, I removed those based on the verbiage
Superhero form - form title template text not replaced https://snipboard.io/q2xlZX.jpg	Duplicate feedback in the request form question	Updated	I only saw a charge in the form section, but the text was listed twice, removed the duplicate text.
CW: SAP URL was incorrect. https://snipboard.io/nEmVyv.jpg	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expectation to confirm your review the site and confirm that URL's are correct though, right?
URLs must be structured as CONTACT/KEYWORD-SERVICE-AREA: https://snipboard.io/ncN2Ai.jpg https://snipboard.io/qX8VHC.jpg This only had the keyword.	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expectation to confirm your review the site and confirm that URL's are correct though, right?
Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Invalid — Unclear what this means, which page it's about, or what the screencap is meant to show. If it's about the Audiology Offices SAP, that H1 is present in the CW backup. https://snipboard.io/p75BKJ.jpg	Valid	There still is an expectation to confirm your review the site and confirm that URL's are correct though, right?
SAP URLs are not the correct format: https://snipboard.io/PAYW6b.jpg	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expectation to confirm your review the site and confirm that URL's are correct though, right?
SAP URL is out of format. https://snipboard.io/ElwTF8.jpg	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expectation to confirm your review the site and confirm that URL's are correct though, right?
Links for Gallery still not functioning. https://snipboard.io/Aoa7CM.jpg https://snipboard.io/tDgKpG.jpg https://snipboard.io/8BOpDQ.jpg	Invalid — Gallery links are a Build issue.	Updated	Feedback removed from link errors

.https://snipboard.io/Kv5gxj.jpg The Bulleted list is in a different format than the other pages and we can only use bold on them if they have a : or - in them.	This first part of this is valid, but where is the rule for the part about "we can only use bold on them if they have a : or - in them"?	Updated	This was a rule for ages, CW initially had the green light to BOLD as needed, eventually Paul rolled it back due to implementation issues. Since I cannot find it, text has been updated.
Name of Business: Is the business name spelled correctly?	Invalid — No error reported for this category.	Updated	Corrected
Siding Contractor SAP URL has extra text, must be formatted properly as contact/, etc. .https://snipboard.io/GvKFTW.jpg .https://snipboard.io/gaC9f1.jpg Same with Roofing SAP.	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expectation to confirm your review the site and confirm that URL's are correct though, right?
.https://snipboard.io/lpjzWy.jpg .https://snipboard.io/gD5Wsx.jpg Fire Extinguisher Services CAT is missing the installation page.	Invalid — There was no fire extinguisher installation page in the initial setup, so there should not have been a link to it on the CAT page. See Case Comments on 15549214.	Updated	Fair, I do see that it was marked as "remove" on the page review.
SAP page format is not correct .https://snipboard.io/iATGup.jpg	Invalid — This site was submitted before the system error where it was dropping the contact/ was detected and the team was alert on 3/11 in the afternoon.	Valid	There still is an expectation to confirm your review the site and confirm that URL's are correct though, right?
66: https://snipboard.io/MZwPoy.jpg https://snipboard.io/hx25pn.jpg Full Service Catering, Wedding Catering hero image file names are incorrect.	Invalid - The artist used the correct images on the heros but just named them incorrect so does that account for a category that takes off 2 points since the image is fine?	Updated	Moved to meta
42: BBB isn't an Association. https://snipboard.io/AlPI4s.jpg	Invalid: It literally is, and I've seen deductions from QAE saying CWs should have included it under Associations. This seems like a fair place to include it if CW is going to - we didn't claim accreditation or rating or anything else.	Updated	
47: Garage Door Repairs link on Home redirects to Garage Door Installation. https://snipboard.io/CfBM2D.jpg Same with Garage Door Parts on Home page: https://snipboard.io/j2QKO9.jpg	Invalid: Both links on post-CW backup go to their intended pages: https://my.websites.hibu.com/preview/df418ea9723f3de3033f41247eaf71b5?device=desktop	Updated	Agreed - links were broken during build
Are all links for buttons, images and text linked correctly?	Invalid: CW Error marked, but no feedback given for this category.	Updated	
60: Obvious Recent Projects placeholder text and button text for Gallery section on CATs...they're dogs. https://snipboard.io/ndfjXr.jpg Remove placeholder text on Gallery. https://snipboard.io/vtH0GE.jpg	Invalid: All gallery elements are now Build's responsibility	Updated	
65: https://snipboard.io/gPYhzS.jpg Gallery anchors on nav bar.	Invalid: Build responsibility. CWs no longer touch gallery elements.	Updated	
60: Gallery text on sections still generic placeholder text given these are dogs/pets. https://snipboard.io/G8jASJ.jpg	Invalid: All gallery elements are now Build's responsibility.	Updated	
33: Callout involving estimate, should have a button linking to form fill for estimate. https://snipboard.io/exP9mK.jpg	Invalid: There is no rule stating this. This client's primary method of contact is calls. It's perfectly reasonable for users to schedule their estimate via phone call.	Updated	

Motivating factors: Are motivating factors consistent with the questionnaire?	Invalid: CW Error marked, but copy section notes say "na"	Updated	
31: NOB in Video Splash. https://snipboard.io/YQ4Uxh.jpg	Invalid: This is an upsell; CW removed placeholder text and there are no instructions that say the CW still needs to fill in the name of video field. If this is required please work with Kim, Paul, etc to get it documented	Updated	This is a build error
54: Replaced Experience MoFac with Fast Project Turnaround for SQOT (Speed).	Normally I'd agree that speed beats experience, but "fast turnaround" is pretty meaningless as it's vague enough that anyone can claim it. 45+ years is enough experience to be a decent quality indicator, and is a lot more specific.	Updated	Neither are great Mo Facs, but the faster turnaround time can be backed up by the 30%-50% claim on the site. If that could be made into a Mo Fac, it would beat all the others. https://snipboard.io/6vwySD.jpg
Hours were omitted from hero with no 24/7 advisement to counter	Invalid: Per the Dispatch, we only include the open/closed widget for non-24/7 businesses if people visit their physical location.	Valid	Correct. The error is that there is no open closed widget and the business doesn't indicate they are 24/7
5 or more errors: "Local, Family-Owned & Operated" Home – Why Choose Us section spacing error. Also - all buttons advising "Request Call Back" were typo'd to read "Request CALK Back". Header button also retained this error as well as the short hero on the Request Call Back page.	Why choose section is edited in one place, in collections. Buttons are edited in one place, in the collection. Therefore can we please change this to 1-4 errors?	Updated	We currently don't score based on collections, since we don't look at that. We score based of the number of places something is wrong. That said, I'll change it since we'd only count the Why Choose, two buttons (Header and Hero Form), and navigation
31: NOB not on Video Splash. https://snipboard.io/IOfaED.jpg	Invalid: This is an upsell; CW removed placeholder text and there are no instructions that say the CW still needs to fill in the name of video field. If this is required please work with Kim, Paul, etc to get it documented	Updated	Added to clarification feedback
Grammar/Spelling: Is all copy grammatically correct and is it spelled correctly?	Invalid: CW error marked, but copy section notes only had feedback for #60	Updated	
Motivating factors: Are motivating factors consistent with the questionnaire?	Invalid: CW error marked, but copy section notes only had feedback for #60	Updated	
Do the headlines and body copy follow the writing style guidelines and best practices?	Invalid: CW error marked, but copy section notes only had feedback for #60	Updated	
Changed mobile CTA button from call or text to click to call as client doesn't want texting on site	Invalid: Q218317 says they do want texting, and the listings RCF has texting enabled. CW using Call or Text was correct.	Updated	
70: Review button on header is same color as background. https://snipboard.io/W7Ovqg.jpg Bullet points on Wall Tile Installation skip a point. https://snipboard.io/q3M5WK.jpg	The review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID. and Assuming Bullet points in the content is a CW miss.	Updated	
https://snipboard.io/7LN5Jp.jpg https://snipboard.io/pleMnD.jpg All supplied images were not added to the Gallery page.	Added 55/57 images and 2 images were used in the site else were so only 2 missed to use in the gallery. please can this be considered as feedback.	Updated	We'll FYI it. Please be sure agents leave assumptions if they are not using photos or other files that were supplied.

63: Dumpster Sizes hero image not related to copy and page. https://snipboard.io/o4ND19.jpg 70: Review button on the header is same color as the header background. https://snipboard.io/gYDeGb.jpg Extra empty column left on Special Offers page. https://snipboard.io/iSnO1x.jpg	1. Valid 2. Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID. 3. Valid	Updated	2. Fair 3. Please have agents leave assumptions when items cannot be fulfilled. There is no assumption about the blog not being used. https://snipboard.io/ncNLrO.jpg
41: https://snipboard.io/VYP1j8.jpg CCA signed but blog posts were not imported. https://snipboard.io/UXGAoE.jpg	4. Invalid: Importing 3rd party blog posts are subject to valid RSS feed url. if feed url fails to import we are not manually creating them!		
70: Review button is the same color as the header. https://snipboard.io/mhnJT1.jpg	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	updated	
1. Finance page is on navbar so should have indexing on https://snipboard.io/FEsm2t.jpg 2. button color should not match background https://snipboard.io/OZsoH6.jpg https://snipboard.io/FB6O8Z.jpg https://snipboard.io/m0WJbF.jpg	Invalid: 1. Turning On the indexing for the Finance page not a build task 2. the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
Header: buttons should not match background https://snipboard.io/GtIAys.jpg	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
Hours in footer twice: https://snipboard.io/R295uU.jpg Backups show this was caused by build. Header buttons don't match https://snipboard.io/vKRhFD.jpg	1. Valid 2. Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID	Valid	The buttons should match if they are consistent in the theme
Reviews button is not the same style as the CTA button https://snipboard.io/EYXOZd.jpg	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Valid	The buttons should match if they are consistent in the theme
https://snipboard.io/tZ5UPC.jpg The background color of the button can not be the same color as the background color of the section it is on. https://snipboard.io/v3xtkB.jpg The font in the intro paragraph on the first CAT is two different sizes.	1. Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID. 2. Valid	Updated	
1. Megamenu should be alphabetical https://snipboard.io/gHyY0v.jpg 2. H0me copyblocks should be alphabetical https://snipboard.io/QsHGc9.jpg 3. Copper Gutter image is not copper, used on Zinc Gutter page https://snipboard.io/R0Myc.jpg	1,2. Invalid: Mega menu and arranging copy blocks in alphabetical order is not a build task.	Valid	The error is for the images.

Shouldn't retaining walls page be under curb and retaining wall services?	Invalid: Page ordering in the navigations is not a build task.	This is marked as a CW error
70: Review button same color as header when viewer scrolls down. https://snipboard.io/6Tqwke.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated
41: https://snipboard.io/hZGpnf.jpg & https://snipboard.io/SxtpGb.jpg Gallery page is setup so we would want to move the page from under the about page to its own before the about page on the navigation.	41. It was not mentioned anywhere in the guidelines about the gallery page that we need to move it to the main navigation, now we have shared this to the team, can this be treated as feedback for now	Updated
70: Review button on header same color as background. https://snipboard.io/qdINrA.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated
63. Please change out the following hero images: Please change out the Paving Absecon NJ Geo hero image as it's the same as the Commercial Repaving hero image. https://snipboard.io/W5io1c.jpg Please change out either the Egg Harbor Twp Paving geo page or the Swedesboro, NJ geo paving page as it is the same image. https://snipboard.io/Jpj3h8.jpg Also, the Paving Wildwood NJ geo page hero image is the same https://snipboard.io/QtZHL.jpg as the hero on the Blacktop and Asphalt Services CAT page. Please change the Paving Wildwood NJ page. Hero images on the site should be unique with the exception that the CAT hero image can be used again on hero images of pages under that CAT page. Feedback: Consider changing out the Paving Cape May, NJ geo hero image as most of the page talks about residential paving. https://snipboard.io/jbR8tf.jpg Please change out the Paving Stone Harbor NJ geo page hero as it seems to be a repair rather than paving image: https://snipboard.io/Kh4NWu.jpg 67 Feedback: Header and Elsewhere: Please change the color of the buttons on the header (Reviews and Request Call Back) and the hero form Request Call Back button to gold to stand out more. Also, change out any other button that is grey on grey to follow best practices. 72. Feedback: Footer: Please adjust the line height in the rows of text under each column so the text is aligned for the 2 columns where	The site was submitted to QA before the new spec site rollout and was not aware of the hero image update, hence repeated few hero images for the GEO pages. can this be treated as feedback now	Updated
70: Review button same color as header background. https://snipboard.io/5OPuzv.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated

70: Review button same color as header. https://snipboard.io/3CsNv7.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
https://imgur.com/a/ADf5FUJ Since they wanted to display their hours we should have it in the footer they are available 24/7. Emergency hours does not always mean 24/7.	Invalid — Imgur link doesn't open an example of an error.	Valid	Footer doesn't contain Business Hours. Emergency Services doesn't necessarily mean 24/7 https://snipboard.io/mlyjei.jpg
CW: https://imgur.com/a/XB1tNmW All of the services are not Asphalt services and because of this the callout would not apply to all pages.	Invalid — Imgur link doesn't open an example of an error.	Valid	Callout isn't applicable to all pages. https://snipboard.io/lxaQM9.jpg
https://imgur.com/a/0hd05GE Learn more linked to home on the Grading CAT.	Invalid — Imgur link doesn't open an example of an error.		Can't find this error
https://imgur.com/a/VAbgKBh The first H3 of a SAP has to have the KW they bought for that page in it.	Invalid — Imgur link doesn't open an example of an error.	Valid	https://snipboard.io/4JZB6o.jpg
Address/Service Area: Is the address and service area listed correctly?	Invalid — No error reported for this category.	Updated	
Is the Blog, eCommerce, and Gallery page hidden if applicable?	Invalid — None of this is CW's responsibility.	Updated	
https://snipboard.io/acjnX8.jpg Gallery anchors included on nav bar. 75: Get Directions s/b removed from EM, client didn't want address displayed. https://snipboard.io/78b9AS.jpg	Invalid — None of these are CW responsibilities.	Updated	Engagement menu error is marked for Build
Car AC page has Oil Change meta content https://snipboard.io/UZpl6M.jpg	Invalid — Feedback is legit, but these are not counting in March.	Updated	
https://imgur.com/a/plouR20 Garage Door Opener Installation learn more button linked to the Custom Wood Garage Door Installation.	Invalid — Imgur link doesn't work, so it's not clear what this is about. On the Garage Door Installation CAT, this button is correctly linked in the CW backup. https://snipboard.io/TeECdU.jpg	Updated	
https://imgur.com/a/84BkrFe The first H3 on a SAP has to have the KW they paid for in it.	Invalid — Imgur link doesn't work so it's not clear what this is about.	Valid	Updated link: https://snipboard.io/y11FrW.jpg
Some SAP meta descriptions were over the character limit https://snipboard.io/LHXZ2f.jpg	Invalid — Feedback is legit, but these are not counting in March.	Updated	
Typo in the meta description on the Contact page https://snipboard.io/GkxEwu.jpg	Invalid — Feedback is legit, but these are not counting in March.	Updated	
GEO content "New Port County" s/b "Newport County"	Invalid — This is consistently presented as New Port County in the questionnaire. https://snipboard.io/l4l0xB.jpg	Updated	
page content spelling and meta content, everywhere throughout entire site "New Port County" s/b "Newport County" Invalid	Invalid — This is consistently presented as New Port County in the questionnaire. https://snipboard.io/l4l0xB.jpg	Updated	
Service tabs should fall between 50-60 characters Build - Gallery meta title/description was not applied	Invalid — These don't count in March.	Updated	

SAP pages should reflect service TO vs IN for H3 and body text	Invalid — This is not a published rule. If the intent is for the SAPs to say something different, then there needs to be a rule requiring rewriting them and the AI output needs to be changed. Only Rye is marking these.	Valid	SAPs are for serving areas, which means there are likely no physical locations in the city. Per the Spec Site, content is to avoid using verbiage as if the business is in the city. https://snipboard.io/Aa4l3M.jpg
SAP pages should refer to service areas as “to” “available to” “serving” “for” etc. H3 and body text should not refer to business as “IN”. Professional Diesel Particulate Filter Services in	Invalid — This is not a published rule. If the intent is for the SAPs to say something different, then there needs to be a rule requiring rewriting them and the AI output needs to be changed. Only Rye is marking these.	Valid	SAPs are for serving areas, which means there are likely no physical locations in the city. Per the Spec Site, content is to avoid using verbiage as if the business is in the city. https://snipboard.io/Aa4l3M.jpg
SAP pages should not state that the business is IN any of the locations. Professional Landscape Design in When searching for landscape designers in	Invalid — This is not a published rule. If the intent is for the SAPs to say something different, then there needs to be a rule requiring rewriting them and the AI output needs to be changed. Only Rye is marking these.	Valid	SAPs are for serving areas, which means there are likely no physical locations in the city. Per the Spec Site, content is to avoid using verbiage as if the business is in the city. https://snipboard.io/Aa4l3M.jpg
SAP page text should indicate business serves the area and is not located IN Professional Plumbing Services in Professional Plumbing Repair Services in Water Heater Repair Services in	Invalid — This is not a published rule. If the intent is for the SAPs to say something different, then there needs to be a rule requiring rewriting them and the AI output needs to be changed. Only Rye is marking these.	Valid	SAPs are for serving areas, which means there are likely no physical locations in the city. Per the Spec Site, content is to avoid using verbiage as if the business is in the city. https://snipboard.io/Aa4l3M.jpg
the client has an existing voice-over video, removed the video summary from page and video splash per guidelines regarding upsells and existing videos https://snipboard.io/7lwbh6.jpg	Invalid — Please indicate where this rule is published.	Updated	
27: There were no social links. These s/b deleted. https://snipboard.io/Ozw9lc.jpg	Invalid - no social icons appear on CW backup.	Updated	
Phone Number: Are the phone numbers listed correctly?	Invalid - no error listed for this category	Updated	
Request form button "Request an Appointment" changed to "Request Appointment" per process https://snipboard.io/jrzVvU.jpg	Invalid - it's fine to include the article.	Updated	
Video splash - Name of Video field was not filled in with name of the business per process https://snipboard.io/myCZtq.jpg	Invalid - CW backup has the NOB in this field: https://snipboard.io/XfMK4V.jpg	Updated	This is a build responsibility.
Per questionnaire, the request appointment form is supposed to go to areliwallace@gmail.com https://snipboard.io/6L35bv.jpg	Invalid - this should be updated by DSC in the client dashboard.	Updated	
FOOTER ERROR – no content in collections to populate Serving Area in footer (read with default info)	Invalid - serving area is included in footer on CW backup: https://snipboard.io/PklywC.jpg	Updated	
ABOUT tab was blank VS required page on Q	Invalid - the About page is fully completed on CW backup.	Updated	
31: https://snipboard.io/AVpJ5Y.jpg NOB not on Video Splash.	Invalid - CW backup has NOB in this field: https://snipboard.io/T6G89R.jpg	Updated	This is a build responsibility.
31: Name of Video not in video splash. https://snipboard.io/bJAdzC.jpg	Invalid - CW backup has NOB in this field: https://snipboard.io/7e5PUv.jpg	Updated	This is a build responsibility.
URLs "new-city" and "valhalla" need state added.	Invalid - the HOFO and spec site do not say a state abbreviation is required.	Updated	

1. Mobile header: no assumption why "Call" button was removed https://snipboard.io/nx8iQU.jpg	1. Invalid - call us was removed for Contact Us header button linked to the locations landing page because this is a multi-location site.	Vaild	The original geo came into the site with the state abbreviation. For clarity for the end user, it should be left in. https://snipboard.io/02slBe.jpg
2. Hero geo content needs state abbreviation https://snipboard.io/ILEy6x.jpg	2. Invalid - the HOFO and spec site do not say a state abbreviation is required.		The 2-location examples in the Spec Site also include the state. https://snipboard.io/0R6qAv.jpg
CW incorrectly did not include state in hero geo content as per FWR https://snipboard.io/CbYyaZ.jpg	Invalid - the HOFO and spec site do not say a state abbreviation is required.	Vaild	The original geo came into the site with the state abbreviation. For clarity for the end user, it should be left in. https://snipboard.io/02slBe.jpg The 2-location examples in the Spec Site also include the state. https://snipboard.io/0R6qAv.jpg
1. Geo page URL needs state abbreviation "contact/landscaper-shewbury"	Invalid - the spec site does not say a state abbreviation is required.	Valid	Geo page URLs do need the state. https://snipboard.io/5BkNU1.jpg
2. Geo page URL needs state abbreviation "contact/landscaper-west-boylston"			
Serving area page, home, and CAT page meta descriptions are written incorrectly.	Invalid - grace period for metas.	Updated	
Textable RCF: Was the textable RCF set up properly according to guidelines, when applicable?	Invalid - no CW error listed for this category	Updated	
31. Video script had text that should have been in sentence case or lower case in title case: https://snipboard.io/4jcyAd.jpg QA adjusted.	Invalid - CW copied this over as it was on existing site.	Valid	Good work with the copy, but we don't want to ignore errors.
EE: The Commercial Landscape SAP hero shows a concrete wall. BJ: Hidden pages. Because the questionnaire say no we should not carry their blog over incase they do not want to use that content anymore.	EE: Looks like the designer got 2 pts removed twice for an incorrect hero image on the commercial landscape SAP page, isn't this double dipping? Shouldn't the designer have only lost 2 pts from either the hero section or the image clarity section? BJ: The questionnaire asks "does the client have an existing blog," but there actually is a blog, so the designer carried it over. The Q doesn't say they don't want the blog, how do we know that wasn't a mistake? It doesn't actually say that they don't want the blog in the Q.	Updated/Valid	1. Agreed! 2. I don't hate the idea, but at least leave an assumption and hide it. Might be worth a suggestion - auto import isn't a thing currently.
Gallery section required for location pages.	According to https://websitespec.hibuone.com/additional-location-search-for-Optional-Sections-when-content-is-provided :" it lists gallery. Designer chose not to include the gallery on the location because there were not location specific images available.	Updated	I don't think the images need to be location-specific for the gallery. Since this business generally goes to a location for work, images of the cranes and tow vehicles would work on either page.
DG: Images related	I understand where 2 points are lost due to a hero image not being up to 1920 px, but I don't understand where 2 points are lost due to images related		

SAP page should reflect service provided TO city/ST pages vs IN a city E.g. "Spray Foam Insulation Services in" E.g. "Finding the right insulation contractor in"	Invalid: Checked CW backup. Though this business is not located in Ashgrove, MO, they provide service in Ashgrove, MO (and the other SAP cities), so phrasing like, "Since 2016, we've helped homeowners and businesses in Ash Grove, MO create more comfortable indoor spaces" is fine, as this business goes to their customers in Ashgrove. If our client had a location, the language would need to be, "to Ash Grove, MO" since they don't travel to Ash Grove, nor are they located in Ash Grove, but people in Ash Grove would be traveling to wherever the business was located.	Updated	
CONTACT page – Areas Served section is visible with default "Keyword in City, ST"	Invalid: Contact page doesn't show any errors with the "Serving Area" on CW backup. It shows Utah County, UT and surrounding areas, which is linked to the Serving Area Landing page.	Valid	The error is for the Areas Served (Geo) section being left visible with no Geo Pages on the site. https://snipboard.io/gSpUfQ.jpg
1. Build: https://imgur.com/TV5cRXM Alt tag missing. 2. FYI: https://imgur.com/a/8WMMfcjR Based on my understanding of the BBB rules there should be no BBB logo since they did not provide a link. 3. https://imgur.com/a/od12ryM We should use the main colors as the colors they asked for or colors that are in their logo. The only exception would be if there is no way possible to pass contrast with their colors. 4. https://imgur.com/a/pVFUM69 The phone number and the geo in the header are not balanced. When the geo does to two lines the phone number should be balanced with the second line in the geo.	1. Can this be considered as technical issue? Build added alt tag via the gallery widget. https://snipboard.io/Yxk1rL.jpg 2. Feedback only. Also BBB rules are being clarified at the moment. 3. Designer toned down the color red as it was too bright and used grey as a substitute for white to accommodate a transparent header. An assumption was also dropped about this. https://snipboard.io/OUZ2SW.jpg 4. As per checking, header elements are aligned. This has been viewed in 1366x768 resolution. https://snipboard.io/fpqg9L.jpg	Updated	1. Fair 2. Good for feedback. 3. Fair based on the assumption 4. I see it on the build final in common res. https://my.websites.hibu.com/preview/4e8ae6f08e6a6d7cd100de3bd830ee2f?device=desktop
FWR to Build: -About page image is missing.	The issue appears to be technical in nature. The image was added to the About page during Build and may have been disconnected by the system. As evidence, the image is visible as uploaded in the editor at the same time Build was processing the website. https://snipboard.io/3Ntrw1.jpg https://snipboard.io/uOqDia.jpg	Updated	Agreed
Backup must be named https://snipboard.io/2bU0E8.jpg	The backup name for "Build" is complete; however, it is being cut off due to a display issue. The full name appears correctly when hovered over. https://snipboard.io/bxZvP2.jpg	Updated	Agreed

GARAGE DOOR REPAIRS CAT All links on service copy blocks direct to Garage Door Spring Replacement			
Same with POLE BUILDINGS & POST FRAME CONSTRUCTION	Invalid - all copy blocks were linked to the correct pages on CW backup.	Updated	Agreed - Happened during Build
SAME with SPECIALTY GARAGE DOOR SERVICES CAT			
Drilling CAT page buttons are not linked to the correct pages https://snipboard.io/9Vm7e8.jpg	Invalid - all copy blocks were linked to the correct pages on CW backup.	Updated	Agreed - Happened during Build
Nav breaks to two lines in 1366, Mega menu required: https://snipboard.io/eFG7Bx.jpg	Invalid - the navigation is all one one line in 1366x768 view on CW backup: https://snipboard.io/8mi4tN.jpg	Updated	Agreed - Happened during Build
55. Roof Inspection H1 and Geo missing from the hero section: https://snipboard.io/YAz35L.jpg	Invalid - h1 and geo are showing on CW backup: https://snipboard.io/vWaUMY.jpg	Updated	
54: Replaced Customer Satisfaction MoFac with Licensed/Insured for SQOT (Quality).	Invalid - guaranteed satisfaction is more important than licensed/insured; it is expected that a tree service is insured and licensed and that could be mentioned elsewhere. A satisfaction guarantee indicates the business will make it right when a customer is not satisfied.	Updated	Neither of them are great as both should be offered as a minimum.
Footer - there was no content entered for Service Loc 1 in the content library. This field was blank in the footer, along with no serving area content.	Invalid - CW backup has no blank footer fields and service area is listed: https://snipboard.io/E84OIL.jpg	Updated	Agreed - Happened during Build
Are the About page Content Library Fields correct per questionnaire and does the Open/Close widget appear in the hero of all pages?	Invalid - no error listed for this category.	Updated	The note should have said "About Page", but the error happened during build.
Several things are missing from the Contact page. No payment methods. No serving area. No address. no company license.	Invalid - all content is showing on CW backup, and license number is not required to be on the contact page https://snipboard.io/zZiKLC.jpg	Updated	This is the same error as above.
Is the AI generated copy organized logically and easy to read?	Invalid - no error listed for this category.	Updated	
24: Removing hours from site as client has 24 hour emergency services and this is a mofac. https://snipboard.io/SCcQZL.jpg	Invalid: Business operating hours are different from extended emergency hours. CW used the hours from the questionnaire, and QAE should have kept them on the site. It's normal and reasonable for a business to want people to contact them only during specified business hours for non-emergencies, but to also offer emergency services outside of those times. The rule QA is thinking of involves the open/closed widget, not the hours in the footer.	Updated	
Generic placeholder text on Gallery page. https://snipboard.io/EXcvS2.jpg	Invalid: Build now handles all gallery components.	Updated	
65: Gallery anchor placeholders in menu. https://snipboard.io/SArWZj.jpg	Invalid: Build now handles all gallery components	Updated	

Footer: "and surrounding areas" should have been removed https://snipboard.io/kKHtI1.jpg	Invalid: The site has SAPs. Part of the process for sites with SAPs is that the words "and surrounding area" are supposed to be in the footer linking to the PSAP page. We've been deducted before for this link not being present with a location-based business - in this case, CW followed process.	Updated	
Semi Towing Near Me SAP page - replaced click-to-call button in hero with Contact Us linked to Locations page as all locations do not share same phone number https://snipboard.io/KOwyZP.jpg Winch Out Service SAP page - replaced click-to-call number in hero with Contact Us linked to Locations page as all locations do not share the same phone number https://snipboard.io/93jBHP.jpg	Can this go in the CTA category? It's a matter of the wrong CTA being chosen, not the actual number being wrong.		
24: Removing hours as they have 24/7 emergency services. https://snipboard.io/LZQAE9.jpg	Invalid: Business operating hours are different from extended emergency hours. CW used the hours from the questionnaire, and QAE should have kept them on the site. It's normal and reasonable for a business to want people to contact them only during specified business hours for non-emergencies, but to also offer emergency services outside of those times.	Updated	
65: https://snipboard.io/rLXQ9x.jpg Menu features gallery anchor placeholders.	Invalid: Build error/Build responsibility	Updated	
Are the About page Content Library Fields correct per questionnaire and does the Open/Close widget appear in the hero of all pages?	Invalid: CW Error marked, no feedback given for this category	Updated	
1. Copyblocks and CAT pages should be alphabetical. Adding "Professional" to some H3s causes these copyblocks to no longer be alphabetical. "Professional" is also a power word, which we do not use anymore so they should be removed. https://snipboard.io/xkfbHC.jpg	Copy blocks need to follow page order, which CW's did. CW was remembering the old "min. number of words in H3s" rule, and we reviewed the fact that this is no longer in place - however, adding "Professional" is not incorrect even though it is also not necessary.	Updated	While most of the error is invalid, adding Professional to the H3s on the Lawn and Home Services page is incorrect as we're not supposed to use power words anymore, especially if the AI didn't include them on the original content. Original: https://snipboard.io/olERdv.jpg CW Update: https://snipboard.io/W8BH4K.jpg
55: Reviews header button not connected to collection. https://snipboard.io/DwmKRe.jpg	Invalid: This button isn't a collections thing. Everthing with the button looks right to me. Connecting the reviews ID is not a CW task if that's what QAE means.	N/A	This is a QAE task. It wasn't marked as an error, though.
Address/Service Area: Is the address and service area listed correctly?	Invalid: CW Error marked, but no feedback for address/service area	Updated	
2. Preferred Contractor page is out-of-norm, not a service/product page. should have a thin hero and no sidebar like the Resources page. meta needs to be adjusted to the out-of-norm format.	Invalid: There is nothing in the page reviews or Q to indicate it is anything other than a service page. Since there was also no info provided and nothing on their old site about "preferred contractors" that we could have used to inform an OON page, I advised CW to hide and de-index this page for now.	Valid	The page doesn't provide a product or service that is attainable by the public. It's an informative page and should have been a Utility page, based on our definitions.

3. Hero motivating factors: Free Quotes is already on the page twice. instead of a third time, something about product delivery would be better as that's an important part of their business. https://snipboard.io/8XyUsd.jpg	I've never heard of Hibu being concerned with us repeating a motivating factor before. Free is a good one, and it's one that the business requested us to emphasize. I can't find anything special or stand-out about delivery, only that they offer it. Ultimately everyone is going to have an opinion on mofacs, but as a customer, before I'm even thinking about needing delivery, getting started with a free quote makes the path to conversion easy and frictionless.	N/A	Agreed, but it's a good suggestion. Other errors. so it won't change the score.
47: FWR: https://snipboard.io/2guwtA.jpg Breadcrumbs s/b below footer, not below header, in mobile view.	Invalid: This was a template issue. CWs do not ever change the position of breadcrumbs nor do they check them on every page of mobile view.	Updated	Agreed - Due to other errors, won't change the score
24: Removing Additional Hours as they conflict with the 24 Hour Emergency Service info. https://snipboard.io/8DnZtN.jpg https://snipboard.io/JwjRyp.jpg	Invalid: it doesn't conflict. It somewhat reiterates what the hours widget states, but also implies that people should try to call during weekdays for non-emergencies, which makes sense. There was no reason not to include the info contained in both widgets.	Valid	The questionnaire indicates their hours are 24/7. https://snipboard.io/21IsGm.jpg This means that they always answer the phone.
CW Error: page title tags should not exceed 60 unless it's unavoidable. repeated keywords is avoidable https://snipboard.io/BP4JkR.jpg	Invalid: Site was completed before April 1st. Can this please be an FYI?	N/A	There is no error marked on this. https://snipboard.io/zNYEPe.jpg
55: Snipboard URL on Gym Mirrors SAP. https://snipboard.io/Ru86kf.jpg	Invalid: That isn't showing on post-FWR CW backup: https://my.websites.hibu.com/home/site/7acbf75ee9174ed5835e541da92c7363/home	Updated	
Footer - removed Get Directions button as the serving area was used in the footer and this isn't the type of business where customers go for service https://snipboard.io/87nkVo.jpg	Invalid: This button is a build responsibility	N/A	There was no error marked for this.
About page - unhid About (business description field) on page https://snipboard.io/vql3rn.jpg	Same feedback appears in two categories for this site	Updated	
FWR to CW: Meta descriptions: -You've done a lot of the services page title tags with the CAT format (with the business name at the end instead of extra keywords added).	Can we please FYI this? There has been too much back and forth about NOB vs an additional keyword, and I don't think we had a clearly defined hierarchy when this site was written.	Updated	Yep. We've reminded folks of this. ATT of this site, we were going off of what we've normally done, not realizing the specs were updated.
The chosen GEO San Diego County Area is missing the state, which is needed to match Yext	Can you show me where this is a published rule? I have seen a lot of geos that don't include a state name (think Chicagoland) and San Diego County makes sense as one of them. No one is confused about what state San Diego County is in, including Google.		Yext always includes the state in the County geo. https://snipboard.io/OFfGwg.jpg Since the header/hero/and geo are supposed to align based on Yext, one would assume that the state should be included. Sent to Kim for Clarification.
"Enhance Your Property Security" in 1st position H3 for most service tabs creates visual monotony with information when advancing to the next service tab. Recommend mixing it up a bit.	Invalid: The headlines aren't exactly the same and there are no repetitive headlines within a page. Site visitors also don't typically read through the site page to page. This is good feedback, but not a requirement.		I don't see this error on this account. Can you check the account info?

The SAP CTA hero buttons show the phone number. https://imgur.com/a/4fCrmPp https://imgur.com/a/Qrk5NBV	Invalid: The multi-phone pop wasn't being used for this site. The screenshots QAE provided of the spec site are for the multi-phone pop, but that doesn't apply to this site.	Updated	
Storefront Interior Carpentry page: Placeholder text on Contact button https://snipboard.io/UXZ5CH.jpg	Invalid: This doesn't show on the CW backup. The only button in the hero is the phone number.	Updated	
Upsell, blog s/b published. https://snipboard.io/2VlWxp.jpg	Invalid: CWs don't do anything with the blog page. If build is importing a blog, then they would set it to publish.	Updated	The blog is marked as a Build error
Seeming placeholder button left on Alignment page. https://snipboard.io/k4HSxz.jpg	Invalid: This doesn't show on the CW backup.		
Hardscape Services CAT – both copy blocks “learn more” buttons direct to Hardscape Services tab	Invalid: Checked on the CW backup - the first "learn more" goes to the "Retaining wall Installation" page and the second "learn more" goes to the "Walway Installation" page		
Tree and Shrub Care – both copy blocks “learn more” buttons direct to Hardscape Services	Invalid: Checked CW backup - both "learn more" buttons on this page direct to the correct product/service pages	Updated	
Water Feature Landscaper – same thing. Both copy block buttons direct to Hardscape Services	Invalid: Checked CW backup - no error		
Error also appears on Patio Installation Services CAT	Invalid: Checked CW backup - no error		
Buttons on Paint and Cosmetic CAT page do not point to the correct pages https://snipboard.io/Peycvt.jpg	Invalid: Checked CW backup - all "learn more" buttons on this page go to the correct product/service pages	Updated	

1) https://imgur.com/a/lpAwYuf Some of the thin heroes have the H1 bold and some do not. The Mofacts in the hero are bold but the H1 and H2 are not. If the mofacts are bold since they are a H3 then the H1 and H2 should be as well for hierarchy reasons. The Mofacts are also bolded twice bc they are bold in the connected data and then bold again using the design panel. 2) The linked text in the footer is a size 15 however the rest of the text is a size 16. 3) Part of the links on the SAP directory are cut off on mobile. 4) The linked text on the contact page is bold, however the other linked text on the site is not. 5) The hero for SAP Paving Contractor shows Asphalt Sealing. 6) https://imgur.com/a/8u6caG7 The parking lot image depicts uneven application and finishing details that are not typically seen in professionally executed services. 7) https://imgur.com/a/0WAoOBV The Parking lot resurfacing image has a light yellow curvy line through the parking spots on the left and could potentially make a potential client think they do not do a good clean job.	1) These came in this way from CW, is this a design error? Also, is that a hard rule that the H1 has to be bold when the H2 or H3 is bold "for hierarchy reasons." In that hero in the example, the H1s are still larger than the descending headers, I don't see this being a hierarchy issue since your eye still goes to the larger text first. Is that a hard rule somewhere in the documents? 2) Correct me if I am wrong here, but I remember discussing this some months ago and that build shouldn't lose points unless the font sizes look obviously different to the eye, since designers aren't generally expected to check every single font size in the HWP edit text panel. When I look at what is being pointed to in the footer, my eye can't tell the difference. 3) Is this a common issue we should be looking out for now? I don't understand why that text isn't wrapping according to screen size like it should, we were not aware of this issue, what's the preferred way of dealing with this? Make the text smaller? Can we even fix it? 4) Is this a CW issue, it came in to design like this, is design supposed to be checking all the text on the site? 5) Is this hero image not part of the asphalt paving process? 6) I don't see a problem with this parking lot repair image, is this not how it looks? They are showing sealed cracks, I would argue that the hero image that it was changed to of a building on a clean looking parking lot actually isn't an accurate representation of repairs 7) I have to disagree with this. You see yellow lines in	Valid/Updated Mix	
Filler text in the video splash where the script normally goes. https://imgur.com/a/fhUl8kw	This was a newer upsell (not a silver/gold upsell) so no script was put in the video splash. CW did add the Name of Video, as required.	Updated	
SAP directory page city links were not connected. - https://snipboard.io/zKrheA.jpg	Invalid: On the CW backup, all of the SAP directory page links lead to the city SAPs. I tested a handful on the backup.	Updated	Agreed - Happened during Build https://snipboard.io/6xlth1.jpg
63: Dumpster Rental hero image below Hibu One image size minimums. https://snipboard.io/Q5dgNO.jpg	As per latest update, the minimum dimension allowed for hero image is 1200 x534 px. https://snipboard.io/OuMdZ9.jpg	Updated	
The open/closed widget should not be in the footer. When they are opened 24/7 in the business info you changed the hours from working hours to open 24/7. https://imgur.com/a/1BRHxXW	Invalid - changing the hours in business text results in the widget displaying 12:00 AM-11:59 PM.	Valid	You take out the business hours totally and only use the Additional Hours that state 24/7 Service Available. The Open/Closed widget shouldn't be used.
CW: The locations page should have the schedule service buttons. https://imgur.com/a/GlCG3vY	Invalid - the template does not deliver these buttons and they are on each individual location page instead of the landing page.	Updated	
The first H3 on SAP has to have the KW they purchased and the City, State. https://imgur.com/a/HkItQwI	Valid, but this rule was only clarified on the spec site on 4/9; this site was completed on 4/3.	Updated	
Footer spelling s/b "Myers" https://snipboard.io/lsA7eo.jpg	Invalid - it is spelled correctly on CW backup: https://snipboard.io/6U4QnD.jpg	Updated	Agreed - Happened during Build https://snipboard.io/lsA7eo.jpg

- 1.a Build is the ultimate font size and color guy, but I do not see the bold issues on the CW version.
- 1.b. Not a hard rule, more of a consideration. Your argument is fair.
2. I don't recall that one, but it doesn't mean it didn't happen. Did it make it to the dispatch/ spec sheet?
3. We see it from time to time, I think that is a good idea.
4. As far as I am aware, creating links and pointing them is the CW, color and format is Build.
5. Sealing is a part of what the biz does. Maybe a little specific, and the picture may not be the greatest for a paving contractor as I would hope to see more paving, but it isn't a wide whiff. I think a FYI is fair, but I do think feedback is worth it - the image undersells the paving part a little.
6. I agree with this, the subject is on point, but the repairs look like I did it. Spoilers: No one should hire me to do it.
7. I see it, the lines are also kinda freehand looking, too. If they supplied it, fair. Stock - I don't even know why that is in there, i'll kill it. <https://imgur.com/a/pgvctQc>
8. This one seems pretty clear on the real site, it is def a parking lot. As soon as I saw it, looked like our old building in a business park. We have a lot of clear streets in the resource, I do think this one was marked as I would. Perfect for commercial, parking lot, or MAYBE something general. I think it is a miss for streets, it doesn't give me street.
9. I don't see any clarity issues mentioned (full points for that category), can you share?
10. That is based on this: <https://imgur.com/a/lrS0Qe2>

56: Call and text wasn't requested. The mobile button and text above the phone number in the header indicates texting. https://snipboard.io/xkGfjX.jpg https://snipboard.io/9emLE3.jpg https://snipboard.io/1jvNTU.jpg	Invalid - if the field is not populated on the Q but texting is enabled in RCF view, the CW sets up call or text.	Updated	
Request an Estimate button text changed to "Request Estimate" per best practice https://snipboard.io/nivybr.jpg	Invalid - I can't find a rule that says the article cannot be included.	Updated	
Grammar/Spelling: Is all copy grammatically correct and is it spelled correctly?	Invalid - no notes for this section.	Updated	
Gallery button on Home page is incorrectly linked to Home page (https://snipboard.io/0VJy4Y.jpg). Linked button to Gallery.	Invalid - this is a build task.	Updated	
54: Replacing No-Nonsense etc. MoFac with Same-Day Consultations Available for SQOT (Speed, Time).	Invalid - free consultations was already added as a MF; while the CW could add same-day to speak to speed, what they did was not incorrect.	Valid	No-nonsense representation is unclear and doesn't speak to any of the SQOT qualities.
Grammar/Spelling: Is all copy grammatically correct and is it spelled correctly?	Invalid — No errors reported for this category.	Valid	Valid spelling error - unnecessary capitalization 53: TPO Roofing, last block: Contact s/b contact. https://snipboard.io/LKnkW7.jpg
Per Q220909 the client wants the home page with images for copy blocks	Invalid — CW used the PBN selected by the DSC. Switching icons to images is a Build task, and if the client wanted a different PBN, DSC should have selected it.	Updated	The issue is that examples for #3 are inconsistent. Some have the alternating images and some have the icons. This has been brought up to Paul.
BBB isn't an association, it's an org that checks business quality. https://snipboard.io/1fgdqN.jpg	Invalid — This has never been an issue before, and using it here is not prohibited: https://websitespec.hibuone.com/better-business-bureau-bbb-logo-usage#:~:text=into%20static%20images,-,Prohibited%20Usage,-Hibu%20will%20not	Updated	This Spec Site link is about logo usage. We need clarification on whether it can be considered under the Associations list.
Is the Request Form set up correctly?	Invalid — No error reported for this category.	Valid	There were drop downs left on the medical site form. https://snipboard.io/Y5j1ea.jpg
Is the Request Form set up correctly?	Invalid — No error reported for this category.	Valid	Same as above. https://snipboard.io/Al2zH4.jpg
Gallery: unused anchors should be deleted https://snipboard.io/3etz4E.jpg	Invalid — These are Build's responsibility.	Updated	
Driveway Services CAT: Buttons redirect to the wrong page. https://snipboard.io/MR67eJ.jpg https://snipboard.io/ZU0XzH.jpg	Invalid — These are correct in the CW backup. https://snipboard.io/SNFPsk.jpg https://snipboard.io/vrenw0.jpg	Updated	Agreed - happened during build
Missing period on Retaining Wall Companies SAP too. https://snipboard.io/o6xfJD.jpg	Invalid — This was already counted under the meta description column.	Updated	It's all the same error.
Septic Installation SAP also missing period. https://snipboard.io/QUsJxS.jpg	Invalid — This was already counted under the meta description column.	Updated	It's all the same error.
All 10 GEO pages: hero images are still not linked after a second FWR. adjusted by QA. https://snipboard.io/gwMZFP.jpg	Invalid — Not a CW error.	Updated	

Removed "Area" from META title tags across the site to reduce Home and CAT page character counts. FYI to Copy - "Area" should be removed from title tags before the vertical pipes are removed.	Invalid - There are conflicting rules. The QAF says the removal order is commas - Area - pipes (https://qaf-624.hibuwebsites.com/#:~:text=specific%20business%20name.-,Over%2060%20Characters%3F,-If%20the%20title) . The Spec site says it's pipes - Area - comma (https://websitespec.hibuone.com/title-tags).	Valid	Area was still included in the title when it was over character count. https://snipboard.io/4Sh25U.jpg
Reviews button on header not connected to reviews merchant ID in collection. https://snipboard.io/pe3xoy.jpg	Invalid — Writers do not do anything to this button.	Updated	At this time it was not a CW function
Banner service page: Related Links section missing https://snipboard.io/OvxXh4.jpg	Banner service page: Related Links section missing https://snipboard.io/OvxXh4.jpg	Updated	Invalid — Related Services widget is present in CW backup. https://snipboard.io/7jNcSC.jpg
All of the home page copy block buttons went to the Asphalt Services page. - https://snipboard.io/6CiTUn.jpg ; https://snipboard.io/aMfGuQ.jpg	Invalid — These are correct in the CW backup. https://snipboard.io/85VCQb.jpg https://snipboard.io/jAgWli.jpg	Updated	Happened during build https://snipboard.io/DLvFPH.jpg
CW should have added address due to Q221992 and Q220586	Invalid — Even if "customers can stop by clients home address," the Google Maps photo shows this has a house in a residential neighborhood that has no commercial signage and would be rejected by GBP.	Updated	
All CAT pages: all copyblock buttons linked to Specialty Roof Repairs CAT https://snipboard.io/anOzjq.jpg	Invalid — These are correct in the CW backup. https://snipboard.io/n0li31.jpg	Updated	
Is the Request Form set up correctly?	Invalid — No errors listed for this category, and site was started on 3/27 before this form was CW responsibility	Valid	There are errors listed for the superhero form, which is a CW task: "Other" appeared in form dropdown twice https://snipboard.io/usZgzV.jpg It will populate by default and does not need to be added manually.
Is the Request Form set up correctly?	Invalid — No errors listed for this category, and site was started on 4/2 before this form was CW responsibility.	Valid	There are errors listed for the superhero form, which is a CW task: https://snipboard.io/nveNQA.jpg Other appeared in dropdown twice. It does not need to be added to the collection manually, it will auto populate
74: https://snipboard.io/c6HQWp.jpg https://snipboard.io/hHxQPL.jpg CAT Buttons centered on mobile view.	Build received the CAT pages with the buttons already centered, so it was left as is per process. https://snipboard.io/dlupFa.jpg We tried adjusting the button but it appears to be glitched, it doesn't follow what alignment was selected. https://www.awesomescreenshot.com/video/51679330?key=e6837d37953b3207619b553412b01c18	Updated	The buttons appear to be left aligned in the Post CW view. https://snipboard.io/WzRc3v.jpg
2. https://imgur.com/a/KONPP6l Some of the links of the SAP directory are cut off on mobile.	2. This is the expected design of the SAP links in mobile, formatted into two columns to reduce scrolling.	Updated	Correct. This is a template issue.

Textable RCF: Was the textable RCF set up properly according to guidelines, when applicable?	Invalid - I can't find notes for this category, and there is already a RCF deduction in the phone number category.	Updated	
Projects folder was in the top level nav and mega menu .https://snipboard.io/ASnuG2.jpg	Invalid — This is a gallery page and is Build's responsibility.	Updated	
FWR to CW: Please add payment methods present on About page to Contact page. .https://snipboard.io/TZE0nX.jpg .https://snipboard.io/F0ZiBM.jpg	Invalid — This is Build's responsibility.	Updated	
Superhero form - changed form title to "Request a Service" per process .https://snipboard.io/Hs0GwK.jpg	Invalid — James is looking into this.	Updated	
Speed Queen Washers page - added warranty information from current site that wasn't included .https://snipboard.io/1yP6kl.jpg	Invalid — Questionnaire does not request this material.	Updated	
Speed Queen Dryers page - added warranty information from current site that wasn't included .https://snipboard.io/MS5qj4.jpg	Invalid — Questionnaire does not request this material.	Updated	
1 to 4 errors Some of the services descriptions have extra spaces.	Invalid — No examples provided of this error.	Valid	The example is in the Imgur link.
Jr is missing the period in the meta.	Invalid — Consistency about whether this kind of error in a meta is a meta category error or a grammar/spelling error is needed.	N/A	There are other meta errors. So even if we removed this error, it wouldn't change the score.
Metal Buildings page is not connected .https://snipboard.io/Cf0ag6.jpg it had been connected properly prior to CW adding the two new SAPs. CW needs to investigate how/why it became unlinked and restore that link.	Invalid — This is a technical issue that we've all been discovering as we go along.	Updated	We'll leave it at FYI until we get an answer.
breadcrumbs should not appear on Serving Area page	Invalid — The SAP Directory is not explicitly listed in either of the Spec Site lists about breadcrumbs and cannot be assumed to be included under Service Area Pages (SAPs): https://websitespec.hibuone.com/breadcrumbs	Updated	Added this to the clarification spreadsheet.
FWR to CW: NOB in every tag instead of any keywords. Please add keywords instead when title tag is below 40 characters. (Per AM, NOB was supposed to be priority before Monday and now that's changed.) .https://snipboard.io/kXft7.jpg	Invalid — This site was completed on 4/11 following instructions to prioritize the NOB over the 2nd keyword on 4/10. That rule was not changed until 4/14.	Updated	
.https://imgur.com/a/LcDIEw for the title tag of Car Maintenance Services both pipes should be removed before removing the comma in the geo if it is over 60 characters.	Invalid - The QAF says the removal order is commas - Area - pipes (https://qaf-624.hibuwebsites.com/#:~:text=specific%20business%20name.,Over%2060%20Characters%3F,-If%20the%20title) . The Spec site says it's pipes - Area - comma (https://websitespec.hibuone.com/title-tags).	Updated	Not sure when Paul mentioned it, but we're now supposed to follow the spec site rather than QAF 624.

https://imgur.com/a/rHOq7lb Quick turnaround times is not quantifiable. Quick to me could mean an hour where to the company it means within a week. I changed this to 50+ years experience.	Invalid — Quantifiable or not, customers are more interested in turnaround times promises than experience.	Updated	Quick turnaround is relative. There's no specific time frame associated with it. Neither are great Mo Facs, but the 50+ years gives the end user a time frame.
https://snipboard.io/JL7dNh.jpg These weren't corrected, please omit NOB from service pages per AI Management Console. https://snipboard.io/3jS8y7.jpg	Invalid — This site was completed on 4/11 following instructions to prioritize the NOB over the 2nd keyword on 4/10. That rule was not changed until 4/14.	Points given back on the original error, but valid on the FWR since the work didn't get done.	Per the notes in the Build case, CW indicated the AM told him he didn't need to do the adjustment. Whenever there is a spec update, we offer a grace period to allow teams to get used to the change. However we still FWR the work and the FWRd changes still need to be made to ensure the site follows spec.
Request form - "Request Call Back" title changed to "Request a Call Back" per process https://snipboard.io/ZKBwJf.jpg ;	Invalid — James in looking into this.	Updated	
1 to 4 errors Custom Wallpaper Crossed out text from local ranking text s/b deleted. https://snipboard.io/WJ57Cq.jpg https://snipboard.io/r5LRuQ.jpg	Invalid — This is correct in the CW backup. https://snipboard.io/r7vnxr.jpg	Updated	
Interior and Exterior Wall Graphics: https://snipboard.io/h623N4.jpg	Invalid — This is correct in the CW backup. https://snipboard.io/r7waKL.jpg	Updated	
Request form: article error https://snipboard.io/wRE8CF.jpg	Invalid: Valid error (checked CW backup) but this is a spelling/grammar error, which is a separate category.	Updated	
Commercial Demolition title tag, remove area and add pipe https://snipboard.io/Vbay4Z.jpg	Invalid: The geo used for the site is "Richmond, VA Area" not just Richmond, VA, so the CW has to leave "area" in the meta so it matches the hero/header. (Won't change points, since there is a valid error in this category)	No change	
https://imgur.com/a/erpDlzP About intro is more than 2 paragraphs.	Invalid — Per James, "S/B FYI - Covered on 4/22 email"	Updated	
1. Desktop Navbar: Areas Served anchor missing https://snipboard.io/5jAbGc.jpg 2. Tablet navbar: unused Service Area page should not be visible https://snipboard.io/WwaGJL.jpg 3. Mobile navbar: unused Service Area page should not be visible https://snipboard.io/7hAOVG.jpg	Invalid: Adding or removing pages from the navigation bar is not considered a build task, (except for Gallery and Blog pages).	Updated	
FWR to Build: -The gallery links dropdown highlights the previous button clicked instead of the current one. I don't know if there's a way to fix this.	Invalid: All anchors are linked correctly and the settings were look fine, however the selected states are not functioning properly. We attempted to fix the issue and also recreated all the anchors, but the problem persists. Assuming this is a technical issue.	Updated	
Gallery: unused anchors should be deleted https://snipboard.io/EtAJM3.jpg	In the post-build backup, no anchor dropdowns were showing in the navigation, whereas the QA screenshot shows hidden anchors under Pages. This may be feedback rather than an error.	Updated	

Gallery: unused anchors should be deleted https://snipboard.io/YZehXL.jpg	Upon checking the post-build backup, no anchor dropdowns were showing in the navigation (https://snipboard.io/fMmEtX.jpg). However, the QA screenshot shows hidden anchor links under Pages (https://snipboard.io/YZehXL.jpg). This could be treated as feedback rather than a error	Updated	
1. https://imgur.com/a/tYnCIE4 Text span on the Career page is over 900 px wide. https://imgur.com/a/slo45GD They do not have any associations we should just have the three brand logos. The National Association of Landscape Professionals and Garden Association are suggestions to get the DSC ideas of what to ask the client on the phone. If they are members of any association it will be in the blue print to the right of the question like it is in the question above about brands. https://imgur.com/a/T8Wmxr7 text in the header is not balanced. https://imgur.com/a/hl48h17 Since they do not have a garden bed page on their site and there is no cust in the file name I am assuming this is a stock image. We do not want to use stock images that have any trash in them. For example this one has a plastic bag. https://imgur.com/a/lbHqBX0 The raised garden bed hero does not show mainly raised flower beds. Most of the image shows ones that are not raised. https://imgur.com/a/e5j2AIR The brick patio hero show pavers and not bricks. https://imgur.com/a/0eZuwUo Cobblestone walkway hero shows pavers. https://imgur.com/a/P5ucoQt Gallery images can not be connected as it can make the images not show on the live site. FYI: https://imgur.com/a/H55MzYJ Under the new image guidelines copy block images should be a min of 1200 px wide this also applies to why choose images. 2. https://imgur.com/a/lGV7HwM Filler text on the video	1. As this was a rebuild site, as per the process we are required to retain existing images, logos, and other design elements as much as possible. and For some services, better-quality images were not available; therefore, the designer used the best available generic images from the stock library and mentioned this in the assumption. Can this be treated as feedback 2. Valid 3. Valid 4. Valid	Valid	1. If you look at the garden bed image, they are individual plants in a carrying crate. This is not a garden bed. Alternative images: shutterstock_1444022057.jpg shutterstock_438441979.jpg Cobblestone walkway is actually stamped concrete sections. Alternative images: shutterstock_1200936652.jpg shutterstock_1157916172.jpg
Gallery: unused anchors should be deleted https://snipboard.io/3etz4E.jpg	In the post-build backup, no anchor dropdowns were showing in the navigation, whereas the QA screenshot shows hidden anchors under Pages (https://snipboard.io/3etz4E.jpg). This may be feedback rather than an error.	Updated	
Slab leak page shows a radiator https://snipboard.io/p5F28q.jpg	The image is showing the "Leak detector" as part of the image and assuming that justifies the content of the page.	Valid	Leak detection in this instance is about water leaks. It should reflect a home foundation.
70: https://snipboard.io/Tpz2m8.jpg Reviews button same color as header.	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	

https://imgur.com/a/PQm1Puq Buttons background color can not be the same as the section it is on. https://imgur.com/a/MmoNbKM All provided images were not included on the Gallery. https://imgur.com/a/GaKHq0S Part of some of the links on the SAP Directory are cut off on mobile. https://imgur.com/a/yIVPnZr There is text in the home page hero image. This is not allowed based on the Hero image spec.	1. https://snipboard.io/PIUp7r.jpg - Reviews was is the form of stars, not button. Therefore did not change the bg color. 2. https://imgur.com/a/MmoNbKM - the same image was placed as video image on the footer, adding it again would repeat the image on the gallery page. Therefore excluded that single image from the gallery page. 3. https://imgur.com/a/yIVPnZr - text on the hero image was not in direct contact with the texts on the hero section. Therefore chosen that customer supplied image since hero texts were clearly visible.	Valid	3. The spec is that there should be no signage or logos in the hero images. Those images belong in the Why Choose section if applicable.
#70: Line spacing in content is too small making it hard to read https://snipboard.io/ZL67l5.jpg . This is throughout the whole site.	Assuming there is a technical issue with line spacing—although set to normal, some pages were manually adjusted to maintain proper spacing.	Updated	
70: Reviews button same color as header background. https://snipboard.io/2fGzDE.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
70: Reviews button same color as header. https://snipboard.io/It06U3.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
Reviews button was not in the same theme as the forms button in the header https://snipboard.io/16JDmK.jpg	The review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
Design Section Notes: na	Build score has been deducted under "Hero Images Build Score" section but there is no any comment or Design Section Notes mentioned	Updated	
37: This is an attorney that handles personal injury. Services drop downs and message fields should be removed from the request form regardless of what they had on the forms on their previous hibU website. This applies to the hero forms and the standalone form. https://websitespec.hibuone.com/form-restrictions-for-medical-related-service-websites https://snipboard.io/wAtxzY.jpg https://snipboard.io/290jdw.jpg 38: Because this business handles personal injury law, the message field needs to be removed from the form regardless of what they had on their previous hibU website. https://snipboard.io/GA4jgr.jpg https://websitespec.hibuone.com/form-restrictions-for-medical-related-service-websites	We were following this only for the Medical site, this new update was added to the spec site very recently (on 3/31/26), and there was no related dispatch or email on this. Can this be treated as feedback for now?	Updated	

Gallery: unused anchors should be deleted https://snipboard.io/sHohvu.jpg	In the post-build backup, no anchor dropdowns were showing in the navigation, whereas the QA screenshot shows hidden anchors under Pages. This may be feedback rather than an error.	Updated	
Gallery: unused anchors should be deleted https://snipboard.io/VFekPm.jpg	After checking the post-build backup, no anchor dropdowns were showing in the navigation (https://snipboard.io/6u8Ezw.jpg). However, the QA screenshot shows hidden anchor links under Pages (https://snipboard.io/VFekPm.jpg). This could be treated as feedback rather than a error	Updated	
1. https://imgur.com/a/MgH8TSI 6 images were supplied there is no gallery page and an assumption was not left. 2. https://imgur.com/a/e35wmnN In the header the lead in text and geo and phone number are not balanced.	1. https://snipboard.io/S0NAJ6.jpg https://snipboard.io/FtCHDq.jpg Only 4 of these images are appropriate to use in a gallery page, the other images supplied are logos of the business, associated brands, and portraits of a person. All but one image meet the minimum dimensions to be used in a gallery page. 2. https://snipboard.io/td7QCK.jpg In Build's post-backup, the header lead in text and geo and phone number are balanced.	Updated	Images: I don't see this error on the form.
Learn more is set to home. https://imgur.com/a/KnEIEnC	Invalid - the button is linked to the correct page on CW backup.	Updated	
1. About page is still a page and not a folder because CW did not change the mega menu nor test whatever they may have done. https://snipboard.io/WFMbwg.jpg	Invalid - this rule was not clarified/rolled out at time of site creation.	Updated	
56: Texting wasn't requested for the RCF on the Q. https://snipboard.io/cEwOM8.jpg https://snipboard.io/jlePF2.jpg https://snipboard.io/zjYg3n.jpg	Invalid - CWs follow RCF view and texting was enabled.	Updated	This has been clarified for the team
35: FWR to CW: Please create coupon for First Responder and Veteran discounts. https://snipboard.io/x5V2EW.jpg	Invalid - a first responder and veteran discount coupon was used on the home page.	Updated	
54: Replaced Price Matching MoFac w/ Discounts for SQOT (Offers).	Invalid - price matching is a fine hero MF since the discount was included in the why choose section and on home page coupon.	Valid	It seems like the stronger MoFacs were added to the Why Choose section, rather than the hero. Financing and Warranty info are also included both places. However the Discount is a guaranteed opportunity rather than price matching that may not be beneficial in certain situations.
Are all pages included on the site per the questionnaire?	Invalid - I can't find an error for this category.	Updated	
ALL hyperlinks on ALL but one service tab were directed to Home tab.	Invalid - all buttons are connected to their respective pages on CW backup.	Updated	There is another linking issue. Won't change the score
Internal Services/Products pages should only have 4 paragraphs unless the client provide specific extra content for us to add. https://imgur.com/a/sA3t6Sa	Valid but seems like invalid category - the content wasn't inaccurate. Shouldn't this be under 'Is the AI generated copy organized logically and easy to read?'	Updated	
FAQ tab retained duplicate line items multiple times.	Invalid - CW only worked the clone which was for SAPs.	Updated	

3. Gallery: unused anchors s/b deleted https://snipboard.io/DwU8t.jpg	3. Gallery page is hidden. https://snipboard.io/DwU8t.jpg	Updated	
4. Footer: inconsistent text color https://snipboard.io/Yl1a8m.jpg	4. Build's post backup shows the footer color is correct. https://snipboard.io/r8jll.jpg		
37: https://snipboard.io/nJ4krq.jpg https://snipboard.io/S7DaN3.jpg Name of student s/b included on form fill. Error as of 4/20 per AM.	Invalid: CW omitted this with an assumption (see CW assumption #4), and was advised by AMs that it was OK to do so. https://snipboard.io/A4gjYu.jpg	Valid	The sensitive data list doesn't include that information. https://websitespec.hibuone.com/sensitive-data-restrictions
Although requested on the questionnaire (Q219997), VIN# shouldn't be added to request form since it's considered sensitive data. Since this may indicate personal information about ones vehicle, spec site labels VIN#'s as sensitive data. https://websitespec.hibuone.com/sensitive-data-restrictions	FYI Please: Site was written on 4/13 which is within the first week of us taking over request form pages.	Updated	
Request button text needs to match. Header & hero say Request Quote, on req page button says Request A Quote.			
47: The Auto Glass Replacement button was mistakenly connected to the Auto Glass Repair page https://snipboard.io/XUAZIH.jpg	Button is connected to the right page on the post-CW backup: https://my.websites.hibu.com/preview/9d02e2d98811e5e5a7aba3dfed44a716?device=desktop	Updated	
Pool Plastering title tag missing pipe https://snipboard.io/dsYpv5.jpg	Invalid: AM restored post-CW backup to check this. Pool plastering is a SAP. It was properly connected to the collection on the CW save. https://snipboard.io/oFjcrt.jpg When I look in collections, title tags are correct and follow the same formula all the way down: https://snipboard.io/Fy9dT5.jpg Also, Charlotte (from QAE's screenshot) is not included in SAP cities. I don't know what happened between the CW and QAE steps, but I'm convinced CW did not make this error.	Updated	
https://snipboard.io/dUHpNG.jpg Lindenhurst, NY used for meta geo. Nassau and Suffolk COunty are the header/hero geos. According to multi serving area geo rules the meta geo should be Nassau County, NY (primary area)	Can we please FYI this? I can see why QAE is correct, and I reviewed this with CW. However, CW worked with AM Garcia to choose geos for each site element, and left an assumption saying so (https://snipboard.io/o5texP.jpg). AM Garcia was mistakenly thinking we follow this: https://snipboard.io/KbzWSc.jpg , as we are all figuring out how to navigate each possible scenario. I just hate to penalize a CW for trusting & following an AM's guidance.	Updated	

Nassau and Suffolk County, NY should be Nassau and Suffolk Counties, NY throughout site copy and meta descriptions.	Can we please FYI this? I can see why QAE is correct, and I reviewed this with CW. However, CW worked with AM Garcia to choose geos for each site element, and left an assumption saying so (https://snipboard.io/o5texP.jpg). AM Garcia was mistakenly thinking we follow this: https://snipboard.io/KbzWSc.jpg , as we are all figuring out how to navigate each possible scenario. I just hate to penalize a CW for trusting & following an AM's guidance.	Valid	This is simply a grammar error, not a mismatch error. The geo is essentially the same, just not formatted the same way.
Header and hero geo content needs state abbreviation https://snipboard.io/64blqE.jpg	Chicago North Shore is present in Yext (just like that without the state) and seems to be larger (region) than the individual cities listed... Can you show me where to find the rule saying geos must always contain a state, if that is true? Some regional geos are in multiple states and as far as I know it just needs to match Yext.	Updated	Recently clarified with Kim et al and will be reflected on the Spec Site shortly.
1. About, most services pages spelling "members of the Winnetka/Northfield/Glencoe Chamber of Commerce " s/b "members of the Winnetka-Northfield-Glencoe Chamber of Commerce " as per their website https://wngchamber.com/ 2. Home Electrical and Specialty CAT pages spelling " in the Winnetka, Northfield, and Glencoe Chamber of Commerce" s/b " in the Winnetka-Northfield-Glencoe Chamber of Commerce"	Since punctuation and capitalization are not usually deducted under spelling/grammar category, this deduction should be part of copy best practices/formatting category.	Updated	
multiple pages including videoscript, punctuation and formatting: "across Fargo, North Dakota, Moorhead, MN, and surrounding communities" inconsistent state formatting, s/b "ND" for north dakota to match MN for minnesota. should include semicolons after states "across Fargo, North Dakota; Moorhead, MN; and surrounding communities" otherwise the cities and states are all being treated equally as if they're all cities.	Since punctuation and capitalization are not usually deducted under spelling/grammar category, this deduction should be part of copy best practices/formatting category.	Updated	
47: Roof Installation CAT has wrong links across two copy blocks. https://snipboard.io/RXcJP3.jpg https://snipboard.io/pcN1zC.jpg	Copy block links on Roof Installation CAT are correct on post-CW backup: https://my.websites.hibu.com/preview/f022cc03690583d3b5a687bed9274f23?device=desktop	N/A	Agreed - Happened during Build There are other linking errors, so the score won't change
FWR to CW: -I believe we want the serving areas in the title tags and meta descriptions to match each other, and to match the header geo.	Invalid: Per Geo Display Rules At-a-Glance Chart, Title tags only ever mention one area, and metas may always be expanded beyond what is in header/hero.	Valid	Per the Spec Site, if there is one physical location, the geos match across the header, hero, title, and description. https://snipboard.io/Tmdb0k.jpg

https://imgur.com/a/6K6PqJz When the title tags are over 60 characters the pipes should be removed before the comma in the geo.	QAF and spec site give differently-numbered steps for removal. This leads me to believe there is not a definitive order for following the shortening steps, although both lists are numbered. This is on CW AMs' long list of questions to get clarity on, but can we FYI this in the meantime?	Updated	Agreed - Needs to be clarified. Has this been added to the feedback sheet for Product?
https://imgur.com/a/xbySdEO The geo page does not state where the business is located.	Previously the rule has been that we cannot claim a business is located somewhere that they are not, which the CW did not do here. This is on our list to get clarity on, and if we need to roll it out to the team at that point we can, but can this be an FYI for now?	Updated	Agreed. Be nice if sales sold the right products, eh?
SAP page error When looking for a decorative concrete contractor in (should not refer to business as in)	QAE seems to be thinking of a rule primarily for Geo pages. Here, it's reasonable to assume that the person looking for the services will be "in" that city, ST, and that the contractors will travel to that place to do a job. No one is going to attempt to visit a concrete contractor.	Valid	I think this is what the QAE is referring to. We don't want to imply that the business is IN one of the cities on the SAP list...unless it is. https://snipboard.io/8f6y9Z.jpg
FWR to CW: -You didn't format most of the title tags correctly. The QAF needs to be followed.	No screenshots, guidance, examples, or specific feedback given. I have no way to know what CW did wrong or whether this is valid.	Valid	QAE did upload the meta check feedback. But I'll remind her to expand on the error. It seems that most of the pages have a geo formatting error or are missing elements.
FYI https://imgur.com/a/Nh8dmYz https://imgur.com/a/Ucd7k87 On the request intro sentence it says call the same day. On the questionnaire it says the same business day. It is important that we put business day incase someone fills out the form on the weekend.	I know there was no deduction here but I want to clarify - On p. 185-186 of the HOFO the example screenshots show the word "today" and that was how Kim trained it. What's your understanding of this? Is this something we need to get more clarity on?	Valid	Pg 164 has the steps for completing the actual form. It indicates to fill out the text as in the questionnaire. https://snipboard.io/0edSlu.jpg
https://imgur.com/a/GXwpCXo The About page intro is not two paragraphs.	S/B FYI - Covered on 4/22 email	Updated	
https://imgur.com/a/F16yj2G Residential and Commercial was not included on the home intro paragraph.	S/B FYI - Covered on 4/22 email	Updated	
You need to add a coupon for the veteran and first responder discount, especially as it's not in the motivating factors.	No numbers given for these discounts, the last we heard, no numbers means it's not a coupon. I did coach the writer about choosing better mofacs (and there is also a deduction in that category for the site), however this didn't even qualify as a coupon, let alone required to have been made into one.	Updated	It could be used as a callout rather than a coupon since we've been told that one callout in the right gutter and one under the content is acceptable.
FWR to Build: -Related services menu is blank on all service pages.	Upon checking build post-backup and the QA pre-backup, the Related Services Menu is displaying correctly, and only showed blank in the QA post-backup. Build Post-Backup: https://snipboard.io/9HgqFX.jpg QA Post-Backup: https://snipboard.io/wn1zY5.jpg	Updated	Agreed - must be a tech glitch.
https://imgur.com/a/cYIFM5o About intro is not two paragraphs and does not have a linked CTA.	S/B FYI - Covered on 4/22 email	Updated	

https://imgur.com/a/rPSubrR Internal service/product pages should only be 4 paragraphs.	Invalid: CW used "Service - How to Know" layout, which comes with 5. https://snipboard.io/moDxTl.jpg https://my.websites.hibu.com/preview/6aa68f5a04544595a03ec5f09ad024ac?t=1763486189346	Updated	
https://imgur.com/a/rA7D8lv The service/product pages should only have 4 paragraphs of copy unless there is specific copy the client asked that we add.	Invalid: CW used "Service - How to Know" layout, which comes with 5. https://my.websites.hibu.com/preview/6aa68f5a04544595a03ec5f09ad024ac?t=1763486189346	Updated	
https://imgur.com/a/0q8KrkP About page intro is not 2 paragraphs and does not have a linked CTA.	S/B FYI - Covered on 4/22 email	N/A	There are other About page errors, so the score will not change
https://imgur.com/a/kY9VKw5 Since the Grading Services pages is on top-level nav it should not have the related services block.	Invalid: it is not there on the post-CW backup. https://my.websites.hibu.com/preview/2ac5b5c9a901546758176b8df2dd6e71?device=desktop	Updated	Agreed - Happened during Build.
https://imgur.com/a/wdeMFhT The CTA lead in says Get superior results today. However the questionnaire does not say they offer same day services.	Invalid: "Today" is commonly used in marketing CTAs to convey a sense of urgency. It is reasonable to understand that using the word "today" in a CTA is not the same as claiming the business offers same-day services.	Valid	I feel like the way it's used indicates that the work could be done today. If it was "Call today for a free quote" or "Reach out to us today to schedule your appointment", that would be closer to what you're talking about. But indicating "results today" implies immediate service.
https://imgur.com/a/oXsCpnP FB is not linked to their FB page	Invalid: It is connected in post-CW Backup: https://my.websites.hibu.com/preview/2ac5b5c9a901546758176b8df2dd6e71?device=desktop	Updated	Can't recreate the issue
Request form Q221805 says "next business day" but site says "same day" https://snipboard.io/J4TUXc.jpg	FYI please? Looks like CW forgot to fill out the form text altogether, but this should have been written within the initial "grace period" after we were trained on forms.	Updated	
Phone Number: Are the phone numbers listed correctly?	CW Error marked; no phone number errors mentioned in feedback.	Updated	
FWR to CW: -Shouldn't the rental search be under tenant resources?	All pages were present. Can this go under navigation best practices?	Updated	
FWR to CW: -The geos in the title tags and metas need to be consistent and match the header geo.	Invalid: Looked at this with CW during FWR: Some title tags have the word Area removed to reduce character count. This is prescribed per QAF: https://qaf-624.hibuwebsites.com/#:~:text=Remove%20the%20comma%20between%20the%20city%20and%20state%20abbreviation%20or%20the%20word%20%27Area%27%20or%20both. >> For businesses with two serving areas, Title tags should only list one primary area, per spec site: https://websitespec.hibuone.com/geo-display-rules#:~:text=Must%20match%20header-,Primary%20area%20only,-May%20include%20both >> The same chart on the spec site also says that meta descriptions may include both service areas. Based on this, CW's titles and metas were correct.	Valid	If the word area is removed in one page's meta, it should be consistent on all of them. https://snipboard.io/cHuP6F.jpg Additionally, some pages have Eagle & Boise, ID, which is also not consistent with other pages. https://snipboard.io/tMQf9D.jpg

https://imgur.com/a/3MOAeVh The footer should be set up as a hybrid with a direction button under the address.	Invalid: It's valid to assume this is a service area business and treat it as such. Roofers would fall under the same category as plumbers, where DSCs very often incorrectly will say that people visit them, but that is illogical. There's no showroom or any mention of in-person services, there is no real reason to believe people would visit.	Valid	There is a permanent location with a labeled office. If the customer requested to have the address displayed and there is a permanent location, we should include it. https://snipboard.io/eSN3jW.jpg
https://imgur.com/a/qrP8ptA The CTA link at the end of the About intro paragraph is missing.	S/B FYI - Covered on 4/22 email	N/A	Already removed
https://imgur.com/a/wk9CkTg The into paragraph on the home page did not include Commercial Roofing.	S/B FYI - Covered on 4/22 email	N/A	Already removed
Button name was not updated to match the form submission type https://snipboard.io/aLQfAT.jpg	FYI Please - site was written on 4/16 which is within our first week of taking over request form pages.	Updated	
Service drop down and message field should be removed for med spa business https://snipboard.io/aXOlsw.jpg	FYI Please? Hero forms were correct, and this was written on 4/16, which is within the first week after our request form page training.	Updated	
https://imgur.com/a/vC0RtUf About intro is not 2 paragraphs.	S/B FYI - Covered on 4/22 email	Updated	
https://imgur.com/a/j7wsm0U Prompt service is not quantifiable. Prompt to me might mean 30 mins and to the business they might mean in 2 weeks. I changed this to State of the Art Equipment to showcase their high quality of services.	Invalid: "State of the art" is also not quantifiable. Both are equally weak gestures in the direction of different SQOT factors. From other feedback I would think weak speed beats weak quality, or at the very least, neither of these paltry options should be an error.	Updated	Fair. Would be nice if the customer had actual reasons to call them, amirite?
https://imgur.com/a/yyghcZ3 Service/Product pages should only have 4 paragraphs.	Anatomy of an Internal Page linked below, leads me to believe five sections are acceptable. There is no duplicate content or inaccurate information on this page. https://snipboard.io/gnumeW.jpg https://my.websites.hibu.com/preview/6aa68f5a04544595a03ec5f09ad024ac?t=1763486189346	Updated	
https://imgur.com/a/xUl6leF The product/services pages should only have 4 paragraphs.	Anatomy of an Internal Page linked below, leads me to believe five sections are acceptable. There is no duplicate content or inaccurate information on this page. https://snipboard.io/gnumeW.jpg https://my.websites.hibu.com/preview/6aa68f5a04544595a03ec5f09ad024ac?t=1763486189346	Updated	
Contact page request forms incomplete	FYI Please - site was written on 4/7, before we were trained on request form pages	Updated	
About page: with multiple locations, About page replaced with folder for nested pages https://snipboard.io/jsMDOJ.jpg	S/B FYI - Covered on 4/22 email	Updated	
Siding Installation page missing from CAT page https://snipboard.io/kUhdjX.jpg https://snipboard.io/nDQyFt.jpg	Invalid: There is only one siding page (Siding Services) on page review and post-CW backup, and it is showing on its parent CAT page.	Updated	

1. About page is still a page but should be a folder when there are multiple locations due to about content being on the separate contact pages https://snipboard.io/CJnfV2.jpg	S/B FYI - Covered on 4/22 email	Updated	
1. Mini-Split (heating) page: unclear which version is correct. This is the version before the add-on https://snipboard.io/8xbXzp.jpg but it seems more correct than the post-add-on version. https://snipboard.io/YNu5Ez.jpg while the image of the second one is correct, it still has the text and hero elements from the homepage. unclear if this is a CW or Build problem - or both.	This was confusing but essentially, the DSC put in a clone to add AND an amends case, which overlapped - Heather's page was written the day before the Amend was completed. That was why there were two of the same page. CW did not put anything in assumptions about building two pages - we only added the one. Also the hero image issue was a Build task and CW left a note for build about it.	Updated	I remember this. It's too confusing to go through, so POINTS RESTORED!
54: Replaced Financing w/ Special Savings for SQOT (offers)	Invalid: Financing is a strong and very motivating offer that allows a lot more people to consider their services now instead of later. Special savings is too vague to mean anything.	Updated	Agreed! Financing is a hammer, I get it if the idea was "there is no info on financing", but special saving also tells me nothing.
49 - CW: No gallery meta was available. https://snipboard.io/WcKo0g.jpg	Invalid: The gallery page meta is still a QAE task	Updated	Accurate, we'll make sure we understand that one.
https://imgur.com/a/Puk49zb Text in the header is not balanced.	Upon checking the post build backup the elements on the header is aligned. https://snipboard.io/KSxLgV.jpg https://my.websites.hibu.com/preview/f00fae5812ad21243513fc59ad09e022?device=desktop	Updated	Agree, weird.
49: Images without alt text. https://snipboard.io/JdXixu.jpg FWR to CW: Meta Check doc must be in Build case. 66: https://snipboard.io/HjBwt4.jpg Home page has OpenGraph placeholder image. 70: Call/Text pop up has differently colored buttons, one with the same color as the text. https://snipboard.io/64Gpnr.jpg	49. The logo shown in the screenshot has not been used on the website. As per the process, icons and image placeholders do not require alt tags. https://snipboard.io/uPHbJY.jpg 66. Requesting for this to be treated as feedback for now. The rep who worked on this was not yet updated with this process since she was mostly working with Pre Live Amends Design from January 2026. She has been reminded about this 70. Assuming this as technical issue. The buttons ideally should follow the button theme settings without the need for additional Designer intervention. Upon checking the backup, the second button background color is not matching the theme settings. Please see recording attached. https://hibu365-my.sharepoint.com/:v/g/personal/reynan_delossantos_hibu_com/IQC4d_FCBA6sTotL9rXmmuj2Ad_Q7MTum7-HEnce4JQqchM?e=bBq5IZ	Updated - FYI	49. Fair 66: I'll give you this one, but I need you to lock it down - if they are in your queue, leveling 'em up will save you pain. 70: Fair, and thank you for the video! Now that we know, please check and address these manually until a fix it completed. We'll open a ticket.
Mobile CTA button was call or text rather than click to call.	Invalid: Checked CW backup, and the mobile CTA has the number, not the words, "call or text."	Valid	True, but we mean when you click it, it goes to the Call or Text Pop. https://imgur.com/a/hUp1ZUw . Delivered feedback to add "LINKED" for clarity.

When title tags are over 60 characters the pipes should be deleted before the comma. https://imgur.com/a/SaytbYt	Invalid: QAE didn't specify which pages had errors, but I spot checked a few title tags and didn't see any that had pipes or commas removed. The spec site also says "preserve clarity over rigid trimming" which makes it seem like there is a little more fluidity here when deciding which characters to remove if you're over 60 characters.	Valid	The one from the screenshot has an example where pipes were retained but the comma was MIA. The left column is the NOB and page slug. Agree, but that is last after the other three in sequence. Usually it is for Geos, extra KWs, etc.
Contact page: Q222956 payment types missing Q222956	Invalid: Marked as a CW error, but this is a build responsibility	Updated	Agreed, "About" or bust for CW. Internal feedback sent.
Removed "Related Links" from Pressure Washing standalone page: https://snipboard.io/UxSX2C.jpg	Invalid: This doesn't show on the CW backup - Build must have added.	Updated	Agreed, Build Error
Typo in the city for several descriptions "Tuscan, AZ" https://snipboard.io/rHDgKu.jpg	Invalid: I checked all of the SAP meta descriptions and only saw "Southern & Central Arizona" as the geo. Didn't find any instances of Tuscon or Tuscan.	Valid	I think that is the pre-FWR, this is on the post FWR (Meta was one of the things addressed). https://imgur.com/a/pyxqbE6 . Looks like it changed after Matt's and on Janet's from Apr 27, 2026 7:14
The geo in the header has to match Yext. https://imgur.com/a/q2JemLa They do not have a mobile number. https://imgur.com/a/K5b7Hlw There is filler text in the coupon. https://imgur.com/a/ksx37ez	Please review the 3 items to clarify these items as there is some uncertainty with them . Also review the item about the coupon.	Updated/Valid	Geo: Looks like he used the Geo that goes throughout the body (as per the Q in the questionnaire) opposed to what is to be used from Yext. Header, Hero, and Meta need to match. Mobile: The Q has no mobile #, looks like one is on the site (Clear it from Yext). Coupon: The link is broken, they look fine on the backup - Corrected
Coupon mentions homes, Q says discount is only for company jobs. https://snipboard.io/Mguz9m.jpg https://snipboard.io/bvfukN.jpg	Invalid: This was a typo on the Q. Should be "complete," not "company" - https://snipboard.io/rv6408.jpg	Updated - FYI	Shouldn't it match the questionnaire? That amend was after the site was built. If there are changes like this in the future, please leave an assumption.
duplicate copy blocks for Custom Ductwork and omission of Ventilation System Installation	Invalid: Ventilation System Installation is present on post-CW backup. https://my.websites.hibu.com/preview/ae47db334e7f826c8ebe10addc1fc070?device=desktop	Updated	Agreed - Happened during Build
Address/Service Area: Is the address and service area listed correctly?	CW Error marked, but Basic Business Information Section Notes says "na"	Updated	
33: FWR to CW: Per Q220281, client wants calls; please change callout button to show phone number w/ link. https://snipboard.io/mYozZF.jpg	"The customer's primary CTA method is "request an estimate" and their secondary is "calls" according to Q220143 and Q220281 on the questionnaire. "Contact Us" as a button in the callouts is acceptable for this situation. The Spec Site page on Click to Call Buttons says that CTC may appear in Hero Sections, Callouts, Coupons, and Footers, but it doesn't say that it's required. https://websitespec.hibuone.com/click-to-call For this client, leading to the Contact Us page gives site visitors both options. The CW didn't make an error, there are just multiple options that could have been selected in this situation	Valid	So yes. It does say that they "may" be included, which means they appear in those places but not always, depending on the site configuration. But if the button is strictly a Click to Call, it should always be formatted as a number. The only way it can be moved to a CTA (Contact Us, Call Us) is after the first proof. This indicates the buttons on the initial build should always be numbers. https://snipboard.io/4fYjaS.jpg

35: FWR to CW: Per Q220281, client wants calls; please change coupon button to show phone number w/ link. https://snipboard.io/mYozZF.jpg	“The customer’s primary CTA method is “request an estimate” and their secondary is “calls” according to Q220143 and Q220281 on the questionnaire. “Contact Us” as a button in the callouts is acceptable for this situation. The Spec Site page on Click to Call Buttons says that CTC may appear in Hero Sections, Callouts, Coupons, and Footers, but it doesn’t say that it’s required. https://websitespec.hibuone.com/click-to-call For this client, leading to the Contact Us page gives site visitors both options. The CW didn’t make an error, there are just multiple options that could have been selected in this situation	Valid	So yes. It does say that they "may" be included, which means they appear in those places but not always, depending on the site configuration. But if the button is strictly a Click to Call, it should always be formatted as a number. The only way it can be moved to a CTA (Contact Us, Call Us) is after the first proof. This indicates the buttons on the initial build should always be numbers. https://snipboard.io/4fYjaS.jpg
53: No space between periods on Commercial Storm Damage & Flood Recovery. https://snipboard.io/pXJIWn.jpg Decapitalize Why Choose bullet points where needed. https://snipboard.io/u76AXb.jpg https://snipboard.io/zJBN6H.jpg https://snipboard.io/iRwfTZ.jpg https://snipboard.io/KbB5iS.jpg https://snipboard.io/qQnylD.jpg	Since punctuation and capitalization are not usually deducted under spelling/grammar category, this deduction should be part of copy best practices/formatting category.	Updated	
2nd SAP content has keyword linked rather than city	Checked post CW backup and didn’t see any errors on the SAPs. H2s and all instances of “city, ST” seem to be connected correctly.	Valid	Looks like the Post FWR backup had the 2nd page disconnected. https://snipboard.io/QYnt1q.jpg
SAP page content for both pages should say “in” rather than “near” as they’re service based.	Checked post CW backup and the SAP copy meets the requirements without claiming the business has a physical location somewhere they don’t. The CWs haven’t been told they have to remove instances of “near” in the copy when working on a service-based business.	Updated	
https://snipboard.io/JD39XI.jpg motivating factors in the hero are not spaced on separate lines	Invalid: they are on separate lines and look normal on post-CW backup... https://my.websites.hibu.com/preview/e5060da1744cdf887b9364b0fe2498ce?device=desktop	Updated	
Changed geo in title tags to “NH, MA, & VT” as it just had New Hampshire, which didn’t match geo.	Per Geo Display Rules chart on spec site, Title tags may only ever have one geo. https://websitespec.hibuone.com/geo-display-rules#:~:text=first%20area%20listed-,Geo%20Display%20Rules,-%3A%C2%A0%20At%2Da%2DGlance	Valid	There was another meta error for missing meta doc.
https://imgur.com/a/y2iOR86 If the title tag character count is over 60 the pipes should be removed before the comma.	CW followed the QAF steps for removing characters, which unfortunately conflicts with the Spec Site. However, both are published resources and are fair to use. This discrepancy has been shared with Sarah and Paul and we’re waiting on a response.	Updated	Agreed - We’ve sent this to them as well.

49: Reviews description: "Call for free consultation." should be "Call for a free consultation." https://snipboard.io/9r8Kql.jpg	I am not aware of any rules on this. We use sentence fragments all the time in metas in the form of listing mofacs or services. Is it published somewhere that this is not allowed?	Valid	If there's room for proper grammar in the description, we should use it. Especially since there is punctuation included to indicate a sentence.
Motivating factors: Are motivating factors consistent with the questionnaire?	CW Error marked, but no feedback provided for this category.	Updated	
53: Playavista s/b Playa Vista. https://snipboard.io/Jap75X.jpg https://snipboard.io/gE4fQU.jpg https://snipboard.io/RA09Zz.jpg https://snipboard.io/dEITMU.jpg https://snipboard.io/PRx39j.jpg https://snipboard.io/wHpD5u.jpg https://snipboard.io/OxNeqF.jpg https://snipboard.io/R9mJwk.jpg https://snipboard.io/6Esfm2.jpg https://snipboard.io/1oVmNZ.jpg	Since this is specifically a geo issue, could we move this into the address/service area category?	Updated	
Header, Hero, videoscript, meta geo: three or more locations must use regional reference https://snipboard.io/1UWpgS.jpg https://snipboard.io/FERkU9.jpg Under: Is the video splash set up correctly on each page?	Valid error was taken in NATWE. CW selected an incorrect geo, but was consistent in their usage throughout the site. This shouldn't be deducted in the other categories as well, since the error was just in selecting an incorrect geo	Updated	
SAPs were not linked correctly. following FWR, the links were still not correct.	This site doesn't have SAPs, only GEO pages. Geo page title tags aren't connected the same way that SAPs are. CWs don't link images, so that deduction should be for Build, but was marked as CW error.	Updated - FYI	This is talking about the page URLs. When URLs are updated, the hero image collection also needs to be updated with the new URL so the hero image appears on the correct page. That's what drove the email on the 29th about sending to build after the CW updates the URL. We'll feedback this since it was before the email.
Is the meta description set up for each page?	CW Error marked but feedback given in SEO section was only about URLs	Valid	First error is for the geo being inconsistent. https://snipboard.io/dLcDWX.jpg
54: https://snipboard.io/PolvJ2.jpg Free Estimates MoFac s/b Free Estimates in 24-48 Hours for SQOT (Speed).	On the Q, the client stated that they provide estimates within 1-2 business days. This is similar to 24-48 hours, but it's not exactly the same and shouldn't be represented that way on the site, because of weekends. CW expanded on the motivating factor in the Why Choose section by adding "business hours" but that's not an option in the hero section, which needs to be succinct.	Valid	Okay. The 1-2 business days should have been included as that's the entire MoFac. https://snipboard.io/nwZ82j.jpg
Is the Page URL (Permalink) set up correctly for each page?	Invalid: No Page URL errors notes in the deduction notes for this site.	Updated	
SAP hero image links broken by CW during FWR for URLs. https://snipboard.io/CsVPLq.jpg	Invalid: This should be an FYI for CW, as checking for the image hero links isn't something they have been trained on and would need to be fixed by Build. QAE should leave a note in the FWR that the site will need to go to Build after CW.	Updated - FYI	This is what drove the email on the 29th about sending to build after the CW updates the URL. We'll feedback this since it was before the email.

Geo pages do not state where they company is located. https://imgur.com/a/qzNvt0G	Invalid: Geo pages are meant to be sold only for businesses that have one or more physical locations, not service-based businesses. Unfortunately, these Geo pages were sold for a pest control business, which makes the requirement of stating where the business is located nonsensical. The geo page copy does clearly define the service area for that page, though. I think exceptions will need to be made when the business itself doesn't fit the guidelines of the product as intended.	Updated	Agreed - Feedback is being given to product and (hopefully) sales about making sure the right products fit the right business type.
33: https://snipboard.io/feNWEu.jpg FWR to CW: per knowledge hub and Q220281, client wants calls, so button should feature phone number.	Invalid: The customer's primary CTA method is "request a call back" and their secondary is "calls" according to Q220143 and Q220281 on the questionnaire. "Contact Us" as a button in the callouts is acceptable for this situation. The Spec Site page on Click to Call Buttons says that CTC may appear in Hero Sections, Callouts, Coupons, and Footers, but it doesn't say that it's required. https://websitespec.hibuone.com/click-to-call	Valid	So yes. It does say that they "may" be included, which means they appear in those places but not always, depending on the site configuration. But if the button is strictly a Click to Call, it should always be formatted as a number. The only way it can be moved to a CTA (Contact Us, Call Us) is after the first proof. This indicates the buttons on the initial build should always be numbers. https://snipboard.io/4fYjaS.jpg
35: https://snipboard.io/feNWEu.jpg FWR to CW: per knowledge hub and Q220281, client wants calls, so button should feature phone number.	Invalid: The customer's primary CTA method is "request a call back" and their secondary is "calls" according to Q220143 and Q220281 on the questionnaire. "Contact Us" as a button in the callouts is acceptable for this situation. The Spec Site page on Click to Call Buttons says that CTC may appear in Hero Sections, Callouts, Coupons, and Footers, but it doesn't say that it's required. https://websitespec.hibuone.com/click-to-call	Valid	So yes. It does say that they "may" be included, which means they appear in those places but not always, depending on the site configuration. But if the button is strictly a Click to Call, it should always be formatted as a number. The only way it can be moved to a CTA (Contact Us, Call Us) is after the first proof. This indicates the buttons on the initial build should always be numbers. https://snipboard.io/4fYjaS.jpg
1. Footer: "and surrounding areas" s/b removed https://snipboard.io/0fk5pN.jpg	Invalid: "And surrounding areas" link is required in footer to link to SAP directory page, per HOFO instructions. In this case, SAPs were sold to a brick-and-mortar business with no service areas in Yext, but the footer link to the directory page is still a requirement.	Updated	
Motivating factors: Are motivating factors consistent with the questionnaire?	CW Error marked but feedback is not specific to motivating factors.	Updated	There was no error marked. It said Feedback, but I changed it.
3. CW assumption "Per Best Practice - did not include BBB." BBB still needs to be used in some form. best option is to simply add it to Listings Associations.	Invalid: we've been told it's safest to omit BBB altogether with assumption. We have asked Paul and Sarah for clarity on this and are awaiting a response.	Updated	
No address/serving area appears in footer/contact page Phone number missing from Contact tab Business hours missing Payment methods missing	Just needed Yext re-sync to fix entire site	Updated	

CW advised client would be contacted within 1 business day. Q states same-day callback.	Q221805 says "Same business Day" - is this considered a different timeframe from "within one business day"? I would expect them to mean the same amount of time.	Valid	It's always best to use what the customer has stated on the call/questionnaire.
Homepage: -View more offers button led to a 404 page.	Invalid: On post-CW backup, CW used the Offers page, and the button was linked.	Updated	
BBB was missing from associations.	Invalid: we've been told it's safest to omit BBB altogether with assumption. We have asked Paul and Sarah for clarity on this and are awaiting a response.	Updated	
42: FWR to CW: Additional payment options not added to About page, please add. https://snipboard.io/OEs7gQ.jpg https://snipboard.io/bYjkZl.jpg	Invalid: Additional payment options are present on post-CW backup. https://my.websites.hibu.com/preview/f86ac3779b0e99528685aa41fa448192?device=desktop	Updated	Agreed - Happened during build
Videoscript: unneeded space https://snipboard.io/8XonSs.jpg	Invalid: Not present on post-CW backup: https://my.websites.hibu.com/preview/03b8312f308aa275d4c6f4fd8543c80d?device=desktop	Updated	
1. About: Q222956 additional payment type missing https://snipboard.io/qCn11o.jpg	Invalid: Additional types are present on post-CW backup: https://my.websites.hibu.com/preview/03b8312f308aa275d4c6f4fd8543c80d?device=desktop	Updated	Agreed - Happened during build
49: GEO s/b consistent across SEO titles. https://snipboard.io/CbhxFP.jpg	Invalid: Current documentation on QAF and spec site say that the word "area" may be removed from titles when needed to meet character count. They do not specify that this should then be done sitewide. We have raised the question to Paul and Sarah about whether "area" needs to be removed from all titles or not, however at this time the documentation does not require it.	Valid	It does not need to be removed, but the geo is supposed to be consistent across titles and descriptions. If you remove area in one, it needs to be removed in all.
65: https://snipboard.io/LMf51n.jpg Blog on Contact section in nav bar. Blog also not published.	Invalid: Build errors. Blog is not present on post-CW backup.	Updated	
https://imgur.com/a/yTf5Dt The first H3 on a the SAP has to include the KW they purchased.	I cannot find this rule anywhere in the HOFO or spec site. I only know of the rule that the H1 has to be the keyword. In this case it was a difference of "builder" (kw) vs. "construction" (H3). Seems acceptable unless you know of a published rule saying otherwise?	Valid	On the Service Area Page of the Spec Site https://snipboard.io/8PUX4O.jpg https://websitespec.hibuone.com/service-area-pages-saps
Review button is not the same theme as request button https://snipboard.io/vqZwgb.jpg	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
1. header buttons mush match https://snipboard.io/NkuDSf.jpg 2. Mobile engagement menu: Get Directions should not be here https://snipboard.io/YRvdSJ.jpg	1. Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID. 2. Valid	Updated	

1. buttons should not match backgrounds and should match other buttons in the same section https://snipboard.io/nAlv2N.jpg https://snipboard.io/Wu5piK.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID	Updated	
Reviews button is not the same theme as the CTA button https://snipboard.io/SvE7sl.jpg	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	
1. mobile engagement menu request button 404 error https://snipboard.io/fctgUb.jpg 2. header buttons should not match background but must match each other https://snipboard.io/mpMe3l.jpg	1. Valid 2. Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	N/A	No error marked for the buttons
https://snipboard.io/7o4gjp.jpg Instagram gallery on gallery page not used and in template format so we would want to hide this anchor page and section on gallery page.	Invalid: As per the spec site if there is a request for Instagram gallery we add default gallery widget and create a anchor link, it was not mentioned in the guidelines that we need to hide the section or anchor.	Updated	Agreed - Instagram gallery isn't set up until the site is live
Header: buttons in this section should match https://snipboard.io/uDJ5xL.jpg	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.	Updated	Agreed
66: OpenGraph placeholder image on Concrete Walkway Installation SEO. https://snipboard.io/LWQt3R.jpg 70: Call/Text pop up buttons have differently colored buttons, second button same color as the font. https://snipboard.io/O5BnDA.jpg	1. Invalid: As per the dispatch we are checking the Open graph images only in home pages, we don't have any additional communications on checking in all the other pages https://snipboard.io/1GIDvy.jpg 2. Valid	Updated	
Review button is not in the same theme as the CTA header button https://snipboard.io/QfV6L9.jpg	Invalid: the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID	Updated	Agreed
47: FWR to CW: Locations buttons on footer have Request Quote link. https://snipboard.io/P6wobY.jpg https://snipboard.io/ubQlWz.jpg Per convo with AM, CTA links should really be going to the first location, not to the form fill; client primarily wants calls. https://snipboard.io/XerTpF.jpg https://snipboard.io/GDRMu3.jpg	Invalid - I agree it's strange to link to the form rather than location page, but HOFO says all links should go to the request page if form is present so CW was just following the rules.	Updated	The Spec Site indicates that all links in the footer for additional locations should go to the Location profile, not any other destinations. https://snipboard.io/0Zmzdp.jpg In the HOFO, it says that the location button should be linked to that location page. (letters don't match the list) https://snipboard.io/cMiFLs.jpg HOFO also says that the footer should follow the same formatting as the location, which means that the buttons should only be linked to the location's page. https://snipboard.io/QfS7yo.jpg
Reviews button not connected to header. https://snipboard.io/3bVTEB.jpg	Invalid - CWs do not handle this button.	Updated	Per the HOFO, CW updates the button for the CTA https://snipboard.io/QAKTSH.jpg

us a f Academy was not corrected/updated. AI Overview: Yes, "USAF" should always be capitalized as it is an acronym for the United States Air Force, a proper noun. When writing out the full name, it is correctly styled as the U.S. Air Force or United States Air Force, with the branch name capitalized.	Invalid - could not find a mention of "USAF" or "U S A F" anywhere on this site.	Updated	This error doesn't appear on the form for this account. Please double check the account information.
60: LR menu should be in page order. https://snipboard.io/2tdCli.jpg	Invalid - this is not an error by the CW; this is a local ranking task.	Updated	
Form dropdown did not have any items https://snipboard.io/c3bS2m.jpg	Invalid - this was a system error where collections was completed but the form dropdown was not connecting.	Updated	There were no assumptions or tickets opened (per the build case). Can you please make sure a note is left if there are tech issues? Then we can make sure to check it.
22: FWR to CW: Phone numbers for Harlan and Middlesboro Offices not on footer or on Offices page. https://snipboard.io/wk5AVF.jpg https://snipboard.io/ZpEcHd.jpg Please add.	Invalid - CW left an assumption for QAE on the original build that said: "The phone numbers in the footer and location CAT page came unconnected twice. CW added new text boxes and reconnected right before saving the site. Please confirm their connections stuck."	Updated	
49: FWR to CW: https://snipboard.io/TXvIZJ.jpg 4 duplicate descriptions. Medical Malpractice: with extra "Law," title over 60 characters. https://snipboard.io/BUZRNO.jpg Offices Title - ✖ Formatting Error - Does not follow required format for Serving Area or Other Page Types. https://snipboard.io/yx1tXp.jpg	Invalid - descriptions can be duplicate and all rules were followed.	Valid	Spec site says to avoid duplicate descriptions. https://snipboard.io/XN8QbT.jpg
49: Medical Malpractice is the original page title, Law not part of the page title. Puts it over 60 characters. https://snipboard.io/CX6sTE.jpg Two duplicate descriptions: https://snipboard.io/zvDqFN.jpg	Invalid - we didn't think the 'Law' in NOB also counted for page name.	Valid	The keyword in the title includes "Law" when it's not necessary. That could be removed to reduce the character count. https://snipboard.io/rzIKos.jpg
49: Specific product/keyword/page name should be on CAT titles. https://snipboard.io/7oFWxO.jpg	Invalid - 'Stair Building' is a clear enough keyword phrase. The CW removed the word 'Services' to ensure character limits were not exceeded.	Updated	

Drain Cleaning CAT, unbalanced copyblock needs image for balance with double blocks above
.https://snipboard.io/YBOe5M.jpg
Invalid — This is a Build issue.

Hydro Jetting CAT, unbalanced copyblock needs image for balance with double blocks above
.https://snipboard.io/uTzOZe.jpg
Invalid — This is a Build issue.

Sewer and Drain CAT, unbalanced copyblock needs image for balance with double blocks above
.https://snipboard.io/vzlhLq.jpg
Invalid — This is a Build issue.

Vacuum and Waste CAT, unbalanced copyblock needs image for balance with double blocks above
.https://snipboard.io/Mq7me5.jpg
Invalid — This is a Build issue.

Invalid — These are all Build issues.

Updated

On discounts page, third callout formatting didn't match the others.

Invalid — In the pre-Build backup, all 3 have the same formatting. https://snipboard.io/587bx3.jpg
In the post-Build backup, one of them has all caps.

Updated

Agreed - Happened during build

About page should just be an about folder with multiple locations .https://snipboard.io/YpRHKe.jpg

Invalid — This isn't official until May 5.

Updated

We have an email on 4/22 from Julie asking for feedback only for a week. That would have expired on 4/29
https://snipboard.io/V93M5s.jpg

More payment options, including Venmo, not on About page. .https://snipboard.io/c6reaw.jpg
Additional payments not on Contact page.
.https://snipboard.io/ug81bWW.jpg

Invalid — Payment Options are present in the CW backup. https://snipboard.io/Wo64zG.jpg

Updated

Invalid — This is Build's responsibility.

Updated

Gallery was left on nav even though it's empty and hidden.

Invalid — This is Build's responsibility.

Updated

Footer: unused "Serving Area" should be removed
.https://snipboard.io/Pf7EcG.jpg

Invalid — This is the link to the Service Area PSAP that's expected when SAPs are present. This site has no service areas in Yext, so the link replaces the "and surrounding areas." https://snipboard.io/SJuR8l.jpg

Updated

While it is supposed to be there, shouldn't it be under the address? It seems like it's there by mistake.

Contact: unused "Serving Area" should be removed
.https://snipboard.io/M5l7d2.jpg

Invalid — This is the link to the Service Area PSAP that's expected when SAPs are present. This site has no service areas in Yext, so the link replaces the "and surrounding areas."

Updated

While it is supposed to be there, shouldn't it be under the address? It seems like it's there by mistake.

CW: Contact form was on the contact page when the client didn't want their email displayed (Q221855).
.https://snipboard.io/CxKgHv.jpg

Invalid — This is Build's responsibility.

Updated

41: FWR to Build: Gallery s/b not published, only empty images. https://snipboard.io/hEGm7f.jpg 49: FWR to Build: Images without alt text. https://snipboard.io/jlQ0uv.jpg	41. Instagram Gallery was requested so Build displayed the Gallery page. https://snipboard.io/WKk2YV.jpg 49. The logo shown on the screenshot was not used on the website. Also per process, icons and image placeholders do not require alt text.	Updated	
About: s/b a folder, not a full page, with multiple locations. folder was created but hidden and pages were still nested under the About page https://snipboard.io/9JgBSQ.jpg	Invalid - the site was created on 4/28 and this rule did not roll out until the 5/5 update.	Invalid	Confusion due to email sent from CW.
Locations: better page balance would be 2 rows, 2 blocks each: https://snipboard.io/0ANsMP.jpg	Invalid - visual balance is not a CW task; build adjusts copy blocks when necessary.	Valid	There are other errors for the Contact/Locations page, so the score won't change.
Commercial & Industrial Mobile Repair page margins wider than the rest of the site https://snipboard.io/rLpf02.jpg	Invalid - the spacing error does not show on CW backup and this is not CW responsibility.	Invalid	Agreed - this is for build
Mega menu CAT pages should be collapsed if they're long enough to produce a scroll bar https://snipboard.io/UdZux0.jpg	Invalid - isn't this a build task?	Invalid	
Grammar/Spelling: Is all copy grammatically correct and is it spelled correctly?	I could not find an error for this category.	Invalid	Agreed - punctuation and capitalization errors
65 - CW: Related Services links section should have been hidden from the SAP - https://snipboard.io/Vpi2d3.jpg	Invalid - related services section does not appear on CW backup.	Invalid	Agreed - Happened during Build
Request page was hidden	Invalid - the request page shows on CW backup.	Invalid	
"and surrounding areas" hyperlink in footer directs to Home	Invalid - the link leads to SAP directory page on CW backup.	Invalid	
Is the Page URL (Permalink) set up correctly for each page?	I could not find an error for this category.	Invalid	
60: FWR to CW: No FAQs on Window Coverings Products and Services, please check this.	Invalid - I'm not sure what page the error is on; all service pages have FAQs on CW backup.	Invalid	
50: SAP URL incorrectly formatted. https://snipboard.io/j6GiXP.jpg	Invalid - HOFO says the url should be formatted as /SAP/keyword/city-st and /city-st is dynamically inserted so it doesn't need to be typed out.	Invalid	
Is the meta description set up for each page?	Invalid: No QAE notes for this category - only page URLs	Invalid	
Pricing, incorrect meta formatting for out-of-norm page https://snipboard.io/i1mAP4.jpg	Invalid: The Pricing page was set up like a core page, so CW followed that meta formatting.	Valid	The page should have been set up like an out of norm page since it isn't information about a specific product or service.
Gallery: unused anchors should not be on navbar https://snipboard.io/FjHL9c.jpg	Invalid: This is a build error - that team cleans up the Gallery page after they insert the images.		
Gallery: unused headlines should be removed https://snipboard.io/Bravu7.jpg	Invalid: Build team writes the headlines after they have decided what images to place on site.	Invalid	Gallery links and headlines are marked as a Build error https://snipboard.io/MeyLEW.jpg
About page Q223398: significant content requested but not used. CW did not include a complete assumption about it. https://snipboard.io/4LaU9f.jpg	Invalid: All content from Q223398 was used - it's below the dynamic content. QAE might not have scrolled down.		About page cotent is updated

Given Q220281, callout and coupon buttons need to be linked to phone number. https://snipboard.io/9cJdEv.jpg https://snipboard.io/QnEFCH.jpg (One deduction was in the callout category)	Invalid: As long as the CTA used in the callout or coupon is either the primary or secondary CTA from the Q, it's OK to use. The questionnaire says that the client want to drive form fills as the primary and calls as the secondary. The site has the phone number in the header (secondary) and the request form buttons in the callouts/coupons.	Invalid	
Given Q220281, callout and coupon buttons need to be linked to phone number. https://snipboard.io/9cJdEv.jpg https://snipboard.io/QnEFCH.jpg (One deduction was in the coupon category)	Invalid: As long as the CTA used in the callout or coupon is either the primary or secondary CTA from the Q, it's OK to use. The questionnaire says that the client want to drive form fills as the primary and calls as the secondary. The site has the phone number in the header (secondary) and the request form buttons in the callouts/coupons.	Invalid	
. https://snipboard.io/ptsyRq.jpg Review button on header not connected to collection.	Invalid — CW does not do anything with this button. It's supposed to come in linked.	Valid	It comes in linked on the template. But it looks like the CW removed/replaced elements and inserted a new widget button, which was not linked. https://snipboard.io/rykUHc.jpg
SAP bullets should not include "BBB accredited" without verification link . https://snipboard.io/f6b5Vc.jpg in the Was Inaccurate Information Removed category	Invalid — This was already counted in the mofacs category.	Invalid	Since there are no errors marked for the mo facs, I removed that error.
Additional payment types weren't added to the about page. . https://snipboard.io/1tWj8N.jpg	Invalid — Payment Options are present in CW backup. https://snipboard.io/QexYr6.jpg Curiously, they are also present in the Build and pre-QAE backups.	Invalid	
Is the SEO indexing blocked for the blog and ecommerce pages?	Invalid — No errors reported in this category, and CWs do not handle these pages.	Invalid	
as per CW assumption regarding PSAP title tag formatting: " The URL is fine. The formatting also follows the format that is here." CW included a link to QAF624, which we no longer use. CW should be using . https://websitespec.hibuone.com	Invalid — The QAF has not been retired.	Invalid	The Spec Site is supposed to be the primary source for hibu best practices and rules. While the product team attempts to update both, we should be using the Spec Site first. Only using the QAF means that updates may be missed.
1. Tablet and Mobile navbars: Areas Served missing https://snipboard.io/V3zNFY.jpg https://snipboard.io/hPvqJo.jpg	Build received the job with the Areas Served not added to the tablet and mobile navigation. https://snipboard.io/3tNpLx.jpg https://snipboard.io/C03Eum.jpg	Invalid	
66: https://snipboard.io/Eex0P4.jpg Window Replacement SAP image file name not formatted correctly.	The file name appears to be correct.	Invalid	

31. The background of the popup is white and the font was white so could not read the script. QA changed the background to red. https://snipboard.io/eSXost.jpg 41. Questionnaire Q221371 requested that artist try to import existing blog, please try to import from their existing site and publish . If this could not be completed, please leave an assumption. 66 Serving Area page: Please add image next to the intro paragraph per new training/guidelines effective 5/5 Also, on the About page, under Brands, there are notes to CW/Artist from DSC: "list of makes on HOME page Q220013, assuming since client gave a signed consent form, referring to all the car brands on the old site: https://snipboard.io/EMDBZY.jpg FWR to Build to add auto brand logos on the footer.	31. May this be considered as a technical issue? Upon checking on build's post backup, text color was set to black. https://snipboard.io/nHQsT3.jpg 41. Blog couldn't be imported as the feed URL is invalid. https://snipboard.io/mZSH34.jpg 66. Build received the job without the image beside the intro paragraph in Serving Area page. https://snipboard.io/O0xQIs.jpg Regarding the brands listed in Q220013, it's not clear that build should refer to the existing site for the list of brands. Build understood the line as add "List of Makes" on home page. Build left an assumption regarding this. https://snipboard.io/sTMBWL.jpg	See notes	31. FYI - We can update for now, but agent should also visibly check the font to make sure it is visible and adjust accordingly. 41. Valid - Assumptions should always be left if the blog cannot be imported. 66. Agreed - will get feedback to the CW About page - this instruction is to refer to the list of makes on the existing home page.
1. Gallery page not created, 6+ customer images 2. Dark text on dark background is illegible for reviews widget. Please update all reviews widgets to white text. https://snipboard.io/9qWLSl.jpg	1. There is no provided images and no specific instruction to add gallery page using existing site. Build dropped an assumption regarding this. https://snipboard.io/aIQeST.jpg https://snipboard.io/oeWtaO.jpg 2. Invalid, as during site editing https://snipboard.io/H0T3MX.jpg, the color was changed to white sitewide. However, there was no visible indication in the default view showing whether the text color was set to black or white, since there was no actual review yet, making it difficult to identify during layout checking.		Per Q220786, it tells us to use images from the existing site. Per the Hibu One for Operations document, when 6+ images are provided, the gallery should be created. It doesn't need to be specifically asked for. https://snipboard.io/3ARIsN.jpg 2. Agreed - bringing this up on the Websites call.
1. Unused Gallery page should not be on all navbars https://snipboard.io/ETraU7.jpg	1. https://snipboard.io/pXGReI.jpg - on Q221045 in questionnaire, it is stated that an Instagram Gallery is requested. Hence, a Gallery page should be visible.	Invalid	
Engagement menu: -Text us button had wrong number.	The Engagement menu button is linked via connected data in the Listings Dashboard. Modifications to the Dashboard are outside the scope of the Build process.	Invalid	
FWR to CW: Any mention of West Moreland County needs to be changed to Westmoreland County.	Invalid - although CW should google unfamiliar geos, this is how it was entered by DSC on the questionnaire.	Invalid	
Video widget: script missing https://snipboard.io/Hy0KE7.jpg	Invalid - CW used existing video script and removed text box in widget per upsell process.	Invalid	

Q222917 Q221082 Q222918 Q222524 multiple requested content items not found, should be copied from their existing site as mentioned in questionnaire https://snipboard.io/wVeWmk.jpg buttons appear on homepage and reservations is at the top of all menu pages.	Invalid - There were no specific instructions to link to Grubhub/Doordash and CWs are not expected to pull content from FAQs. DSC is instructed to provide explicit instructions on what content to include and where. No specific instructions were provided to include the mentioned content items.	Valid	Some of these questions are from the Motivating Factors, which CW reviews to decide the best options for the site. CW has the discretion to add those items to the site for more information.
CW: alternate phone number in Yext was incorrect. – CO: https://snipboard.io/TS2FON.jpg Yext: https://snipboard.io/hlZr3L.jpg	Invalid - this account had an RCF, so the assistant target phone became the alternate phone: https://snipboard.io/StIId6.jpg	Valid	The number that should be in Yext is the provisioned number (757) 780-1097 not the target number. https://snipboard.io/StIId6.jpg
Pain Management page: incorrect bullets https://snipboard.io/VMwSvK.jpg	Invalid - the bullet spacing is correct on CW backup: https://snipboard.io/SmvoC2.jpg	Invalid	Agreed - Build Error
CW: SAP URLs are incorrect. - https://snipboard.io/oUX9s3.jpg	Invalid - per the 5/5 update, the URL should be /sap/{sap-keyword-term}/{city-st]	Valid	The instruction in the previous Spec Site update indicated that the [city-st] is inserted dynamically. https://snipboard.io/TX8z9n.jpg
Primary CTA Calls, not used prominently, should be hero button https://snipboard.io/D1xBwg.jpg	Invalid - this site has the additional locations product with unique phone numbers; per process, this should be a button linking to the locations landing page.	Invalid	
Contact: san antonio Get Directions linked to wrong address https://snipboard.io/Bt0uC4.jpg	Invalid - 'get directions' button was properly linked but connection dropped.	Valid	There are other Contact page issues, so the score won't change.
Urgent Care page should not have main navbar as related links https://snipboard.io/4rXt7o.jpg	Invalid - there is no related services widget for this page on CW backup.		
Mobile header unbalanced with single button. one button for each location or a Call button are recommended https://snipboard.io/CUzwSM.jpg	Invalid - the correct process is to link to the locations landing page and remove the extra button if there is not a secondary CTA.	Valid	There are other linking errors, so the score won't change.
Serving Area title tag: second keyword missing https://snipboard.io/l6rxy.jpg	Invalid - CW followed the correct format of [Business Type or Primary Keyword/(s)] Near You in [Geo (City, County, or Area)]	Invalid	
50. Serving Area page url is missing	Invalid - the URL shows properly on CW backup	Invalid	
47: Anchor on Fremont should redirect to REQ section on that page. https://snipboard.io/CR7hm6.jpg	Invalid - both buttons are linked to the request section on CW backup.	Valid	The Post CW Backup has all location page Request forms linked to East Hampstead https://snipboard.io/PoEkAl.jpg https://snipboard.io/YsWDn0.jpg https://my.websites.hibu.com/preview/9ee896ba114c8064fc4b484b4ade287b?device=desktop
Same with Anchor on Stores page. https://snipboard.io/NugE3Q.jpg			
49: Avante Garage Doors - Title - ✘ Consistency Error - "Avante Garages" should align with page name/topic ("Avante Garage Doors").	Invalid feedback - the keyword phrase describes the page content well enough without the word 'doors'.	Valid	The title should be specific to the page. Omitting "doors" gives the idea that they sell garages and could lead search engines to that page when users are looking for garages. https://snipboard.io/cjD2N0.jpg
60: Gallery section s/b hidden on Fremont page. https://snipboard.io/vUiESy.jpg	Invalid - this is a build task.	Invalid	Agreed - Build Error
Are all links for buttons, images and text linked correctly?	Invalid: All QAE notes for this category should be under the "headlines and body copy" category	Valid	the last line is about the links on the Serving Area page not set up https://snipboard.io/BegYQE.jpg

There is no special offers page, but the button was left on the Roofing Services landing page. https://snipboard.io/PgG3e1.jpg	Invalid: This button doesn't show on the CW backup	Valid	It is on the CW Backup https://snipboard.io/HwRuCN.jpg https://my.websites.hibu.com/preview/2bd0f179a83205a595a1f72287ebdabf?device=desktop
Two of the services are on the nav rather than the mega menu, and crime scene cleanup is missing.	Invalid: These errors don't appear on the CW backup. All Cat 1 pages are in the mega menu.	Valid	Hoarding Cleanup Services and Commercial Carpet Cleaning pages are missing from the CW Backup. https://snipboard.io/O1EpQ0.jpg https://my.websites.hibu.com/preview/8d235b4167e1cb3641ab50b17117d37e?device=desktop
Home page link repeats on nav bar. https://snipboard.io/BN6MLn.jpg	Invalid: This doesn't show on the CW backup	Invalid	
Replaced Fair Pricing w/ Licensed Workers for SQOT (Quality)	Invalid: These two MoFacs are on the same level. It's OK with QAE prefers one over the other, but there is no error here.	Invalid	
Request Consultation form: business misspelled. https://snipboard.io/OTIQ9t.jpg	Invalid: "Fence Dynamics" is what shows on the CW backup. Not sure what QA is seeing.	Valid	The word "business" is spelled wrong https://snipboard.io/irmTje.jpg
All notes from this category - "Was the content used in the site per questionnaire instructions?"	All product details were included by Build, not the CW. CW only set up the basic page structure following Paul's instructions. I verified that all of the sub-categories were included from Paul's document. It seemed like Build missed keying in some products, though.	Invalid	
Is the AI generated copy organized logically and easy to read?	Invalid: No QAE notes for this category.	Invalid	
Per Q220281, client wants calls so callout button s/b phone number. https://snipboard.io/ChSyi2.jpg	Invalid: The client's primary CTA is form fills and their secondary is calls. It's OK to go to the request page in the callout. Phone number is secondary and is also in the header and throughout the copy.	Invalid	
Gallery URL s/b Our Work to match page name. https://snipboard.io/K7bZEW.jpg	Invalid: This is a Build error	Invalid	
Template/blank social icons were left on Contact page. - https://snipboard.io/IJWGnZ.jpg	Invalid: This is a Build error	Invalid	
Is the Page URL (Permalink) set up correctly for each page?	Invalid: No QAE feedback for this category	Invalid	
Textable RCF: Was the textable RCF set up properly according to guidelines, when applicable?	Invalid: No QAE feedback for this category	Invalid	
Pickup and Delivery text s/b added to About page. https://snipboard.io/MYuAN8.jpg	Invalid: Q223289 says the business offers in-store pickup and delivery, but this is info that is supposed to be added to Yext manually by the Listings FF team. It's not a CW responsibility to update this. Maggie is looking into why this may not have happened correctly for this site. This won't change the score, but just an FYI.	Invalid	Agreed - CW has never added this as it's a Yext field

SAP URLs were incorrect. Do not include the city, st/geo in the URL https://snipboard.io/Y6SVle.jpg Serving Area page URL was incorrect/changed when it doesn't need to be. - https://snipboard.io/Y6SVle.jpg	Invalid: Valid error, but conflicting circumstances. SAP slug format is "/sap/keyword/city-st" but the city-st is dynamically inserted, so CW shouldn't fill that out manually. CW will only see "/sap/epoxy-concrete-floor" and should not manually add the city-st to the page URL. There was confusion due to phrasing on the spec site. The clarification email was sent on 5/20 with the latest dispatch update. Requesting feedback only. Invalid: Unfortunately, there is nothing published currently on the Spec Site for the SAP Directory page slug. We clarified on 5/20 that CWs should use "/serving-area" until something is published, but before that there was phrasing on the Spec Site implying a keyword was needed for this slug. Phrasing has now been taken down, but it was after this site was written.	Invalid	FYI'd due to conflicting information
All FAQs on all service pages were duplicated. - https://snipboard.io/bWBNxE.jpg https://snipboard.io/r0W2mQ.jpg	Invalid: I checked the CW backup and saw different FAQs on each internal page. QAEs first screen shot doesn't show the page name, so I can't tell which page they were looking at that has laboratory FAQs on it.	Valid	Laboratories Page: https://snipboard.io/al7XdM.jpg
Related Services widget left on SAP and is empty. https://snipboard.io/2aynNt.jpg	Invalid: I checked the CW backup, and the Related Services menu doesn't appear on any of the SAPs.	Invalid	Agreed - Build error
SAP URLs were incorrect. Do not include the city, st/geo in the URL https://snipboard.io/Y6SVle.jpg Serving Area page URL was incorrect/changed when it doesn't need to be. - https://snipboard.io/Y6SVle.jpg	Invalid: Valid error, but clarification on this issue wasn't sent to CWs until 5/20. The SAP URL on the CW backup says, "/sap/home-remodeler/bossier-city-la" but there shouldn't be a city there at all. It should stop at keyword, since the city will pull in dynamically. Invalid: There is nothing published on the Spec Site for the SAP Directory page URL, unfortunately. We clarified on 5/20 that CWs can use /serving-area until something is published.	Invalid	FYI'd due to conflicting information
Hard to see but this appears to be a residential address and clients don't visit it. Removing from Contact page. https://snipboard.io/gC2tqH.jpg	Invalid: When a service-area business requests to show their address, the CWs put it on the contact page. Q220467 says the client does want to display their address. We will not use this address anywhere else on the site, however.	Invalid	

Serving Area goes after About in the page order. https://snipboard.io/OjGa0x.jpg	Invalid: Incorrect category. This is already deducted in the navigation best practices category, where it's marked as valid.	Invalid	
Mega Menu items s/b expanded. https://snipboard.io/p0Al0b.jpg	Invalid: This isn't a CW responsibility, since Build has to rearrange the layout of the mega menu to avoid scrolls		
Replaced In Business Since MoFac with Fully Licensed and Insured for SQOT (Quality)	Invalid: Being in business for over 50 years speaks to the quality of a business as much as being licensed and insured. This is fine for the CW to use in the absence of more specific or promising mofacs	Valid	Being in business for a length of time doesn't necessarily indicate quality. But being licensed and insured speaks to a solid advantage to the customer if concerns arise during a job.
Address/Service Area: Is the address and service area listed correctly?	Invalid: No QAE notes for this category, only callouts.	Invalid	
As client wants calls per Q, secondary CTA button on Callouts s/b button with phone number. https://snipboard.io/5sJFhQ.jpg https://snipboard.io/glZ7Nn.jpg	Invalid: It's fine to use the primary CTA in the callouts. In this case, that is form fills. The phone number is in the header and hero, so it shows on every page of the site as the secondary.	Invalid	
Pick-Up and Delivery options s/b on About page. https://snipboard.io/U2wbn.jpg https://snipboard.io/uETfyZ.jpg	Invalid: This is info that is supposed to be added to Yext manually by the Listings FF team. It's not a CW responsibility to update this.	Invalid	Agreed - CW has never added this as it's a Yext field
SAP h1 and h2 are not linked correctly. H2 is unlinked, h1 goes to the wrong collection. https://snipboard.io/vnxCgw.jpg	Invalid - headlines were connected properly on CW backup: https://snipboard.io/9xySl6.jpg	Invalid	Agreed
Serving Area still in wrong place on navbar https://snipboard.io/picJvX.jpg	Invalid - the page is in the correct spot on CW's post-FWR backup; build must have moved it.	Invalid	Agreed
47: Exterior Cleaning: Power Washing block link redirects to Home. https://snipboard.io/tlAJN9.jpg	Invalid - the link goes to the correct page on the pre-build backup.	Valid	I see it broken on her 11:35 (last) back-up: https://my.websites.hibu.com/preview/9e40de1438001f0966fa97676347f41b?device=desktop .
FWR to CW: Wrong connection on Power Washing Companies SAP hero text. https://snipboard.io/M1pxtn.jpg	Invalid - the hero is connected properly on the pre-build backup: https://snipboard.io/KQCMpb.jpg	Invalid	Agreed
FWR to CW: Two of the paragraphs on the SAP page aren't linked.	Invalid - I'm not sure where the error is; the SAPs have a core page linked in the first paragraph and CTA links in the first and last paragraphs. A link is not required in the SAP directory page intro.	Valid	Looks like the actual city links in the SAP page slug had issues, I gave the agent feedback regarding the lack of a screenshot. https://imgur.com/a/BgawjOI
49 - CW: Missing a location according to the SAP locations on the plan. https://snipboard.io/MygRoj.jpg https://snipboard.io/bVlSiG.jpg	Invalid - this is not an error made by the CW; the cities pull from SF.	Follow up	Q: in these instances, do we expect the team to double check that the order matches the output?
AI meta check doc missing from Build case https://snipboard.io/ms0bc2.jpg	Invalid — As of 5/12, these go in the DSC files.	Invalid	

Home meta title tag and description is incorrect..https://snipboard.io/dcDSq0.jpg Title - Formatting Error - Missing pipe between keyword and geo; should be [Core Keyword] [Geo Location] [Name of Business]. Description - Formatting Error - Does not follow Home description format (should list specific keyword phrases followed by benefits/offers)."	Valid — But this is in the wrong column. It should be a meta error, not an SEO indexing error.	Invailld	
.https://snipboard.io/vPBmkw.jpg SAP URLs for new pages are incorrect	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depended on where you looked. https://snipboard.io/D90M8x.jpg	Invailld	FYI'd due to conflicting information
footer: address needed .https://snipboard.io/fmTXho.jpg	Invalid - Per copywriter assumptions, this site was built believing all services are provided virtually and no visits are needed.		
CW assumption "built as a service based business because it appears they focus on virtual appts, since they said people dont visit them. no open/close widget either." but no evidence of this in questionnaire. only mention of "virtual" is virtual consultations for their request form and only one page for Teletherapy. Open/close widget should be restored.	Invalid — The evidence in the questionnaire is that it says people do not visit them in the question that specifically asks about this (Q220918).	Invailld	Looks like the DSC asked the question and marked the questionnaire incorrectly. The location should have been on the site as a brick and mortar location, but DSC didn't mark it that way. https://snipboard.io/CpE8LF.jpg
Home title tag: remove area, add pipe .https://snipboard.io/l8m5cH.jpg	Invalid - "Area" is fine in title tags. This came up in another FWR that I checked with James about. There is no rule against using "Area."	Valid	Removing extraneous words from the title to maintain the formatting is ideal. Area can be included if there's room, but that's a good word to remove if you need the space.
.https://snipboard.io/ZbthKa.jpg SAP URL not correctly formatted as of 5/5/2026.	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depended on where you looked. https://snipboard.io/D90M8x.jpg	Valid	There are other meta errors, so the score won't change.
QA has added the footer address that CW would not add.	Invalid — Still not an error. Per copywriter assumptions, this site was built believing all services are provided virtually and no visits are needed.	Invailld	
Home title tag: pipe was still missing, now added.	Invalid — Still not an error.	Valid	Removing extraneous words from the title to maintain the formatting is ideal. Area can be included if there's room, but that's a good word to remove if you need the space.
https://snipboard.io/EFt8i3.jpg As of 5/5 the SAP URL format is changed. This uses the old format.	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depended on where you looked. https://snipboard.io/D90M8x.jpg	Valid	There are other meta errors, so the score won't change.
.https://snipboard.io/oEZrWk.jpg SAP URL should be sap/keyword	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depended on where you looked. https://snipboard.io/D90M8x.jpg	Invailld	FYI'd due to conflicting information

: The SAP page URL's aren't using the correct format. .https://snipboard.io/raW5IE.jpg S/B: /sap/ac-services	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depended on where you looked. https://snipboard.io/D90M8x.jpg	Invalid	FYI'd due to conflicting information
Delivery s/b on About options. .https://snipboard.io/1Pvbda.jpg .https://snipboard.io/vWREVN.jpg	Invalid — CWs don't change this field in Yext.	Invalid	
All Service pages: NOB period error Why Choose H3 .https://snipboard.io/2hs0uo.jpg	Invalid — Period is part of the NOB and the NOB is not in the middle of a sentence, so period is correct.	Invalid	This one is a challenge. I do think it looks weird, because the period makes it look like a sentence, which throws off the look. I also couldn't find ANYTHING that really landed on it, either way. FYI for now, I'll try to get it settled/addressed somewhere on paper.
FWR to CW: SAP URLs incorrectly formatted as of May 5th. .https://snipboard.io/ZfdtL4.jpg .https://snipboard.io/SZzBkA.jpg .https://snipboard.io/sriVll.jpg .https://snipboard.io/L0CZqG.jpg .https://snipboard.io/ZR8Tla.jpg	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depended on where you looked. https://snipboard.io/D90M8x.jpg	Invalid	Q: We had that training that rolled on 5/5. Did the agent miss the training? I thought the buffer between training and roll out was the grace period, but I am open if I misinterpreted the scenario for the floor.
Desktop and Mobile headers: Unclear why Request button was removed while there is still an active request page. Button should be replaced unless there's an explanation. https://snipboard.io/Y45qAo.jpg https://snipboard.io/tlY8nD.jpg	Invalid: Q219997 and Q221824 say that the client declines a secondary CTA (they don't want to drive visitors to complete the form from the hero) but they do still want the request service page. CW followed questionnaire request. (QAE didn't update the header to include the Request Form button.)	Invalid	Fair. Weird request, but this did match what the questionnaire was trying to say.
47: REQ button on header redirects to Home page. https://snipboard.io/8GVdl9.jpg	Invalid: It goes to the correct page on post-CW backup. https://my.websites.hibu.com/preview/29cae6dc9d97221a9343515d9116b8e6?device=desktop	Invalid	
49: Gallery Description - **Formatting Error** - Should include the Name of Business. https://snipboard.io/el54bf.jpg	Invalid: Gallery metas are QAE responsibility	Invalid	
page description series usage "custom embroidery, logo design, and promotional products & services" s/b "custom embroidery, logo design, promotional products, & services"	Invalid: Second example removes context from the word "services," essentially listing "services" as an item by itself which could be or mean anything. The business offers "promotional products & services," meaning promotional products and promotional services. It makes sense in this case to keep this phrase together as one item.	Invalid	
Wrong URL for SAP as of 5/4/2026 Dispatch. https://snipboard.io/o3qbn5.jpg	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depending on where you looked. https://snipboard.io/D90M8x.jpg	Invalid	FYI'd due to conflicting information
1. title tags should not include "Area" - "Radon Mitigation Dayton, OH Area Guardian Radon Removal" please review all title tags and remove all except Serving Area title tag.	Invalid: This is a serving area business. Title tags may use the word "area."	Valid	There are other meta errors, so the score won't change.

https://snipboard.io/Jc4Spi.jpg Copy hotlink was missing from the SAP page	Invalid: the word "gaskets" is internally linked on the SAP page on post-CW backup: https://my.websites.hibu.com/preview/59aad7987f49962d2a78c4a91f8e3941?device=desktop	Invalid	
4. SAPs" URLs should begin "/sap..."	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depending on where you looked. https://snipboard.io/D90M8x.jpg	Valid	There are other meta errors, so the score won't change.
1. CW was supposed to remove "service-area" from SAP URLs but did not: https://snipboard.io/ZxUjDY.jpg	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depending on where you looked. https://snipboard.io/D90M8x.jpg	Valid	There are other meta errors, so the score won't change.
Header: phone lead in should not exceed phone number https://snipboard.io/4jJMa0.jpg	Invalid: This isn't always avoidable with the "No CTA" header, because it places the serving area text above the phone number. It's not lead-in text, it's the geo. This is the correct header for businesses without a second CTA.	Invalid	
Inspection Services title tag 62 char: now under 60 by removing unnecessary "services" as per current guidelines https://snipboard.io/SE8pak.jpg	This is the page name for a CAT, and removing the word "services" makes it read very strangely. I don't think this is an unnecessary use of the word "services" at all, and I support the CW's choice to keep the full page name in this case.	Valid	Inspections is fine for the page name. It keeps the meta title short and still relays the same information. https://snipboard.io/nUHUS.jpg
Home and CAT pages: gallery buttons 404 error due to URL "showroom" https://snipboard.io/k8GTUb.jpg	Gallery elements are Build's responsibility	Invalid	
Home title tag 62 char but shorter keyword needed https://snipboard.io/IY8BLo.jpg	Invalid: The client is a swimming pool contractor - this is the best keyword that adequately encompasses the business as a whole. The spec site does not demand choosing a shorter keyword; spec site says, "Step 9: Accept truncation. If the title tag still exceeds 60 characters after Steps 1-3, keep both the primary keyword and the NOB in the title tag." which is what CW did.	Invalid	
63: Electrical Panel Replacement hero image below Hibu One image minimums of 1900 px. Even Legacy images should only be 1500 px minimum. https://snipboard.io/T9Y0kj.jpg 66: Hero image on Electrical Repair SAP not renamed according to file name standards. https://snipboard.io/OY6mr2.jpg Same with Electrician SAP. Had to reconnect both. https://snipboard.io/VTpGW2.jpg	1. Invalid: As per the dispatch the minimum hero images site is 1200*534. the image used in the site has 1200*798. (https://snipboard.io/9eqIBQ.jpg) 2. Valid	Invalid	

63: FWR to Build: Specialty Shutters hero image below Hibu One/legacy image minimums of 1500-1900 px. https://snipboard.io/JPgdhM.jpg 66: FWR to Build: Specialty Shutters hero image has wrong file image name format. https://snipboard.io/JPgdhM.jpg 75: Text Us button s/b removed from EM. https://snipboard.io/gQV3ZO.jpg	1. Invalid: As per the dispatch the minimum hero images site is 1200*534. the image used in the site has 1440*1598. (https://snipboard.io/9eq1BQ.jpg) 2. Valid	Invalid	
70: https://snipboard.io/QoKSYM.jpg Reviews button same color as the header background.	2. Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID.		This QAE was completed in April, so it's not eligible https://snipboard.io/KfDNeC.jpg
Page SEO sections have OpenGraph placeholder image. https://snipboard.io/bAhzQ2.jpg	2. Invalid: As per the dispatch we are checking the Open graph images only in home pages, we don't have any additional communications on checking in all the other pages https://snipboard.io/1GIDvy.jpg		There are other image errors, so the score won't change.
na	No error description mentioned in the Design Section Notes but build score is showing as 93.55%. We noticed that the build points were reduced in "Mobile and Tablet View Build Score and Engagement Menu Build Score"	Invalid	In the future, please include the question that is marked with an error.
66: OpenGraph placeholder image on Gutter Services SEO. https://snipboard.io/8gmPTU.jpg	1. Invalid: As per the dispatch we are checking the Open graph images only in home pages, we don't have any additional communications on checking in all the other pages https://snipboard.io/1GIDvy.jpg		There are other image errors, so the score won't change.
na	No error mentioned in the Design Section Notes but build score is showing as 93.55%. We noticed that the build points were reduced in Images Relate to Page Content Build Score section	Invalid	In the future, please include the question that is marked with an error.
2. Hot Tub page images are cut off, incomplete https://snipboard.io/MxT0Je.jpg 3. Pool Product Sales images cut off, incomplete https://snipboard.io/OdTxf.jpg 4. Pool Llners page images cut off, incomplete https://snipboard.io/dC3xtc.jpg	2. The user has used the Gallery widget to place the product images. In the Gallery widget, displaying full-size images may result in inconsistent image dimensions. However, using the Gallery widget allows users to click on the images, which opens them in a pop-up for a clearer and more detailed view. Can this be treated as feedback	Valid	All of the images are the same size and can be fully displayed using the entire image. https://snipboard.io/CXP2lf.jpg
60: FWR to CW: Please include Partial List of Clients supplied somewhere on the site, possibly Structural Engineering Projects. https://snipboard.io/bxjQLw.jpg	Invalid - DSC must specifically state where content should go in order for CW to include it on the site. Only a blanket note about client-supplied information was included.	Invalid	Agreed - there's no mention of that list of clients in the questionnaire.
54: Replaced Fair Pricing with Free Fast Quotes for SQOT (Speed, Offers).	Invalid - "free fast quotes" was not an available MF on the questionnaire.	Invalid	Agreed - couldn't find "free fast quotes" on the questionnaire.

Per Q221864 please pull info for hot tub winterization page from https://swimkinghottubs.com/winterize-instructions . Requested info was not added to page.	Invalid - there were no instructions on what to do with the link provided; DSC is required to specifically state what content needs to be included.	Valid	The link is 8 steps to winterize a hot tub. With such little content, I feel like it could have been added without needing to know what to do with it.
Are the About page Content Library Fields correct per questionnaire and does the Open/Close widget appear in the hero of all pages?	Invalid - I could not find an error for this category.	Invalid	
There is a gallery anchor that is still part of the navigation. If not being used, it needs to be hidden or removed. https://snipboard.io/DT6jyX.jpg	Invalid — Cleaning up unused gallery pieces is Build's responsibility.	Invalid	This is marked as a build error.
Hillsborough appears to have been misspelled/abbreviated in text and on the questionnaire, appearing as Hillsboro County NH, but Hillsborough, NH is the county name. FWR to have it corrected throughout the site, header, geo, footer, video splash and wherever else it appear	Invalid — CW followed geo as presented in questionnaire. Hillsboro is not an unreasonable spelling, and the CW is not required to double-check all place names.	Invalid	Agreed
QA noted that the second FAQ question uses Hillsborough County, NH, the second FAQ question also lists the client's address, which the client did not want on the site. Taking this deduction here. FWR to remove.	Invalid — CW used FAQs as presented in questionnaire.	Invalid	Agreed
1 to 4 errors QA noted Hillsboro is misspelled in all the meta s/b Hillsborough County, NH, this was misspelled in the questionnaire and throughout the site FWR to correct all meta for the misspelling of Hillsborough and to correct the state in the 3 SAP page meta descriptions.	Invalid — CW followed geo as presented in questionnaire. Hillsboro is not an unreasonable spelling, and the CW is not required to double-check all place names.	Valid	There are other spelling errors.
Hillsboro - the geo - is misspelled throughout the site and all all meta s/b Hillsborough, NH - it was misspelled on the questionnaire.	Invalid — CW followed geo as presented in questionnaire. Hillsboro is not an unreasonable spelling, and the CW is not required to double-check all place names. Additionally, this has already been counted in other categories.	Valid	There are other spelling errors.
Amherst - the serving area that the client wanted used for the site is misspelled as Amhurst when it is used on the site - it was also misspelled on the questionnaire.	Invalid — CW followed geo as presented in questionnaire. Hillsboro is not an unreasonable spelling, and the CW is not required to double-check all place names. Additionally, this has already been counted in other categories.	Valid	There are other spelling errors.
1st locations page is missing address. https://snipboard.io/1SRqUF.jpg	Invalid — Address is present in CW backup. https://snipboard.io/tf2P8G.jpg	Valid	There are other address errors, so the score won't change.
Invalid — Address is present in CW backup. https://snipboard.io/tf2P8G.jpg	Invalid — CWs use Text as provided.	Invalid	I think the argument is the missing address? It was on Anna's b/u. This was removed by build. Let us know if that was NOT the issue, I think there was a pasting mishap.

Associations are missing from locations pages.	Invalid — CW uses Yext as provided and does not assume that primary locaiton info applies to secondary locations.	Valid	Associations are present in Yext for the additional locations. https://snipboard.io/jCXxUz.jpg
SAP URLs are written in old format.	Invalid — This was not updated everywhere in the Spec Site until 5/19. What was correct depended on where you looked. https://snipboard.io/D90M8x.jpg	Invalid	FYI'd due to conflicting information
https://snipboard.io/UryPxu.jpg Insurance not included in payment types	Invalid — Insurance info is present in CW backup. https://snipboard.io/AEb9nR.jpg	Invalid	
Devine location business hours are 24/7 in listings, should be on site also	Invalid — 24/7 is in hero mofacs and site text. https://snipboard.io/F8aU0u.jpg https://snipboard.io/NYadQG.jpg	Valid	There are other Location page errors.
Location pages: unused gallery section should be removed https://snipboard.io/hPR39E.jpg	Invalid — Build removes unused Gallery pieces.	Invalid	This is marked as a build error
CAT pages: reviews section content missing https://snipboard.io/IEEn4sj.jpg	Invalid — Reviews widget is present on all CAT pages in CW backup, and CWs do not do anything with this widget. https://snipboard.io/iVxZDt.jpg	Valid	There are other linking errors
Facebook and Instagram icons from the live site are not present on the updated site.	Invalid — Nothing about Facebook or Instagram is provided in the questionnaire.	Invalid	I think the issue is that they disappeared with the clone. But since we don't look at those things with the new productions, I'm not sure if we should check it. They're in the footer on the previous site and not on the new site.
Awkward H3 – Commercial Glass and Mirrors Improve Your Business Image with Professional Commercial Glass and Mirrors	Invalid — Clone to Add was for an Add. Loc. page; CW isn't required to edit H3s and have been told to only do what is needed for the Clone.	Invalid	Agreed - we wouldn't adjust anything outside the purchased products.
Shower Door Replacement H3 Error Tform Your Bathroom with a New Shower Door	Invalid — Clone to Add was for an Add. Loc. page; CW isn't required to edit H3s and have been told to only do what is needed for the Clone.	Invalid	Agreed - we wouldn't adjust anything outside the purchased products.
Venmo not added to payment types https://snipboard.io/F2K4cV.jpg	Invalid — Venmo is present in CW backup. https://snipboard.io/ZSvsGo.jpg	Invalid	Weird. It was on her final, but gone pre-build. I can't explain or blame.
Team - Description - ✗ Formatting Error - Description should include the business name "RPR Construction" https://snipboard.io/eqbxZ2.jpg	Invalid — Per the Spec Site, a Meet the Team meta description does not have to include the NOB. https://snipboard.io/pOA1hQ.jpg	Invalid	Agreed. Tool error
CAT pages reviews section: content still not visible https://snipboard.io/8SWj2u.jpg following FWR, CW should have sent site to Build for correction if unable to fix it.	Invalid — CW doesn't work with this widget. If it's not visible, QAE should FWR to Build.	Invalid	That was a tech issue opposed to an implementation issue.
Nearly all pages, sometimes multiples times per page, and meta content throughout site have "A+ Rating with BBB" must be removed as it's not permanent and the site might have to be edited https://snipboard.io/LKqyRT.jpg	Invalid — This is already counted in the meta column.	Invalid	Fair
Is the meta description set up for each page?	Invalid — No errors reported for this category.	Invalid	x

Is the primary and secondary CTA set up correctly?	CW Error marked, but no feedback given for this category (placed coupon button feedback under callouts)	Invalid	
1. Midlothian individual location page address missing as per Q220467	Invalid: this is a house; CW left assumption about this	Valid	It is, but they also have Geo pages, so the address should be included. We went through this with a roofer that had Geo Pages. Sarah indicated that because the Geo pages are related to locations, the address needs to stay on the location pages. Additionally, if the customer is paying for additional locations, the address should be included on the page.
Are all links for buttons, images and text linked correctly?	Invalid: CW error marked, but feedback given is not specific to links.	Invalid	
1. Serving Area page, not used, shouldn't be on navbar https://snipboard.io/SLIJnt.jpg	Invalid: Serving Area page is not on any nav (mega or mobile/tablet) on post-CW backup.	Invalid	Agreed - Build Error However there are other navigation errors, so the score won't change.
3. Contact page, not used, shouldn't be on navbar https://snipboard.io/SLIJnt.jpg	Invalid: Not present on mega menu or mobile/tablet nav of post-CW backup	Invalid	Agreed - Build Error However there are other navigation errors, so the score won't change.
4. Request form, not used, shouldn't be on navbar https://snipboard.io/htdbQE.jpg	Invalid: Not present on mega menu or mobile/tablet nav of post-CW backup	Invalid	Agreed - Build Error However there are other navigation errors, so the score won't change.
49: https://snipboard.io/0i76Zq.jpg GEO s/b inconsistent across tags - you can remove Area but you have to remove them across titles/descriptions.	Invalid: Sarah et al confirmed this is not the case	Valid	This wasn't confirmed until last week or so, but this site was done at the beginning of May, when specs were different.
The request call back button isn't linked to the anchor on the page. https://snipboard.io/KKYExV.jpg	it is on post-cw backup. Won't change score d/t other deductions	Valid	
Social Icons: Were the applicable social icons entered correctly and do they link to the correct page?	CW Error marked, but no feedback given for this category	Invalid	
FWR to CW: -SAPs need to say "in" rather than "near" as they're a service-based business.	Invalid: Checked post CW backup, and the SAP copy meets the requirements without claiming the business has a physical location somewhere they don't. The CWs haven't been told they have to remove instances of "near" in the copy when working on a service-based business.	Invalid	
https://snipboard.io/saBrTN.jpg City not connected on SAP page	Invalid: It is connected on post-cw backup. https://snipboard.io/8iDJxK.jpg	Valid	There are other content errors, so the score won't change.
GEO content: multiple locations, main GEO should be the first of the largest locations, Worcester County, MA, instead of provider's residential location/town https://snipboard.io/4XblnT.jpg	Invalid: At the time this site was written, guidance was to use the location of the business as the primary geo. From https://websitespec.hibuone.com/geo-display-rules - https://snipboard.io/hcgRUP.jpg https://snipboard.io/T1i8Go.jpg	Valid	This is in the overall site geo, not just meta. In the case of overall geos on the site, the Geo Display rules indicate it should be the largest first https://snipboard.io/bFSYij.jpg https://websitespec.hibuone.com/geo-display-rules

1. All meta content: GEO needs to be changed with new GEO of Worcester County, MA	Invalid: At the time this site was written, spec site required the primary geo to correspond w/ the primary business address. https://snipboard.io/hcgRUP.jpg https://snipboard.io/T1i8Go.jpg Won't change meta score d/t other valid deductions here.	Valid	This is in the overall site geo, not just meta. In the case of overall geos on the site, the Geo Display rules indicate it should be the largest first https://snipboard.io/bFSYij.jpg https://websitespec.hibuone.com/geo-display-rules
https://snipboard.io/BkwEKc.jpg Free estimate callout cannot have fine print	Invalid: It makes sense that they might not allow customers to combine this with other offers. We have asked Paul for clearer definition on callouts vs. coupons and are still awaiting response.	Valid	Callouts don't get fine print. This should have been formatted as a coupon. Also, coupons should have a value to them, so since this doesn't, it's not a coupon and shouldn't have fine print.
Coupon buttons are not set up https://snipboard.io/2srRL9.jpg	Invalid: The site does not have coupons, only callouts, and there is already a valid deduction for the callouts question	Valid	The issue is that the CW left "Coupon Button Text" on the callout. It should have been updated. https://snipboard.io/LIPYru.jpg
1. mega menu should not be so big it needs a scrollbar https://snipboard.io/270nRD.jpg CATS should not be expanded	Invalid - I think it is a build task to resolve overflow?	Invaidd	This is a QAE task
49: Team - Description - ✗ Meta Formatting Error - Description should include the business name (Insulpro). https://snipboard.io/eb80GW.jpg	Invalid - the spec site does not have the NOB in the description on the example for team pages: https://snipboard.io/FZsKNn.jpg	Invaidd	
Do the headlines and body copy follow the writing style guidelines and best practices?	CW Error Invalid — No errors reported for this category.	Invaidd	
Contact page description has no motivating factors. https://snipboard.io/aobYn1.jpg	Invalid — Per the Spec Site, there is no requirement for mofacs in a Contact meta decription. https://websitespec.hibuone.com/title-meta-contact-location-pages	Invaidd	
Header: lead-in text size must match https://snipboard.io/CNITAM.jpg	Invalid — Font size is a Build error.	Invaidd	
Backflow Testing - Title - ✗ Formatting Error - Missing the name of business in a Category title; should be "[Keyword] [Geo] [Name of Business]" https://snipboard.io/n3Uupe.jpg	Invalid — Backflow Testing is a Core page that has subpages nested beneath it. It is not a Category page, so it has Core page metas instead of Cat page metas.	Valid	Backflow Testing is a Cat Page. https://snipboard.io/C2YZ6e.jpg
na	This was not built by John Morgan, it was built by Renuka Prasad, please update the build person, thanks!	Invaidd	
Hero Image Build Score	2 pts taken for hero image, but I don't see any notes as to why and also don't see any hero images that were changed out	Invaidd	
66 - Build: Mini gallery on Cat pages still has template images - https://snipboard.io/qxLDcG.jpg	66: Checked the build save, I don't see the template gallery images, it's just the white space that was noted that couldn't be removed, gallery images connected to collections per spec.		There are other errors for the images, so the score won't change
49: 7 images without alt text. https://snipboard.io/hUlsrS.jpg	These are imported blog images, and our process does not require alt text for them. https://snipboard.io/hUlsrS.jpg	Updated	Agreed

73 - Build: Background opacity was below 40. Opacity needs to be at minimum of 40. https://snipboard.io/wnEWJH.jpg	73. Recommended best practice overlay opacity is 20-30%.	Updated	Agreed
1. Septic Inspection image is a sewer system, not septic https://snipboard.io/pTYC3v.jpg 2. Septic Pump Repair image is of a sewer system, not septic https://snipboard.io/2EiogU.jpg 3. Septic System Maintenance is a grease trap, not a septic system https://snipboard.io/Xm7lo3.jpg 4. Septic Tank Cleaning image is a sewer system, not septic https://snipboard.io/UtLr56.jpg 5. Septic Tank PUMping image is a sewer system, not septic https://snipboard.io/Axd3ZJ.jpg 6. Septic Tank Repair image is a sewer system, not septic https://snipboard.io/AbXWJH.jpg	Requesting that this be treated as feedback. Build used the best available images from the resource library that align with the content, as the service focuses on septic tanks. All images used in Build are available in the resource library and appear in search results when using the keyword "septic."	Valid	A search of septic systems in the library shows a variety of images. They don't need to match the actual service, since it's hard to pin that down. The images should be of septic systems, though. https://snipboard.io/MnwjVK.jpg
Gallery from old site should be recreated since there's a CCA, over 6 customer supplied images available triggers a gallery.	As per questionnaire, there's no specific instruction to use images from existing site for Gallery. https://snipboard.io/nZ3SLV.jpg	Updated	Agreed - we only pull images from upsell/rebuild sites.
Walkway installation services button led to softscape page.	Invalid - the Walkway Installation button on the home page led to the correct page on CW backup.	Updated	Agreed - Happened during Build
social media restored on the Bolivar contact page but not added to Stockton as the URLs and pages specifically include that one city	Invalid - the Facebook URL was not provided on the Q for this clone and CWs are not instructed to look at the previous questionnaire for links. The facebook URL for this location is also not in Yext, so it did not auto populate.	Valid	The Pre CW version of the cloned site has the link on the footer. https://snipboard.io/U13Qrf.jpg The previous Contact page also has it. https://snipboard.io/sW4Fhm.jpg And in Listings. https://snipboard.io/H18tIs.jpg
Video splash - video description field wasn't completed https://snipboard.io/BX6Ylj.jpg	Invalid - CW does not fill out this field; only NOB and video summary.	Pending	Trying to get clarification from process
multiple page descriptions and title tags, full NOB missing, LLC only gets removed when needed to keep title tags 60 characters or less https://snipboard.io/pEHZry.jpg	Invalid — Per the Spec Site, https://websitespec.hibuone.com/title-meta-home-cat "Do not: Include any extensions to the NOB like LLC or Inc. in any title tag or meta description." Even if this is just the Home & CAT page in the Spec Site, this has come up in multiple meetings. James is reaching out to Paul et al. to have this clarified in the docs.	Updated	I see it on some pages, but not on specific pages dedicated to title and description overviews. I'm going to suggest that we have one page for titles and one for meta with an accordion menu for each page type. There's too much conflicting information.

1) Home title tag should include full NOB with LLC .https://snipboard.io/wLudns.jpg abbreviated NOBs are only for attempts to stay under 60 characters in title tags .https://snipboard.io/dAZxjw.jpg 2) Serving Area Directory page description should include full NOB .https://snipboard.io/voy5U0.jpg 3) Auto Ceramic Coating SAP description should include full NOB .https://snipboard.io/JsZwLm.jpg 4) PPF Coating SAP description should include full NOB .https://snipboard.io/sG3kWA.jpg 5) About meta content should have full NOB .https://snipboard.io/B9Kd8G.jpg 6) All Service page descriptions should have full NOB	Invalid — Per the Spec Site, https://websitespec.hibuone.com/title-meta-home-cat "Do not: Include any extensions to the NOB like LLC or Inc. in any title tag or meta description." Even if this is just the Home & CAT page in the Spec Site, this has come up in multiple meetings. James is reaching out to Paul et al. to have this clarified in the docs.	Updated	I see it on some pages, but not on specific pages dedicated to title and description overviews. I'm going to suggest that we have one page for titles and one for meta with an accordion menu for each page type. There's too much conflicting information.
Home h1 is redundant to the GEO, it should not use "serving cleveland metro" .https://snipboard.io/mTQd11.jpg	Invalid — The H1 specifies the entire metro in ways the geo does not.	Valid	The H1 should not encompass a different geo than what's below it. The H1s are meant to relay the primary product or service for the page or site
1) Service Area directory page description still missing full NOB .https://snipboard.io/wcVYhR.jpg 2) About meta still missing full NOB .https://snipboard.io/cjqzye.jpg 3) FAQ meta still missing full NOB .https://snipboard.io/2OKvSH.jpg 4) Reviews meta still missing full NOB .https://snipboard.io/HWNvnG.jpg 5) Contact meta still missing full NOB .https://snipboard.io/FjcbHQ.jpg 6) Request form meta still missing full NOB .https://snipboard.io/EVeoDv.jpg	Invalid — Per the Spec Site, https://websitespec.hibuone.com/title-meta-home-cat "Do not: Include any extensions to the NOB like LLC or Inc. in any title tag or meta description." Even if this is just the Home & CAT page in the Spec Site, this has come up in multiple meetings. James is reaching out to Paul et al. to have this clarified in the docs.	Updated	I see it on some pages, but not on specific pages dedicated to title and description overviews. I'm going to suggest that we have one page for titles and one for meta with an accordion menu for each page type. There's too much conflicting information.
Video splash - Home page meta description was not added to the video description field per process .https://snipboard.io/lav7CL.jpg	Invalid — Per the HWP Manual p. 146, this is QAE's responsibility. https://snipboard.io/aQDm73.jpg	Pending	Pilot feedback doesn't impact the agents montly totals. I'm not sure that the manual is updated. We go off the HOFO. Getting clarification from process
The about information on the About page isn't showing on mobile and tablet views. Desktop: .https://snipboard.io/ml8kW7.jpg .https://snipboard.io/eiL51o.jpg Mobile: .https://snipboard.io/WiJLrP.jpg	Invalid — Web Writers don't check mobile and tablet views for this.	Updated	This was hidden by Build - not sure why. Pilot feedback doesn't impact the agents montly totals.
The Serving Area page was left on the mobile menu. This client doesn't have a serving area page. .https://snipboard.io/FY3sMj.jpg It was also left under the Contact page. .https://snipboard.io/0iTBlh.jpg	This should be FYI since this is the new dynamic process and this was not an issue in the previous process.	Updated	Pilot feedback doesn't impact the agents montly totals.

Spacing in copy on core pages was inconsistent (see: space/no space before bulleted lists). - .https://snipboard.io/lqmGKN.jpg; .https://snipboard.io/XjSc8y.jpg	Invalid — Web Writers don't fix the template spacing.	Updated	Fair
Tablet and mobile nav bar still has a link to the Serving Area page which is not being used since they have Geos. Changes to the desktop nav do not carry over to the tablet or mobile versions of the nav - .https://snipboard.io/56Z4r1.jpg	This should be FYI since this is the new dynamic process and this was not an issue in the previous process.	Valid	Pilot feedback doesn't impact the agents montly totals, though new, I believe it was an expectation at the time of build. Also, I think it is imperative to check all views on a site for weirdness, especially on a pilot that has some volatility.
Phone number on mobile header s/b Click to Call link with the phone number on the button, not a Contact link with Call Us on the text. .https://snipboard.io/GP2hqH.jpg	Invalid — This writer has been doing this this way for a long time without it ever being a problem before. What rule is being applied here, and where is it?	Valid	The spec site indicates that the click to call button should be the phone number, but can be changed in amends. https://snipboard.io/MVzEPT.jpg https://websitespec.hibuone.com/click-to-call
There are several areas of meta that is over character count with no reductions. .https://snipboard.io/aUW2GF.jpg .https://snipboard.io/4AjBcb.jpg	Invalid — These all appear to be based on the meta tool, not the metas that are actually on the site, in the collections, and visible with the SEO META in 1 CLICK extension. https://snipboard.io/qnJY7i.jpg https://snipboard.io/yXAuUx.jpg https://snipboard.io/VAPKsw.jpg https://snipboard.io/xG2we8.jpg	Updated	Pilot feedback doesn't impact the agents montly totals. Hopefully the new meta tool will help with these issues.
NOB isn't capitalized in the description and all titles are over character count without any reductions. .https://snipboard.io/OYnNSE.jpg			
Video splash - video description field wasn't updated with Home page meta description per process .https://snipboard.io/0ICNsY.jpg	Invalid — Per the HWP Manual p. 146, this is QAE's responsibility. https://snipboard.io/aQDm73.jpg	Pending	I'm not sure that the manual is updated. We go off the HOFO. Getting clarification from process
Home page: Questionnaire indicates PBN 4, which has icons instead of images for the copy blocks. Unclear why CW used images, no assumption left.	Invalid — Site was created with PBN 4. If current template does not match sample sites, Build should fix it. https://snipboard.io/q6SNxn.jpg	Updated	Agreed - I've tried to get the numbers removed on older sites, but no luck.
Header - "Serving Enid, OK Woodward, OK" changed to Located in Fairview, OK as the business has a physical location where customers can go .https://snipboard.io/b7QHsa.jpg	Invalid — CW followed new process and used the serving areas as provided in the questionnaire. https://snipboard.io/omEMDG.jpg	Valid	Since they have a single brick and mortar location and the address is displayed in Yext, we should be using the address as the heo in the header and hero. https://snipboard.io/F5Vnhf.jpg
Geo in hero - "Enid, OK Woodward, OK" changed to "Fairview, OK" as this business has a physical location where customers can go .https://snipboard.io/b7QHsa.jpg	Invalid — CW followed new process and used the serving areas as provided in the questionnaire. https://snipboard.io/omEMDG.jpg	Valid	Since they have a single brick and mortar location and the address is displayed in Yext, we should be using the address as the geo in the header, hero, and meta https://snipboard.io/F5Vnhf.jpg
Video Splash - the Name of Video field wasn't completed with the name of the business and the Video Description field wasn't completed with the Home page meta description as per process .https://snipboard.io/0zx9lh.jpg	Invalid — Per the HWP Manual p. 146, this is QAE's responsibility. https://snipboard.io/aQDm73.jpg	Pending	I'm not sure that the manual is updated. We go off the HOFO. Getting clarification from process

Tablet and mobile Navigation menu - removed Serving Area page from menu as there are no SAP pages or active serving area directory page .https://snipboard.io/xQ0hDi.jpg	Invalid — Unclear if this is really CW responsibility, but we're checking in an upcoming meeting.	Pending	
Video splash - Name of Video field was not completed with name of business and Video description field was not completed with Home page meta description as per process .https://snipboard.io/orvY0.jpg	Invalid — Per the HWP Manual p. 146, this is QAE's responsibility. https://snipboard.io/aQDm73.jpg	Pending	I'm not sure that the manual is updated. We go off the HOFO. Getting clarification from process
Related services link box not removed for single pages: https://snipboard.io/9Upsue.jpg	Invalid: It is not present on T1 interior pages on post-CW backup: https://my.websites.hibu.com/preview/5ae7ed172d45a1c968314bed79161fd9?device=desktop	Updated	Agreed - Build Error
both Location pages, request forms are template version https://snipboard.io/ITEu2B.jpg	Invalid: Per the HOFO in multiple places, if request forms are not chosen as a primary or secondary CTA, which it was not for this client, Build is responsible for the contact forms on the individual location pages. Q: https://snipboard.io/Lo9lCN.jpg HOFO: https://snipboard.io/htwq58.jpg https://snipboard.io/MHYWzt.jpg https://snipboard.io/0V8ypD.jpg	Updated	Agreed - Build Error
Serving Area: still in wrong place on navbar https://snipboard.io/qehl5X.jpg	Invalid: Liz didn't work this FWR as she was OOO - Brett Smith did: https://snipboard.io/b8WOsp.jpg	Updated	Updated user
Some hero h2 geos had an extra comma at the end. - https://snipboard.io/apqD7V.jpg	For accuracy/SEO purposes, actual geo info was not incorrect. Can we please move this to copy best practices?	Updated	
22 - CW: Main phone number was not LM RCF. - Yext: https://snipboard.io/svTmic.jpg RCF View: https://snipboard.io/6mEwJZ.jpg	Invalid: This appears to have been changed after CW step. Post-CW backup shows listings RCF: https://my.websites.hibu.com/preview/697621ef14e6f75f7ad5e4051e7e6282?device=desktop	Updated	Agreed - Build Error
55 - CW: H1 and h2 geo were not connected to data on the SAP. https://snipboard.io/VqxonD.jpg; https://snipboard.io/M6AGws.jpg	Invalid: It is connected on post-CW backup: https://my.websites.hibu.com/preview/697621ef14e6f75f7ad5e4051e7e6282?device=desktop https://snipboard.io/jp9U1S.jpg	Updated	Agreed - Build Error However, because we moved the error from line 30 to this section, the score won't change.
49. Deduction: SAP pages meta description "must read naturally and serve the user." Both SAP pages: 24-Hour Tow Truck and Towing Services meta: Both start with "Request a quote..." which is fine but then the mofac is "Free quotes for towing services" use a different mofac as it is repetitive as written. Also, "Immediate assistance for lockouts" could be changed out for a mofac that's more relevant to someone searching for towing.	Can we please FYI this? Metas follow technical specs and while this is good feedback, spec site does not forbid repetition, and this is not a distinction we've discussed as a CW group when learning metas at this pace and scale.	Valid	The quote CTA and 24/7 services are both repeated. There are examples on the SAP of how to write the SAP meta descriptions and none of the examples or formulas have repetitive information. https://websitespec.hibuone.com/title-meta-sap-and-geo-pages
2. Fixed Dental Prosthetics CAT page, Reviews widget missing https://snipboard.io/wleChf.jpg	Invalid: It's there on the post-CW backup. https://my.websites.hibu.com/preview/60ac4c248b95e9ef0545388070be6856?device=desktop	Updated	Agreed

Primary GEO is incorrect, for a visit type business it should be the address city, not the serving area. https://snipboard.io/DpwnYq.jpg	Invalid: We have confirmed the new guidance with primary and second-largest serving areas from Dispatch applies to all site types, whether location-based or serving-area.	Updated	Fair, still a work in progress.
Two of the core page copy block buttons on the home page were still linked as "category," meaning they were broken links. - https://snipboard.io/xpwwgY.jpg; https://snipboard.io/eUoJXR.jpg	Can we please FYI, since this is a new feature as part of the Pilot?	Valid	Since this is the pilot, the score wouldn't impact the agents monthly total. It is good data to retain.
Home page buttons were still linked to /category/ while there are only core pages on this site, leading to 404 errors. - https://snipboard.io/lFUOrC.jpg	Can we please FYI, since this is a new feature as part of the Pilot?	Valid	Since this is the pilot, the score wouldn't impact the agents monthly total. It is good data to retain.
Header and Hero GEO content should be identical (except with local ranking) https://snipboard.io/q2xIKY.jpg	Invalid: The "&" vs. the pipe are OK, as long as the primary and secondary geos are the same.	Valid	Q: Is that located in the spec doc? I do not see that situation covered, though I can certainly be looking in the wrong place. Ex. "and" replaced with "&" I recall, I don't remember & for , last I heard on Tuesday Paul likes the seperation pipes.
Specialized Plumbing CAT: Sump Pump Repairs copyblock missing https://snipboard.io/wl7ZNa.jpg	Invalid: On the CW backup, there are only three kittens under Specialized Plumbing Services, and they all have a paragraph on the Specialized Plumbing Services CAT page. The only page I can find for Sump Pump Repairs is an SAP	Updated	Even more interesting, LR added the page!
Any mention of Traverse City needs to be changed (including FAQs) to Traverse City County, as it's only a county rather than a town	Invalid: I spotchecked a few pages on the CW backup (including FAQs) and didn't find any mentions of "Traverse City" by itself. However, the local ranking keyword is "Pest Control Services Traverse City, MI per Q224331" so if it had been used, this seems to be OK. I'm assuming that Semify put in "Traverse City" throughout the site since it was optimized for that location.	Updated	I couldn't find any instances of it in the backup either. No LR on the site.
SAP needs to be linked to a page on the main site.	Invalid: Checked CW backup, and "Pest Control" in the first H3 is linked to the pest control page.	Updated	Agreed - Build Error
Additional payment types weren't added to the contact page. https://snipboard.io/ywUVZf.jpg	Invalid: This is a build responsibility	Updated	This is marked as a build error https://snipboard.io/4tXKz.jpg
Invalid: No QAE notes for this category, but marked as a "CW and Build Error"	Invalid: No QAE notes for this category, but marked as a "CW and Build Error"		Which question?
Video splash - the video description field was not completed with Home page meta description https://snipboard.io/qw46JO.jpg	Invalid: This is a QAE task	Updated	Since this is the pilot, the score wouldn't impact the agents monthly total. It is good data to retain.
Meta title tag incorrect https://snipboard.io/kzLhjt.jpg	Invalid: On CW backup, the meta title for the Home page says, "Locksmith Services Fort Myers, FL John A. Koons Locksmiths"	Updated	Local Ranking https://snipboard.io/YX8Gb5.jpg

1. There were some image without alt text https://snipboard.io/N1xdPf.jpg 2. Home page hero on mobile - adjusted h1 to avoid break in "Maintenance" https://snipboard.io/TjEVHO.jpg	1. Image in the screenshot is not used in the website. https://snipboard.io/N1xdPf.jpg 2. May this be considered a technical issue? Build adjusted the width of the H1 headline on desktop only to avoid an orphan text and assumed that the mobile widget would not be affected since it has its own settings.	1. Updated 2. Valid	1. Agreed 2. Agents should still be looking at the site to ensure alignment and spacing is correct.
Retaining Wall image is a property/privacy wall, not retaining https://snipboard.io/gWT0Su.jpg	Per our research, image used matches "retaining wall". https://snipboard.io/nmJgoU.jpg Copilot also agrees with the image used being considered as "retaining wall". https://snipboard.io/u8XRby.jpg	Valid	Those images don't match the one in the error. Per the search in the image library, retaining walls are short and usually have plants and flowers in them. They aren't meant to be tall for privacy. https://snipboard.io/NQLCS0.jpg
ABOUT tab missing imagery with intro copy	May this be considered as technical issue? Image was added to the About page during Build and may have been disconnected by the system. As evidence, the image is visible as uploaded in the editor at the same time Build was processing the website. https://snipboard.io/T7kHZ.jpg	Valid	The image placeholder is an element in the editor. It doesn't show up if the image is not showing. If an image is not showing, there is just a white space. The presence of the placeholder means that an image was not placed there.
1. Concrete Retaining Walls image is stone/block wall, not concrete https://snipboard.io/TcDw6n.jpg 2. Stamped Concrete Patio image is a walkway not a patio https://snipboard.io/TdMqxs.jpg	May these be treated as feedback? Build used AI to identify these images. https://snipboard.io/ZRyEda.jpg https://snipboard.io/fhRzOP.jpg	Valid	Concrete retaining walls are different from concrete block. AI isn't always a good judge of these things as there is no way to know what those blocks are made from.
https://snipboard.io/RI6k1z.jpg Call or text pop buttons are not consistent	Call and text popup is not used in this website since the client declined using RCF. https://snipboard.io/4AXk2L.jpg	Updated	
1. Gallery page - as there were no images provided and no link to an Instagram page, hid the Gallery page from navigation and removed from the mega menu per best practice https://snipboard.io/kouGQ4.jpg 2. Our Tours CAT page - Since the page layout uses a left-side icon for the copy blocks, per the Hibu One spec site the page layout should be two copy blocks per row with a supporting image https://websitespec.hibuone.com/balancing-copy-blocks-with-icons and not changed to be three copy blocks https://snipboard.io/NtOF3L.jpg	1. The Instagram Gallery is currently displayed because it was specifically requested. Please refer to the questionnaire screenshot where the instruction to include the Instagram Gallery was provided. https://snipboard.io/yToViE.jpg 2. Assuming this is feedback only, the layout created by Build does not deviate from the established layout standards, as there is already an existing example of a three-column section.	1. Updated 2. Valid	1. Agreed 2. The template has 2 copyblocks per row, but it was changed to 3. Template: https://snipboard.io/MrjK86.jpg Post Build: https://snipboard.io/cfOQ3G.jpg Per the balancing copyblocks specs. Left Icon layouts should not move to 3 across. It should always have an image to fill the empty space. https://snipboard.io/wAz61l.jpg https://websitespec.hibuone.com/balancing-copy-blocks-with-icons
75: Client didn't want address displayed on site. https://snipboard.io/DqUrVu.jpg https://snipboard.io/CH1Xha.jpg	The questionnaire did not display the field intended for Build to determine whether the Get Directions button should be retained in the EM. As a result, the button remained visible. The process is currently being clarified.	Valid	I'm showing the question on the Build Output. https://snipboard.io/5YLPyZ.jpg
Licenses were missing.	Invalid - license information was included on About page: https://snipboard.io/MqYTO0.jpg	Updated	

Video Splash - video description field wasn't completed with the Home page meta description per process https://snipboard.io/nvYeOL.jpg	Invalid - CWs only fill out the NOB and video summary fields in the widget. Per the HWP Manual pg. 146, this is a QAE task.	Updated	We don't use the HWP manual for process. But this has been addressed and changed as of 6/22
31 - CW: Video Description is missing for the video splash. Should be copied from the Home page meta description - https://snipboard.io/7bBDHW.jpg	Invalid - CWs only fill out the NOB and video summary fields in the widget. Per the HWP Manual p. 146, this is a QAE task.	Updated	Since this is the pilot, the score wouldn't impact the agents monthly total. It is good data to retain.
47 - CW: Buttons on mini gallery rows go to URL /gallery but the Project Gallery URL is /project-gallery so it leads to a 404 error - https://imgur.com/a/v3YB7Nf	Invalid - CWs do not do anything with the gallery section, including buttons.	Updated	Since this is the pilot, the score wouldn't impact the agents monthly total. It is good data to retain.
Video splash - Video description field was not completed with Home page meta description https://snipboard.io/rL3eb5.jpg	Invalid - CWs only fill out the NOB and video summary fields in the widget. Per the HWP Manual p. 146, this is a QAE task.	Updated	We don't use the HWP manual for process. But this has been addressed and changed as of 6/22
Video Splash - Video description field should be the Home page meta description, not the name of the business. https://snipboard.io/yX4mqs.jpg	Invalid - CWs only fill out the NOB and video summary fields in the widget. Per the HWP Manual p. 146, this is a QAE task.	Updated	We don't use the HWP manual for process. But this has been addressed and changed as of 6/22
1. Header and Hero GEO content s/b only the largest area due to "Three+ Locations" policy "If there are multiple locations in Yext, select the largest service area" which is Central WI	Invalid: the old policy is overridden by the 5/26 Dispatch which states we should use the primary and second-largest areas listed on questionnaire (for all site types)	Valid	There is no second-largest service area on the questionnaire, so shouldn't it just be the first area? https://snipboard.io/2bE431.jpg
2. Facebook URL in questionnaire worked fine, unclear why CW assumption said it didn't work	Invalid: This is what I see when I try to go to the link in Q225773 - https://snipboard.io/zj43sq.jpg	Valid	I had no issues getting into it, either. https://snipboard.io/ZyqPd8.jpg https://www.facebook.com/profile.php?id=100082908623749#
1. Appliance Repair H1 "Fast Action Appliance Repair" uses a shortened version of the NOB that was not approved. https://snipboard.io/EPaprs.jpg	Invalid: The H1 isn't using a shortened NOB. It could be seen as a PLAY on the NOB, but that's never been prohibited, and the words "fast action" are not exclusive to this business. It's legitimate to assume this business takes fast action to repair your appliances (which would be in title case for an H1).	Valid	Fast Action is also considered a power word/phrase, which we no longer use in H1s. Simply "Appliance Repair" is more suitable.
https://imgur.com/a/cu8ZQ6o The formula used for services pages was [Action Verb] keyword, similar keyword at [NOB]. H3 Motivating factor. CTA (space permitting). However not all of the service pages descriptions had 2 KWs.	Invalid: On the same page, the spec site also says "These are starting points, not rigid formulas." - the meta description shown follows the spirit of the formula very well, and at 149 characters there is not much room for another keyword. Deck painting is also a straightforward enough service that another keyword isn't needed to describe it. https://websitespec.hibuone.com/title-meta-core-product-service-page#:~:text=These%20are%20starting%20points%2C%20not%20rigid%20formulas.%20The%20description%20must%20read%20naturally%20and%20serve%20the%20user.	Updated	

https://imgur.com/a/ZpY7csK All of the descriptions for the services meta did not have 2 KWs when the format used was [Action Verb] keyword, similar keyword at [NOB]. H3 Motivating factor. CTA (space permitting).	Same comment as above.	Updated	
Is the Contact/Location page set up correctly?	Invalid: CW Error marked, but Pages Section Notes say "na"	Updated	
Contact: "and surrounding areas" s/b linked to Service Areas page https://snipboard.io/WrC3G2.jpg	Invalid: We only link that text in the footer, not the contact page.	Done	There is another linking error, so the score won't change.
The Gallery title does not get Geo treatment. Gallery of Projects Premier Ag Supply KY	Invalid - Build responsibility Feedback for QAE: Please include screenshots of meta errors to avoid AMs having to restore site backups.	Done	It's QAE responsibility, so I'll remind the team. There are other meta errors, so the score won't change.
Request CTA button in Mobile header directs to a dead Request form page that isn't requested. All service tab buttons on Home CAT should read "Learn More" not "Contact Us"	Invalid: Both of these appear to be changes made by Build. Post-CW backup shows "learn more" on copy block buttons and no "contact us" button in Header. Post-CW: https://my.websites.hibu.com/preview/25d6eee1f0f635a8a16c16e2e0912ce6?device=desktop Post-Build: https://my.websites.hibu.com/preview/03c3208a259b38eda47d046b9e78d899?device=desktop	Done	The header on the mobile has the Request CTA button in it. https://snipboard.io/4BfKkA.jpg The second issue is a build error, but with the other error, the score won't change.
Geo in header and hero - because this is a business with a location where customers can go, changed to "Located in Laona, WI" in header and "Laona, WI" in hero https://snipboard.io/liepc3.jpg	Invalid - all sites get service areas now per the 5/26 dispatch update: https://snipboard.io/jeGO2K.jpg	Updated	Doesn't make sense to me, but agreed. I think there was some clarification with DSC on when to use this, but at the time of the QAE, we just had to go with it. Also, this is a dynamic site and it won't impact the agent's score.
Video splash - Video description field was not completed with home page meta description per process https://snipboard.io/9CoHdt.jpg	Invalid - this task was not clarified to be CW task at the time of site build; an upcoming dispatch will delegate this task to CW.	Updated	
Q225773 facebook missing despite CW assumption that it's added https://snipboard.io/mU0pau.jpg	Invalid - the facebook link is present on CW backup.	Updated	It's weird because it's on the CW backup, but not the Pre Build backup.
Before and after gallery should be linked to the before and after anchor in the gallery because the gallery contains office photos as well.	Invalid - galleries are a build task, the anchor was not set up yet at CW stage.	Updated	
Hours widget should be removed, this is a service business https://snipboard.io/CTcE5H.jpg	Invalid - hours widget was removed on CW backup.	Updated	Agreed - Build error Also, this is a dynamic site and it won't impact the agent's score.
Is the AI generated copy organized logically and easy to read?	Invalid - could not find an error; no notes that fit this category.	Updated	
Serving Area page: CTA button missing. QA added per 5/5 update training and hibu one spec site.	Invalid - the page introduction content standards page on the spec site says a CTA or phone number are not required: https://snipboard.io/fvZAeK.jpg	Updated	Agreed

New SAP page URLs do not follow current formatting: https://snipboard.io/n2XFE1.jpg	Valid but invalid category - should be Is the Page URL (Permalink) set up correctly for each page?	Updated	Logical, adjusted
Attic Insulation Company SAP indicated in the subscriptions and the CO was no generated for the site. https://snipboard.io/t9l4dn.jpg	Invalid - the SAP is present on CW backup. This is a clone, so QAE might have looked at previous site?	n/a	I wonder if we fixed it after the FWR, both have 100% for the CW on my end
Request Button Text is listed as "Request Service" (https://snipboard.io/UqnC5r.jpg). Should be "Request Estimate". Updated button text.	Same as request form error, do we need to deduct twice for mistaking the CTA?	Updated	
Gallery page META description references pricing guide instead of gallery (https://snipboard.io/X6OPaE.jpg). Changed "Check out Custom Decks' pricing guide for decks & patios in Denver, CO." to "Check out Custom Decks' gallery to view recent deck and patio projects in Denver, CO."	Invalid: Gallery metas are QAE's responsibility.	Done	There are other meta errors, so the score won't change Also, this is a dynamic site and it won't impact the agent's score.
https://imgur.com/a/6TTTQhr The footer should not be the hybrid since you have to visit this business.	Invalid: CW left an assumption about this: "This is a location-based business, but a hybrid footer was used to satisfy the Serving Area pages." - CW AMs have told writers this is a valid approach when a location-based business purchases SAPs. Additionally, this business DOES offer delivery, meaning they are hybrid. Q225296	Updated	We definitely should have seen the assumption, but the hybrid footer doesn't need to be used if there are no services where they travel to the customer. We've seen "and surrounding areas" linked under the address.
https://imgur.com/a/wdxvsAM The first H3 on the Harley Davidson Minnesota SAP does not use the full KW.	Invalid: The H3 contains the primary "service category" (per spec site) for the page. H3 reads: "Harley Davidson Service Across [City], MN". Adding "Minnesota" for full keyword would have made the H3 awkward and redundant.	Updated	If the SAP is adjusted to prevent redundancy, please leave an assumption so we have a heads up.
Address/Service Area: Is the address and service area listed correctly?	Invalid: CW Error marked, but Basic Business Info Notes say n/a	Updated	
Video splash - Video description field not completed with home page meta description per process https://snipboard.io/nmWpyL.jpg	Invalid: That was not added to CWs' process until 6/22	Updated	
Under Why Choose - "Tours Offered Designed for Active Senior Adults" changed to "Tours Designed for Active Senior Adults"	Invalid: Not an error - CW used "offered" so as not to imply ALL their tours are designed for seniors.	Valid	The grammar is off. If the implication is that it's not all tours, it could be "Select Tours Designed for Active Seniors"
Team page - "Meet Our Tour Director" changed to "Meet Our Tour Directors" to match the style of the supporting copy https://snipboard.io/iutmjL.jpg	Invalid: On the post-CW backup, there is only one tour director listed	Valid	The implication is that the paragraph above mentions plural travel professionals, so the travel directors should also be plural.
1. Home page description needs at least 2 motivating factors https://snipboard.io/oztd6C.jpg	Invalid: Homepage formula calls for at least ONE motivating factor: https://snipboard.io/HU1wD2.jpg from https://websitespec.hibuone.com/title-meta-home-cat	Done	Since only 99 characters were used on the description, a second motivating factor could have been used to fill out the description more. The guidelines say "at least one", so more is allowed. Since there are other meta errors, so the score won't change.
NOB misspelling: https://snipboard.io/NDX1ca.jpg	Invalid: NOB isn't misspelled in this screenshot. Inc is never used in metas.	Valid	The NOB is Modern Drywall. The screenshot says "Modery" https://snipboard.io/n4XEfb.jpg

21: GEO s/b the location as client has a showroom and ppl visit the location. Hybrid business but services seem minor compared to products. https://snipboard.io/5QqP9X.jpg https://snipboard.io/COQjld.jpg https://snipboard.io/LRmabl.jpg	Invalid: CWs have to follow the primary (and "next-largest" when one exists) serving area fields regardless of the type of business. https://snipboard.io/U4TurK.jpg	Updated	
49: Comparison Chart - Description - ✖ Formatting Error - Missing the name of the business. https://snipboard.io/l5hOT1.jpg	Invalid: From https://websitespec.hibuone.com/title-meta-out-of-norm-pages, OON pages get the NOB only in the title tag, not the meta description. https://snipboard.io/PB6Zfq.jpg	Valid	The description section of the Out of Norm pages of the spec site shows the NOB in the description. https://snipboard.io/eEp6ia.jpg
57: Showroom copy block repeats twice. https://snipboard.io/61qist.jpg	Invalid: Not on post-CW backup: https://snipboard.io/4xtX0L.jpg	Updated	Agreed - Build error
Facial Treatments East Cobb, GA page - "...for patients serving the East Cobb, GA area" changed to "...for patients in the East Cobb, GA area" https://snipboard.io/MudgZ0.jpg	Invalid: Not an error	Valid	The sentence structure makes it sound like the patients are serving the East Cobb area https://snipboard.io/SNdyc2.jpg
Motivating Factors - "Multiple Certifications" changed to "Botox, Implant, & TMJ Certified" https://snipboard.io/uc0UMW.jpg	Invalid: Not an error		Not strictly an error, but it's always better to specify things like certifications and licensing. There are other errors that won't change the score.
Facial Treatments Vinings, GA page - changes to text to include located in Marietta, GA text per best practice https://snipboard.io/ILt9Cz.jpg	Invalid: Post-CW backup mentions Marietta, GA: https://snipboard.io/9kGBDs.jpg	Valid	It mentions Marietta, but not that the office is located there. Other Geo pages specifically say "located in" https://snipboard.io/elt5Ab.jpg
Home page - Under Aesthetic Services - "Our Botox certified team ..." changed to "Our Botox-certified team ..." https://snipboard.io/XgEW6k.jpg	I have always been under the impression that Hibu is not this particular about hyphens, and that consistency is most important. CW was consistent.	Valid	Hyphens still need to be used where they should be. And they should be consistent.
under Restorative Dentistry - "...provide TMJ certified treatment ..." changed to "...provide TMJ-certified treatment ..." https://snipboard.io/PFXVJN.jpg			

Exomind page - h1 in hero "Exomind" changed to "Exomind Treatments"; content of the page doesn't apply to the subject of the page.			
https://imgur.com/a/ul2aD4p Hyper Pigmentation page - should be one word Hyperpigmentation - content on the page doesn't apply to the subject of the page. Hyperpigmentation relates to skin, not teeth.	While it would be nice if writers were given time to research clients and their more obscure services, that is not the current process. With no info on the questionnaire, the guidance from above is to "trust the AI." This level of information is not something writers can be reasonably expected to know or research.	Valid	I feel like this could be addressed in an FIR for content from the DSC. If we're not sure what it is, we shouldn't include that content in the site. I have seen situations where the page isn't created as we don't have the content or reference for the content. Especially if the FIR is not answered accurately.
Invisia page - the content on the page doesn't match the subject. The page is Invisia , not Invisalign. As this is a page under Aesthetics, presume the content should relate to skin treatment, not teeth.			The last thing we want is a totally irrelevant page of content for a service that the customer offers.
Emface page - h1 in hero "Emface Treatment" changed to "Emface Treatments" Exion page - h1 in hero "Exion" changed to "Exion Treatments" https://snipboard.io/TyiqMe.jpg			
Do the page names (navigation menu) follow best practices?	Invalid: None of this feedback is about actual page names or navigation labels. H1s are different from page names (a type of headline), and QAE did not update page any names.	Updated	
The single pages are not added to the menu: https://snipboard.io/A2lrVM.jpg	Invalid: Those single pages shown are all utility pages; only service pages are required to be in the mega menu.	Updated	
Callouts: Are the callouts appropriate for the page and set up correctly?	Invalid: CW error marked; no feedback for this category	Updated	
Was the content used in the site per questionnaire instructions?	Invalid: No feedback for this category	Valid	The SAP for Plumbing is about headting and AC https://snipboard.io/U36Zkp.jpg
TURF SERVICES CAT – Turf Pest Control copy block Learn More button directs to Tree Pest Control. It is misdirected on the live site as well.	Invalid: This case was only to add SAPs - checking links on CAT pages is not part of the CW process on this clone case	Updated	
https://imgur.com/a/aE81CUS Venmo and Cash App were not added to the payments.	Invalid: CW added them to About page per process: https://my.websites.hibu.com/preview/d4472eca2269d21f9f1873a13becb2ad?device=desktop	Updated	
1. Contact: Q226869 customers do not visit, so no pinpoint map https://snipboard.io/5hP4a0.jpg	There is no map on post-CW backup: https://my.websites.hibu.com/preview/966cc6d5f41a2e703376a567867e6a44?device=desktop	Updated	Agreed - Build Error
1. Contact: "and surrounding areas" s/b links to Service Areas page https://snipboard.io/b5OqLr.jpg	Invalid: We only link that text in the site footer	Done	There are other linking errors, so the score won't change.
1. Contact: serving area still not linked, https://snipboard.io/vDI7CR.jpg QA adjusted https://snipboard.io/rvzDFQ.jpg	Invalid: Not part of spec	Done	There are other linking errors, so the score won't change.

2. https://imgur.com/a/yzvj41t Text in the header is not balanced.	2.As per checking, header elements are aligned in Build's post backup. https://snipboard.io/cD1xKs.jpg	Updated	
Electric Bicycles for Sale SAP image not clearly an electric bike https://snipboard.io/HKrdIs.jpg	The image was taken from the client's existing website https://www.fcbikeshop.com/general-1 https://snipboard.io/BEijSR.jpg and this product page https://www.specialized.com/us/en/turbo-creo-2-comp-e5-sram-apex-eagle/p/4221861?color=5383373-4221861 was also used as a reference, which identifies the bike as an e-bike.	Updated	
Multiple images were missing alt text https://snipboard.io/9Gsx3e.jpg	Can this be classified as a technical issue? Build had added the alt text using the Generate Alt Text button in the widget, ensuring that all images had their own alt text. A screenshot has been provided showing that the image identified by QA as missing alt text did have alt text during the initial build. https://snipboard.io/EDW1hy.jpg , https://snipboard.io/vqeCnO.jpg	Updated	
67: The client requested red and blue for the site colors and red wasn't used nor are there assumptions regarding the red color. https://snipboard.io/Nhf5m5.jpg https://snipboard.io/1tjvQr.jpg https://snipboard.io/5njOjX.jpg	The colors were taken directly from the client's logo, as our process is to use the logo's color palette to maintain brand consistency. Since the logo did not include any red, no red elements were incorporated into the design. https://snipboard.io/kNoZ43.jpg	Updated	Understood that the logo colors did not contain red, but it is okay to use that color (red) as an accent on the site since it won't look out of place and it fulfills the customer request. We'll mark this as an FYI for now, but make sure assumptions are left in the future.
Related Services widget not on Commercial Demolition and Excavation pages/kittens. https://snipboard.io/4k0Z8X.jpg https://snipboard.io/rzh6Ey.jpg	Invalid: CW backup shows that the Related Services widget is included on both pages.	Updated	Agreed - Happened during build
Where Asbestos Is Found copy block is not on the Asbestos Removal CAT. https://snipboard.io/WGg15F.jpg	Invalid: CW backup shows a third row of content that includes the "Where Asbestos Is Found" copyblock and "Learn More" button.	Updated	Agreed - Happened during build
Geo in header and hero "Lehigh County, PA Bucks County, PA" changed to "Lehigh & Bucks Counties, PA" https://snipboard.io/QGylte.jpg	Invalid: Using the pipe to separate primary and secondary service areas follows spec. CW used pipe on the CW backup.	Updated	
About page - "...serving Lehigh County and Bucks County ..." changed to "...serving Lehigh and Bucks counties ..." https://snipboard.io/Lbw8Z2.jpg	Invalid: Both are correct ways to phrase this. This isn't a spelling/grammar error.		
Contact page: additional ACH payment from About page missing https://snipboard.io/l3EAeT.jpg	Invalid: This was marked as a CW error, but adding the payment methods to the Contact page is a Build responsibility.	Updated	
Metal Fabrication service page shouldn't have related links with entire menu https://snipboard.io/fCkV9P.jpg	Invalid: On the CW backup, the metal fabrication page doesn't have a related services menu, because it's part of the top level navigation.	Updated	Agreed - Happened during build

Asphalt Paving SAP title tag not connected https://snipboard.io/HjTLKA.jpg	Invalid: On the CW backup, the connection is there and it pulls in the geo of "New Orleans, LA." I think the connection broke after this went to Build and needed to be refreshed.	Updated	
SAP page description needs NOB https://snipboard.io/rZ9tuM.jpg https://snipboard.io/e42Qzi.jpg	Invalid: On the CW, the meta description for Fire Features includes NOB. "Call Huser's Outdoor Design + Build for fire features." Similarly, the Outdoor Kitchens page also includes the NOB in the meta description on the CW backup. "Call Huser's Outdoor Design + Build for an outdoor kitchen builder."	Valid	Post CW Backup does not have the NOB in any of the SAP descriptions: Fire Features: https://snipboard.io/8lpQL9.jpg Hardscaping: https://snipboard.io/gk5CYv.jpg Landscaping: https://snipboard.io/0Bk2Dv.jp Outdoor Kitchen: https://snipboard.io/bL69AU.jpg Outdoor Living: https://snipboard.io/YAufPD.jpg
Home copy blocks were for all of the menu anchors, so there were over 15 copy blocks on the home page. The home copy blocks format should have been for Catering, Delivery, and Menu.	Invalid: Per Spec Site on Restaurant Menu Pages, all menu categories should have their own copy block on the Home page to help diners quickly understand the restaurant's offerings and ensure the Homepage fills its role as the top-level category hub. https://websitespec.hibuone.com/restaurant-menu-pages	Updated	
Build assumption: "No CCA is available, so we cannot pull images from the existing website." however, Build doesn't need a CCA for Facebook and Instagram. Please build a gallery with those images.	There was no specific request to create a gallery page using Facebook images. This should be explicitly requested, along with details about which images should be used. https://snipboard.io/VMv9Ho.jpg	Pending	There are instructions to pull images from FB in the images section of the questionnaire. https://snipboard.io/Vp1hqO.jpg Clarifying with training and process if the customer needs to specify specific images or if a reference to the FB account is enough. That first bullet point is confusing.
Customer supplied assets were supplied on 06/19/26 and include an image with pricing (0AC747C8-699B-4D71-8D34-B4D7533E8B82.jpeg). FWR to Copy to create a Specials and Pricing page as requested.	Invalid - no notes from DSC on the Q regarding where to find and place additional info so CW did not know to look for/use the info. It is not CW process to look for content in files unless instructed to do so.	Updated	That is fair. There was no direction, and the files all had those brutal names, and they were image files, I am glad we found it and kick it over, but agree that it was DSC error and not the CW missing something.
The service pages in the description use the format [Action Verb] keyword, similar keyword at [NOB]. Motivating factor. CTA (space permitting). — This approach works well for transactional pages where user intent is to purchase or hire. However, there are not 2 KWs in the descriptions. Counting the KWs is something the AI tool will always miss.	Invalid - Per "These are starting points, not rigid formulas. The description must read naturally and serve the user" in the same set of rules (https://websitespec.hibuone.com/title-meta-core-product-service-page) and a clarifying conversation I had with James on 6/16 regarding FWRs for this issue, two keywords are not explicitly required.	Updated	FYI for this error (others listed)
Serving Area Directory page title tag "Contractor" too generic . https://snipboard.io/HmCuai.jpg	Invalid — Serving Area page covers door installation, flooring, gutters, roofing, siding, and windows. Contractor is broad, but this one offers a broad range of services.	Valid	Agreed with concept, disagree with execution. Contractor is too broad and a weak term by itself, add something like "Home Improvement Contractor" and you are back in the game.

Home H1 should not include GEO content as it's right below .https://snipboard.io/uKk1cs.jpg	Invalid — This is not a real rule, and this H1 covers a broader area than the 2 counties listed below it.	Updated	It should be a thing...but maybe not the side you'd expect. This is actually very clever, and a "real" practice, just not commonly done at the 'bu (because no one mentioned it). It works because they are going for two different things - the h1 is hitting the wider area while the h2 handles the local one. This is a good technique that Hibu doesn't really touch on. Let's bring it up on Tuesday, sounds like a smart way to do complex coverage... In my head, I see like 5 bullets, it will be 23 pages...
Some of the service page descriptions did not have 2 KWs for example the alterations page. When using the format [Action Verb] keyword, similar keyword at [NOB]. Motivating factor. CTA (space permitting). There has to be two KWs.	Invalid - Per "These are starting points, not rigid formulas. The description must read naturally and serve the user" in the same set of rules (https://websitespec.hibuone.com/title-meta-core-product-service-page) and a clarifying conversation I had with James on 6/16 regarding FWRs for this issue, two keywords are not explicitly required.	Updated	I went from the bottom up, the rest of these will be FYI's until we get some better guidance (I still don't hate the other option advisement below if they can).
Gutter Installation SAP: CW adjusted URL but did not reconnect hero image .https://snipboard.io/IMdc9X.jpg	Invalid for Anna Lahey — This FWR was worked by Lauren Schugg.	Adjusted	Adjusted
.https://imgur.com/a/VcdJaw3 All of the service page descriptions did not have 2 KW in them.	Invalid - Per "These are starting points, not rigid formulas. The description must read naturally and serve the user" in the same set of rules (https://websitespec.hibuone.com/title-meta-core-product-service-page) and a clarifying conversation I had with James on 6/16 regarding FWRs for this issue, two keywords are not explicitly required.	I didn't see an error, unless I fixed it subconsciously. 40% chance.	Just adding more insight. It can be tricky, esp with the "starting point" verbiage. "Okay, where is the line?" There isn't always a great second KW - We didn't talk solutions, until we get something official in the docs we want to use the "Question" opening when you don't have a second KW, that one works best because the second KW is optional in that instance. - JC
Concrete Contractor SAP needs 1st paragraph related page text link .https://snipboard.io/plgVc3.jpg	Invalid — the words "concrete work" are linked in the first paragraph right below the H3 in the snipboard provided by QAE.	Updated	Agreed, we were having some visibility issues on our monitor. On mine, slaps me in the eyes.
Home page intro blocks should only feature CATs, not anchor points. https://snipboard.io/v86O2q.jpg	Invalid: When there are menu category landing pages, the individual menu categories need to be listed on the Home page. This is from the spec site. https://websitespec.hibuone.com/restaurant-menu-pages	Updated	Agreed and adjusted
Exhaust Manifold image indistinguishable https://snipboard.io/tcPFkD.jpg	The tube part is clearly the focus of the image and is the main part of an exhaust manifold. https://snipboard.io/AQsSkB.jpg	Updated	While that is an image of a manifold, I feel like it's too closely cropped. Including more of the engine block and centering the manifold will give the image more context.

63. Deck Builder SAP page: It appears the builder is in his bare feet which doesn't look professional so changed out the image: https://snipboard.io/UVOfDN.jpg 75. Build left an assumption that even though the pinpoint map was requested, CW assumption said client is primarily a service business so no map added. Similarly, no Get Directions button should be added, so QA removed from EM. https://snipboard.io/iHZDAm.jpg Also, client wanted SMS texting so use their mobile number 8167038961 for text button on EM. https://snipboard.io/8gG7CY.jpg	Can this be tagged as suggestion. 1. The image used is appropriate. Although the individual is barefoot, this does not negatively affect the overall quality or purpose of the image. He was actively staining the deck, and wearing shoes during this process could track dirt and debris onto the freshly treated surface. Being barefoot was a practical choice for the task and should not be considered an issue with the image. 2. The assumption left by build was for the map only since it was also stated by CW on the assumption. However for the engagement menu build still follow the standard process that when the physical location was set to "yes" Get direction button in engagement menu should be added. https://snipboard.io/M8RpfN.jpg. 3. Updating the Engagement Menu link was not included as part of the build task since this is done in KG. Additionally, a different phone number cannot be manually added to the Engagement Menu, as this is not supported by the standard build process.	Valid	1. The US has stringent labor and safety laws. We don't allow any professional home improvement work to be done barefoot. Especially when dealing with heavy materials, power tools, and sharp fasteners during deck construction. Using an image where workers don't follow safety laws implies the business isn't professional. 2. The screenshot provided is not the same business. However, the assumption left implies that the build agent followed the assumptions of CW. If the map and Get Directions button is left off the site, it should not be on the Engagement Menu.
1. Location pages template text https://snipboard.io/fM530b.jpg 2. Contact pages, additional payment type missing Q228492	1. Unused Yext fields should disappear from live site 2. Build adds this to contact pages	Updated/Valid	Traditional site, fair. On location pages, CW would do the Yext stuff, Build would do the icons. Holiday - agreed

57. Serving Area intro: Please refer to hibuone spec site for specifics on Serving Area intro.
<https://websitespec.hibuone.com/page-introduction-content-standards#SAPDirectoryIntro> In particular, the headline should not list an individual city, ST, refer to the broader area, in headline and copy.

Also, per hibu one spec site and 5/5 update training: Add a CTA button this is CW's job and can either be Contact Us or Request CTA, please add.

<https://snipboard.io/0di1kh.jpg> Also, Career page needs a CTA in the intro, can be text link. Add text-linked CTA to About page intro.

Per the 5/5 update training, each SAP page needs an internal link in the first paragraph that links to a core page of the same topic. If no core page has similar topic, link to a CAT page. In this case, consider linking ""mobile truck and trailer repair"" at the end of the first copy block to the mobile truck and trailer services CAT page.
<https://snipboard.io/cqODK0.jpg> "

This all reads like copy best practices to me. Can we have a category adjustment, please?

Updated

Updated the error. FYI, there are also linking errors that should have been counted separately, but we left those as is to avoid adding more errors during the rebuttal process.

1. Home H1 unclear, should directly describe services "Professional Roofing and Related Services"	Good feedback, but I don't agree that this is unclear enough to constitute an error.	Updated	There are several services laid out on the site of what this business does. They should be included in the Home H1. "related services" is not clear enough. https://snipboard.io/cb2CpM.jpg Spec Site: https://websitespec.hibuone.com/hero
2. Q230536 page name request not followed, no assumption	The request is for a gallery page; this is now a Build responsibility	Updated	
header content: inconsistent fonts and sizes https://snipboard.io/wC4hE3.jpg	Requesting that this be treated as feedback. Based on our review of CW's backup, the font size has been kept the same as what we originally received. The font styling appears different because the text widget being used is a heading, which we did not notice since this is not the expected outcome for the header elements. https://snipboard.io/RJ9Y04.jpg https://snipboard.io/rS2hM0.jpg	Valid	It is a build responsibility to adjust fonts and sizes to be consistent. CW could have added content, but your teams size and color them correctly.

3. https://imgur.com/a/J1KiDmL The geo and phone number are not balanced in the header. 4. https://imgur.com/a/WgRjg0A Daily Living Aids icon shows silverware, while the copy block does say utensils these are not the main ones that this service would sell. We need the icon to show for sure that it is a medical item. 5. https://imgur.com/a/v2AioUt The Complex Medical Equipment hero is not clear on what the device is.	3. Upon checking Build's backup, text elements are aligned properly. https://snipboard.io/v3Ds0k.jpg 4. The icon used is appropriate, as it matches the kitchen and dining tools and adaptive eating utensils featured on the page. https://snipboard.io/b60UWT.jpg 5. The image used depicts a recognized component of a power wheelchair, which is one of the products listed on the page. https://snipboard.io/f7dZbt.jpg https://snipboard.io/9qMP2n.jpg	1. Fair 2. 41: The Gallery page should have been hidden as there are no images yet. Images will be imported from IG. The Gallery page should also have been named "Instagram Gallery" instead of just "Gallery." https://snipboard.io/AQDm6G.jpg	The update regarding IG gallery is for Hibu One Websites created on and after June 22. This website was sent to build on 6/18/26 https://snipboard.io/9d3NOF.jpg		
SAP meta descriptions don't follow correct format.	Invalid: No screenshot or specific feedback on what is being considered incorrect.	Updated	Looks like the NOB thing from the other one. Fair
SAP page descriptions should include NOB https://snipboard.io/or7Pzn.jpg	Invalid: On the spec site, the "schedule/request opening" meta does not include the NOB, which indicates it is not strictly required - this would make sense because the NOB is already in the title tag for the SAP, and on other pages it's in one or the other, not both.	Updated	Fair
40: FWR to CW: Please create a generic careers page with a standard career/application form.	Last we discussed this (QAE and CW leadership, possibly +others) it seemed we were aligned that we didn't like the idea of "faking" our way through any utility pages. CW left an assumption, and I'm not seeing anything on spec site re: which pages are allowed or required to be built with generic content.	TBD	I thought we were doing this as well, worth a mention on the Tuesday call.
https://imgur.com/a/qLqHF7r There was no info given on the Q for the support ticket page. The form that was pulled in from the old site had filler text and no assumption for build to look at the form. Since it is not mentioned on the Q there is not an expectation for build to check the old site.	Invalid: We look at clients' previous sites all the time, especially when no info is provided on the questionnaire. My understanding is this is preferable over omitting pages, which affects billing and creates more work for other teams. While a note mentioning Build in the CW's assumption would have been ideal, Build teams s/b aware that contact forms beyond hero and request page are their responsibility.	Updated	Proactive is great, and no error due to the effort, but Build tends to be very black and white - if it isn't on teh Q they'll assume it was a CW thing.
home H1 should not be the NOB https://snipboard.io/rI9Wmf.jpg	If the NOB contains main keyword(s), what's the harm? I was unable to find a published rule against this.	Updated	I think that is okay, will confirm
SAP directory content needs NOB mentioned https://snipboard.io/ebcKR3.jpg	Invalid: NOB is not mentioned as a requirement anywhere on this page of spec site: https://websitespec.hibuone.com/page-introduction-content-standards#SAPDirectoryIntro	Valid	The NOB should appear once per page in the copy somewhere. Re: "Consistant use of the NOB". https://websitespec.hibuone.com/common-things-to-look-for

Serving Area intro section should include NOB https://snipboard.io/RV5uca.jpg	Invalid: NOB is not mentioned as a requirement: https://websitespec.hibuone.com/page-introduction-content-standards#SAPDirectoryIntro	Valid	The NOB should appear once per page in the copy somewhere. Re: "Consistant use of the NOB". https://websitespec.hibuone.com/common-things-to-look-for
Header phone lead-in request not followed Q228619 "please say "Call or Text" and the phone number"	Invalid: We are only permitted to use "call or text" lead-ins when the client has a textable RCF. This client does not. https://snipboard.io/uHfs6m.jpg	Updated	Looks like they requested one on the questionnaire but DSC failed to set them up correctly in the dashboard. CW did leave a perfect assumption.
1. Header phone lead-in still not adjusted as per Q228619 "please say "Call or Text" and the phone number" c	Invalid: Not permitted without textable RCF.	Updated	Looks like they requested one on the questionnaire but DSC failed to set them up correctly in the dashboard. CW did leave a perfect assumption.
Home H1 should not be the NOB https://snipboard.io/zwFUa3.jpg	If the NOB contains main keyword(s), what's the harm? I was unable to find a published rule against this.	NA	Unconventional, but since it does have the KW's - fair. I think they came to the same conclusion, looks like they adjusted it.
.https://imgur.com/a/ROtl7V1 The service pages that were not LR did not have 2 KWs in their description. Counting KWs is something the tool will always miss. On the hot tub page the additional KW should only be added if it fits without having to delete the comma or pipes.	Invalid — This is the two keyword issue that's being investigated.	Done	There is another meta error, so the score won't change.
Foot phone for primary location is a 610 template number .https://snipboard.io/UVDJ2f.jpg	Invalid — Footer phone is correct in CW backup. https://snipboard.io/lm8cia.jpg	Updated	Agreed - I think it was disconnected from Yext
Venmo missing from payments on About page. .https://snipboard.io/kvU3C7.jpg	Invalid — Venmo is present in the CW backup. https://snipboard.io/tER5vG.jpg	Updated	Agreed - Build Error
.https://imgur.com/a/q3ITJG2 Additional Payment methods were not added to the location page.	Invalid — This is a Build task.	Valid.	There are two places to add the payments. The About section also doesn't have the payment options. https://snipboard.io/owuaFS.jpg
.https://imgur.com/a/TQ6REkK Home description did not have 2 KWs. Service page description did not have 2 KWs when the verb format was used.	Invalid — This is the two keyword issue that's being investigated.	Updated	
.https://imgur.com/a/pUTncL9 The phone numbers in the footer were not both bold.	Invalid — This is a Build task.	Updated	
ACH was not added to the payment options on the About page: https://snipboard.io/Z6xjla.jpg QA added.	Invalid — ACH is present in the CW backup. https://snipboard.io/NoTQJu.jpg	Updated	Agreed - happened during build
.https://imgur.com/a/Z7U9Sf8 The Homepage description does not have 2 KWs. Service description does not have 2 KWs. Repiping has the & glitch.	Invalid — This is the two keyword issue that's being investigated.	Updated	
Some of the CAT for example Drywall Repairs page did not have 2 KW in their description.	Invalid — This is the two keyword issue that's being investigated.	Updated	
Mentioning "over 5000 5-star reviews" is against hibu policy. .https://snipboard.io/mE5lf6.jpg .https://snipboard.io/RoKtAk.jpg Too many instances for all screenshots.	Invalid — This is not a real rule.	Done	We had a rule back in the day that if they can't quantify claims like that (or an A+ BBB rating, etc.), we can't include it on the site. I guess it's not a thing anymore. Since there are other errors, the score won't change.

1. Callouts - bolded call to action text so it stands out from body text https://snipboard.io/p1HPXv.jpg 2. adjusted the size of the Reviews button for mobile https://snipboard.io/v2kc3g.jpg	1. I remember this being discussed in the meeting somewhere, but is it somewhere in the spec site or in writing in instructions? How would a designer new to the pilot in June know to do this when sites just used to come to design that way. Can we get an FYI this time? 2. I don't see where the Write A Review button is too small, this is what it looks like when I look at Neville's save https://snipboard.io/w3jskB.jpg		1. Apparently we don't have a design guide for callouts/coupons anymore. Fair enough. 2. I can't recreate it. Seems like a glitch.
72: The alignment on the mobile version wasn't set correctly. The text is half covered. https://snipboard.io/pxu1rL.jpg	When I look at the designer's post save, I don't see the same issue with the overlap, unless it's on a different page that I am not seeing. Here's a snip of what I see: https://snipboard.io/RGpvWM.jpg	Updated	With both of these errors, there are other errors on the same question, so the score won't change. Agreed. I can't recreated it, either.
Switched hero images for Holding Tanks & Water Systems page and RV & Boat Waste Pump-Out page to better match the subject of the page https://imgur.com/a/1NdMcas	Should the designer lose points for this even though the Waste Pump-Out and tank is the same correct item?	Valid	I know it may seem like minutae, but in the RV/boating community, the photos are different. On the waste pump-out page, it shows a tank with a white pipe going from the top of the tank into the trailer. White is the common color of a water pipe/hose. Also, if this was pumping waste out, leading away from the tank for removal. https://snipboard.io/UwqKo2.jpg The holding tank page shows a hose coming out of the tank. The hose is also orange, which is the common color of waste tank hoses. https://snipboard.io/5feqQB.jpg
Cosmetic Dentistry core page - hero image was not replaced as requested https://snipboard.io/UxYJIT.jpg	I don't see that this was actually requested in the FWR	Valid	The FWR notes on the build case reference case comments for FWR notes. https://snipboard.io/DcuHwH.jpg
1. Video splash - adjusted size of mobile video pop-up so the close icon shows https://snipboard.io/89KCCz.jpg 2. Emergency Heavy-Duty Towing page - replace hero image with same hero as used on Heavy Duty Towing page as the vehicle being towed on this page is not heavy-duty https://snipboard.io/lqtOND.jpg and limited options in stock library 3. Long-Distance Towing page - replaced hero image as this doesn't accurately reflect long-distance towing https://snipboard.io/GuelLz.jpg	1. Video splash - in the editor it does not show that there is an issue with the close icon, it is there 2. lack of options was the reason the designer could not find something heavy duty, but didn't want to duplicate a hero image that wasn't on a GEO or SAP, admittedly neglected to make an assumption note, can we get an FYI for this one? 3. You don't tow through a city or town when towing long distance?	Valid	1. The site preview shows the oversized video widget. https://snipboard.io/BfFlwK.jpg 2. We can FYI this, but the score won't change due to the other image error. 3. It's possible, but that image doesn't give long distance towing vibes. Most of the time, long distance towing is done on a flatbed to avoid unnecessary wear and tear on what is being towed.
Hero image build score	What caused losing 2 pts for this? I don't see it here.		Please supply the form question.

Coupon - bolded call to action text to stand out from body copy https://snipboard.io/BsTQ5h.jpg Callouts on core and geo pages - bolded call to action text so it stands out from body text https://snipboard.io/cehzlZ.jpg Coupons on core and geo pages - bolded call to action text so it stands out from body text https://snipboard.io/LMvdQW.jpg	Can we get an FYI this time for this? This was not something design had to do and now the template's broken so new designers to the pilot do not know to look out for that.		Looks like there are other errors for font color/treatment, so the score won't change.
- The hero image used for the Logo Design and Digitizing does not properly represent the service (EF15). Please update to a service related image.	Can we get these 2 points back, this actually an image of an embroidery machine putting a logo on a product....at hat. Actually the same thing that we replaced the image with except it's further back so you can see what's happening more. There are not many options for this type of hero image in Shutterstock.	Valid	Logo design and digitizing is done on a computer by turning a physical logo into a file that can be used for printing and embroidery. So any image of someone working on a tablet or computer would be a good fit for this page.
Callouts/Coupons - bolded CTA text to stand out from body text https://snipboard.io/zXuagV.jpg	Again, this is a template issue that design never had to deal with, can we get an FYI on this. We gotta really get the template folks to fix this, is there anything in writing about this anywhere? This is another designer that is new to the pilot this month.	FYI	Fair, I can't quantify it, it just makes it look the part. Holler if you need us to push that up the chain.
Core page bullet sections have different spacing: https://snipboard.io/6sW2IA.jpg	This is something that we have no control over and cannot be fixed. The bullets show proper formatting when you click into the text box and revert back once you refresh the page.		
Commercial Deck Installation page - Gallery widget was added without any customer photos (https://snipboard.io/WidBH0.jpg). Hid widget.	The gallery in the screenshot is showing the placeholder photos that show when the gallery is properly connected to collections. Images are not visible in preview of Post_Build save	Updated	Agreed, it is connected, no issues
Lost point for "Callout Font Treatment Build Score"	I don't see why points were taken for this	Valid	Wrong category - Logo was not included in Callouts (https://snipboard.io/2FMAfV.jpg). Added logo. Moving it to the right category ("Are the images, icons, logos..."). knocks it down further than this category, so I left it in order to avoid making it punitive.
Is the Blog, eCommerce, and Gallery page hidden if applicable?	I don't see why points were taken for this and blog is showing correctly in post build save	Valid	I see a note in there: 41: *The CCA is required for us to import 3rd party blogs. Build assumptions state there is no CCA and they imported the blog.
41: H3 missing from the gallery page. https://snipboard.io/JouxVt.jpg	Assuming When multiple gallery sections are not present, the H3 heading is optional and not mandatory, can this be treated as feedback.		
70 - Build: Black text on red background with FAQ's doesn't pass color contrast checker on core pages. https://snipboard.io/fkIa0U.jpg 77 - Build: Color on video splash was white, which made the text invisible. https://snipboard.io/DjV8Qk.jpg	1. The Color contrast is passing, it is showing the green check mark, hence designer used the black text on red bg can this be treated as feedback. 2. Valid		
41: H3 on the gallery page is missing. https://snipboard.io/iZB40y.jpg	Assuming When multiple gallery sections are not present, the H3 heading is optional and not mandatory, can this be treated as feedback.		

Build: https://imgur.com/a/C1Aby2m The H3 heading above the gallery on the gallery page is missing.	Assuming When multiple gallery sections are not present, the H3 heading is optional and not mandatory, can this be treated as feedback.	
1. Tablet and mobile menus: unused "Service" page shouldn't be visible https://snipboard.io/g68kqu.jpg 2. Serving Area should be next to About https://snipboard.io/oYRldT.jpg	Invalid: Adding or removing pages from the navigation bar is not a build task, (except for Gallery and Blog pages).	
Tablet and Mobile menus: Serving Area s/b next to about https://snipboard.io/JLR84n.jpg	Invalid: Adding or reordering the pages in the navigation bar is not a build task, (except for Gallery and Blog pages).	
1. Better Business Bureau logo only used if code provided https://snipboard.io/rnUctH.jpg	As per the Spec site if the business is accredited we can add plain BBB logo https://snipboard.io/uCxZ6f.jpg	
41: H3 missing from the gallery page. https://snipboard.io/z3mROL.jpg	Assuming when multiple gallery sections are not present, the H3 heading is optional and not mandatory, can this be treated as feedback.	
1. Mobile header: button should match in same section but not match background https://snipboard.io/qY3Sw8.jpg 2. Desktop header: button should match in same section but not match background https://snipboard.io/JH05Qk.jpg 3. Navbar: Serving Area in wrong place https://snipboard.io/4niSkH.jpg	Invalid: Upon checking the backup, the review section included star ratings and a numeric score during the build. The button appeared only after QA added the customer ID. Invalid: Adding or reordering the pages in the navigation bar is not a build task, (except for Gallery and Blog pages).	
1. Mobile engagement menu: Q234170 calls only, text should have been removed https://snipboard.io/zUMpAl.jpg 2. Kitchen Cabinet Painting shows unpainted cabinets https://snipboard.io/aEw8Wn.jpg	1. Questionnaire mentions a mobile number and that the client allows texting hence the button is left in the EM popup. https://snipboard.io/7cUqAs.jpg 2. Can this be tagged as feedback? The image used is highly suitable for the content in the bulleted list, as it accurately represents both topcoat application and cabinet refinishing, which are highlighted in the page content. https://snipboard.io/0MdroQ.jpg	Invalid 1. The RCF is listed as "Call Only" and added to the texting button, so if we did add that it should have been for the mobile #. 2. Images need to support the main page theme. This is a poor example of painted cabinets. Stained, it would be a great example.
1. Callouts - bolded call to action text so it stands out from the body copy https://snipboard.io/3OsMQT.jpg 3. Text Us button to engagement menu as requested Video pop-up is too wide on mobile and close icon doesn't show https://snipboard.io/0JuxYl.jpg , adjusted size of pop-up for mobile	1. Unsure which part of the callout needs to be bolded. If QA is referring to the CTA lead in text, it has been verified that bolding this part of the callout is no longer required. https://snipboard.io/8T4UFn.jpg https://snipboard.io/T5gSyP.jpg 3. Upon checking on an actual mobile device, the close icon is visible. It is only hidden on the preview mode because of the scroll bar that is not present on the actual device itself. Requesting to be treated as feedback instead. https://snipboard.io/EAmILH.jpg	1. Updated 3. This is a known issue that has been reported via meetings and dispatch. It should be adjusted as needed.
Images related to page	Can't see why points were taken off here	Please supply the error and the question that was marked

Home page - h1 in hero "Pro Tire and Automotive Services" is the name of the business, changed to "Auto Repair, Maintenance, & Tires";	Invalid: We confirmed there is and has been no rule against this.	Valid	At the time of this rebuttal, that option had not been confirmed.
75: The clients mobile number wasn't added to the engagement menu for SMS. While there is an assumption about this from Build, if the process isn't known or it isn't clear, they should be checking with management on how to proceed vs. "assigning" the task to QA. https://snipboard.io/rLhIW2.jpg	Invalid : In accordance with the build process, when the SMS Text field in the content output is set to Yes, the Text Us button should be available in the engagement menu. Since the engagement menu link was not included in the build scope, it was not part of the implementation. This has always been the established process, which is why an assumption was made for QA to assist for the correct link. https://snipboard.io/wKiZCM.jpg	Q	Q: It says that the agent wasn't trained. Is that an individual agent issue or is all of Build not able to add a SMS link? I feel like you guys do it oftenm, but maybe I am confused.
75: The engagement menu wasn't set up. https://snipboard.io/BbivCg.jpg https://snipboard.io/NdRnJl.jpg	It appears the issue may be with the dynamic page template. Build was unaware the website was received with the buttons unlinked, as they were expected to be linked by default. Build's process verifies the required buttons are present in the Engagement menu popup, but training did not cover manually correcting links. Please see CW post backup as proof. https://snipboard.io/tZXU7l.jpg	FYI/Updated	Q. Do you guys test the buttons after they are done to make sure they go where they are expected? Seems like we may need to reach out to process to confirm that expectation. FYI for now.
21: Client wanted map displayed: https://snipboard.io/3NjYal.jpg https://snipboard.io/sj5kd1.jpg	21. Upon receiving this website from the Copywriter, Contact page no longer include the map. https://my.websites.hibu.com/preview/fec096787f62aa90b0382025fa7ae267?device=desktop		This could have been FWR'd to Copy. The question is visible on the Build output, so it could have been updated. Will mark the error for both.
27: Social icons on Contact page have generic links and are not on Q, s/b deleted. https://snipboard.io/hvbTMn.jpg https://snipboard.io/tmDUcT.jpg	Upon checking Build's backup, social icons don't appear on website preview. It only shows on the editor. Build checked the site using the website preview. https://snipboard.io/RwnAUN.jpg Build backup: https://my.websites.hibu.com/preview/e76c3f1ed0b614dddada5fbf3c10a538?device=desktop	Valid	Both versions of the site should be checked. If you're working in the editor, you should check the pages you're wokring on.
Customer has supplied CCA. FWR to Build to utilize images from the customers website throughout the site rather than stock images.	No specific request was mentioned for the designer to pull images from their existing website. https://snipboard.io/A8MDBL.jpg	Updated	They have a signed content collection agreement. The expectation is that we will use their content.
https://imgur.com/a/ezOPIYm The geo and the phone number in the header are not balanced.	Invalid: We checked the post FWR back up in that the geo and the phone number in the header are perfectly balanced. https://snipboard.io/NqMY0E.jpg	Updated	Check the home page on the POST for the Build agent, it is a few pixels off.
July 4th 2027 is not listed on the holiday hours on the site. https://imgur.com/a/e9VwaQ7	Invalid: When this site was written, it was before July 4, so July 4 2026 was included as a holiday on the CW backup.	Valid	But July 4th 2027 was on the holiday hours list in the questionnaire. https://snipboard.io/6QH0gJ.jpg

Callouts mention estimates however on the Q under if estimates are free it says N/A. There is no where else on the Q that says they provide estimates. https://imgur.com/a/wgdh1nu	Invalid: This business is an electrician, so the only way they'd be able to do service is by providing estimates. The CW backup doesn't say that the estimates are free, which would not necessarily be the case. But since they're selling a service, not a product, estimates are expected and standard.	Valid	Agreed, however if we're supposed to go off the questionnaire, the businesses doesn't want estimates highlighted on their site.
Home: although the home copyblocks follow the guidelines for creating sections for better navigation, there are no sections on the menu marked for Dinner Menu, Happy Hour, or Drink Menu. There are beverages, but the Drink section refers to wine and pasta, which are not found on the menu. It seems the copyblocks will have to be adjusted to Event Rental, Large Orders, Take and Bake Pizza, and only one Menu block.	Since the CW doesn't key in menu info or look at any attached menu files, the sections of the menu used for home page copy blocks were referenced from the Q231134. If they don't align with the menu the client provided, they should be removed from the site, but it shouldn't counted as a CW error.	Updated	Agreed
Heating Services page title tag "Heating Services Grovetown, GA NorthStar" CW should have removed unnecessary "Services" to allow for full NOB "Heating Grovetown, GA NorthStar Heating & Air Conditioning" same was done with AC Services as per https://websitespec.hibuone.com/title-tags	Invalid: "Services" is not an unnecessary keyword in this instance. "Heating" by itself is too broad and doesn't accurately describe the content of the page. I think there's an argument that "heating services" could be expanded to "heating service and repair" but I don't think it should be shortened.	Valid	The steps in shortening title tags is to remove Services, then use the shortened NOB. https://snipboard.io/3GvNu4.jpg
About and Contact page META Description over character limit (https://snipboard.io/daojyM.jpg).	Invalid: On CW backup, the About page description is 157 characters. The contact page description is 129 characters.	Updated	Dynamic page meta is a mess, but the pilot shouldn't affect their scores.
Home, CAT, and Core page META Titles are all over character limit (https://snipboard.io/ckpUO1.jpg).	Invalid: On CW backup, Home page title is 60 characters. I think this might be due to the dynamic site issue, where the changes the CW made don't carry over to the version QAE sees.	Updated	
SAP meta descriptions do not use the NOB https://snipboard.io/HuLr6S.jpg	Invalid: Checked CW backup - "Call Grease Tex Cooking Oil Collection for commercial cooking oil recycling. Same-day and emergency servies. Free quotes. Fast, clean solutions."	Valid	The post CW backup SAPs do not have that description in them. https://snipboard.io/XhNLbi.jpg https://snipboard.io/XUbJyl.jpg
Are the About page Content Library Fields correct per questionnaire and does the Open/Close widget appear in the hero of all pages?	Invalid - could not find error for this category.	Updated	Agreed - however pilot sites don't affect scores.
Careers form template text https://snipboard.io/pUyfqj.jpg	Invalid - CW did not create the form fields; this was a build task.	Updated	Agreed
OUR COMPANIES tab - United Mutual is a dead link to GoDaddy			
IMT Insurance App link inexplicably directs to the company blog. The live site provides a dead link. https://website.imtins.com/blog/	Invalid - links were added by build.	Valid	So, I was trying to find where on the questionnaire those logos were supplied or a request to link to those logos, but I can't find it anywhere. We appreciate the effort, but it seems that CW directed the Build team to look at the site for those logos and links without checking to see that they work.
OUR COMPANIES tab - PDF document was omitted with no assumption as to why.	Invalid - no instruction on questionnaire regarding a PDF document.	Updated	Agreed

Geo in header - Proudly Serving Del City, OK Oklahoma City, OK changed to Located in Del City, OK as this is a business where customers go for service Geo in hero - Del City, OK Oklahoma City, OK changed to Del City, OK as this is a business with a physical location where customers go for service	Invalid - if a secondary geo is provided, it gets listed in the header/hero even for a location-based business.	Updated	Agreed
Home: copyblocks not balanced https://snipboard.io/khb6zi.jpg	Invalid - balancing copy blocks is a build task.	Updated	Agreed
Callouts: Are the callouts appropriate for the page and set up correctly?	Invalid - could not find an error for this category.	Updated	Agreed
Almost all of the title tags are over 60 characters with no reductions https://snipboard.io/TSbiZG.jpg https://snipboard.io/6iHuRU.jpg	Invalid - CW backup shows these title tags as under 60.	Updated	With the confusion of how the SEO table works, understandable that someone is confused.
Emergency dental, teeth whitening, and veneers should have been added to the mega menu because the nav bar is too crowded and these also fall under the dental services category. https://snipboard.io/WlshH5.jpg	Invalid - CW backup does use a mega menu.	Updated	Agreed - not sure why Build pulled everything out of the mega menu.
CW assumption is not wrong that this is a service-based business, but there's no clear reason the address cannot be displayed. however, this assumption: "This doesn't appear to be a business that can be visited by customers." is incorrect based on google maps. it's a building on a public street. Address needs to be added as per Q229913 and Q227560 and Q229691.	Invalid — There is no signage for this company at this address. The only signage is for Corsa and Rox Coal, and there is nothing to indicate that this client has offices that would be visited here.	Updated	Agreed, the business should have signage to indicate they are at the location.
Unused Gallery anchors should not appear on navbar . https://snipboard.io/pu3oTt.jpg	Invalid — This is a Build issue.		This is marked as a build error. https://snipboard.io/vVoTeZ.jpg
All 3 SAP page descriptions do not follow current formatting . https://websitespec.hibuone.com/title-meta-sap-and-geo-pages GEO content not needed, should start with the CAT - in this case "Call NOB" and a second keyword/phrase should be added after the discounts. https://snipboard.io/I5Agaq.jpg	Invalid — Descriptions have adequate pieces in them (NOBs, CTA, keyword, and mofac) to be acceptable descriptions even if the exact formatting in the Spec Site keeps changing.	Updated	Agreed. But if the formatting is there, why not use it?
Exterior House Painting page title tag - "Home Painting" changed to "House Painter" https://snipboard.io/YD7M63.jpg	Invalid — "House Paint__" is the phrase right before this. Using "Home" broadens the visibility.		We'll FYI it, but Home Painting implies interior painting. We don't want to use varying terms for the same service. Since there are other meta errors, the score won't change.
https://snipboard.io/gdwrGe.jpg New SAPs should follow standard URL format for SAPs. https://snipboard.io/yihs7A.jpg	Invalid — Per the dispatch from 6/8, new SAPs in Clones should follow the page slug format that's already established in the site, not the latest best practice.	Updated	Agreed
47: Special Offers button for page that doesn't exist, redirects to Home. https://snipboard.io/EBgXd3.jpg	I can't find this button on the post-CW backup: https://my.websites.hibu.com/preview/5a83dc52559126ba799f8dc43ede38c4?device=desktop	Updated	It looks like build unhid that section, even though the coupons were not being used.
